[REDACTED] and I were walking home from a bowling alley some distance from home. We were on merced ave when we decided to stop for a rest. We noticed a bright star in the distance, a few seconds later we noticed that the object which we thought was a star was moving toward us very slowly. We thought it was just an ordinary plane until we could see its diamond shape. There were four red lights and two oblong white lights on the bottom, a slight dome-like appearance on top.

The object moved over our heads and appeared to gain speed slightly. At first we heard no sound, I turned off my transistor radio and we could

hear a very low hum, like that of an electric generator. The ~~sound~~ sound was steady and unbroken, it kept the same low pitch. After the object went out of sight we discussed the matter, and decided to report it.

Dear Sir:

I, on the behalf of my two friends & myself,
am writing this letter to report what we believe
to be an un-identified flying object.

This object was sighted over the city
of La Puente, California at about 12 P.M. on
the evening of Sat. 17, of March, 1962.

The object was at first thought
to be a star, but after we had proceeded to watch
it, we heard a low hum, quite bass in tone!
When we heard this hum, we observed
that this object was approaching our position
at a slow, steady pace. When the object
drew closer, we saw it was not one light,
but an object roughly the shape of a diamond
with lights in dyname positions. These
lights were steady, and never blinked
while we were watching it. As it passed
overhead, the sound from this object was so
slight that it was not noticeable to one
not listening for it. The lights were very

50 & 75 M.P.H. The altitude at 3 to 5 hundred feet.

From the time we first noticed the object, until
it passed from sight, about $4\frac{1}{2}$ minutes. The
heading we judged to be roughly N.E.

The shape was not very distinct,

April 4th 1962

My two companions and I were walking along Lerced St., when we stopped to rest. While sitting on the curb, we noticed what we thought to be a very bright star. We sat looking at it for about two(2) minutes. At this time the object was seen to move (While on the curb, we watched the object through the branches of a group of trees across the street; the motion noticed was in relation to these trees).

We at first thought the object was an aircraft of some kind, but we noticed the object was moving very slow. The object moved toward us. It was then that we heard the sound from the object. The sound from the object was at no time very loud. The sound was bass in tone, being like sound of an electrical transformer. There was no detectible oscillation in this tone.

When the object came closer, we noticed that it was not a solid light as we first thought. The lighting was composed of separate red, and white lights. As the object came overhead, we could see four(4) red, and two(2) white lights. (see sketch, next page)

The lights: (bottom)

Then it was directly overhead we could see a rough outline of the object. (See sketch #2)

The object passed overhead then headed towards the San Gabriel Mts. on a course of roughly N.W.E. (This is an estimation.) The object seemed to gain altitude on a shallow angle and passed from sight.

The total time elapsed was about five(5) minutes and thirty(30) seconds.

The time of the sighting was between 11:45 and 12:15, on the evening of March 13, 1962.

This report is as accurate as I can make it, I hope it will help you. Thank You.
