January 9, 1965

Office of Identified Flying Objects  
Wright-Patterson Air Force Base  
Dayton, Ohio

Gentlemen:

The recent release of two unidentified flying objects on  
September 22nd at Patuxent Naval Air Station has prompted me to  
write and tell you of my experience.

I 1943 I was living in Morgantown, West Virginia and teaching  
[REDACTED] at Grafton High School in Grafton, West  
Virginia. One night at approximately 6:00 p.m. in either January  
or February 1943 my wife and I were on our way to the Grafton-  
Elkins basketball game. As we were driving home from our home when I saw five flying objects. I said to my wife  
"Look at that sky". They were disappearing at the end of the  
horizon as she looked up and saw them. When I first saw them they  
were at the other end of the horizon. I both has identical  
descriptions of the objects.

1003533

They were circular, dark green at the center and became lighter green toward the edges. There was a yellow glow around the objects that had a spin off affect that indicated the objects were turning at a high rate of speed. The objects were moving at a tremendous rate of speed and in a formation. Following is a diagram of the formation.

I now work as a computer programmer for the Navy Department in  
Washington, D. C. Please let me know what you think of what I saw.

Yours truly,
