BRIEF SUMMARY OF SIGHTING:

CIRVIS report of object observed just after ECHO I passed. Object was extremely bright with a long and bright tail visible through strato cumulus clouds. Object observed at 20 deg elevation travelling paralell to horizon gradually downward and disappearing at an elevation of 5 degrees. Traveled through a 90 degree arc of azimuth. Duration 6-7 seconds.

EVALUATION: CASE CATEGORY: Astro (Meteor)

CONCLUSION:

Color not given, other than the object was bright and had a long tail. There is noting to indicate that this was anything other than a meteor sighting.
