Gentlemen:

Last night at 9:03 P.M. I sighted an object in the sky whose magnitude was approximately that of Saturn at the time. From my vantage point in New York City, I noted that this object was traveling west to east, reaching a maximum inclination of 70° above due north.

Kindly inform me of the nature of this object. If you are not able to do so, please direct my request through appropriate channels.

Your consideration of this request would be greatly appreciated. A stamped, self-addressed envelope is enclosed for your convenience.
