Objt appeared to stand still, speed up, rush away, change brightness, flash and flicker and to disappear and reappear. General position of objt did not change fm E.				11. COMMENTS Characteristics of objt indicates that it was probably some light source distorted by atmosphere. Duration of sighting and fact that witnesses have seen it on an other occasions tends to support this conclusion.

We (several of us) have seen this object quite a few times. I am a licensed pilot (ASEL-1460256) and am familiar w/ beacon, anti-collision lights, etc and feel that this is not the case. Also, because of the stationary position it is not an aircraft in my estimate. Sometimes the object is a little north of East, ^(60°) sometimes a little farther to the south. (110-120°). My wife and I have seen it only once (maybe not the same one) in the day time driving into Gallup, N. Mexico. This time a definite round shape was obvious.

The presence of this object was not "suggested" to me. When I saw it first I was alone and called for a witness.

Mr. [REDACTED] told the class at school of this U. F. O. he had been watching. One night I went to his apartment to look at some planets through the telescope and also in hopes of seeing the U. F. O. All at once between 9:00 & 9:30 P.M. it popped in the sky, looking to be over Gallup or Albuquerque. He, Mr. [REDACTED] and I turned the telescope on it. Through the telescope you could see it changing colors, and it had a purple mist surrounding it. It was the shape of an hour glass with rounded corners and filled out a bit. It was revolving quickly. Mr. [REDACTED] went in his apartment. Once as the object got out of focus and I watched it, it just popped out of the sky. Then all at once about 3 min. later it popped back in a little bit ~~but~~ lower than when it left.
