19. IF there was MORE THAN ONE object, then how many were there? ONLY ONE

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

20. Draw a picture that will show the motion that the object or objects made. Place on "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

21. How large did the object appear to you as compared to an object with which you are familiar?

AT LEAST THE SIZE OF C-124 OR A BIT LARGER WHEN I FIRST SAW IT.

22. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

ROUGH GUESS: $\frac{1}{3}$

23. Did the object disappear while you were watching it? If so, how?

IT DISAPPEARED FROM SIGHT AS IT SPED WESTWARD INTO THE NIGHT, AT A FASTER SPEED THAN I HAVE EVER SEEN A PLANE TRAVEL.

24. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

When first sighted it looked like cigar shaped fuselage size of C-124 it was seen hovering opposite Reessler or moving towards me very slow because this is where I got my first long look - 1-2 seconds. Then it moved, that is, flew straight in front of me it seemed to become larger but must have been farther away. There were some channel lights or ship lights, but I felt directly south of me, I estimated between 3 to 5 miles away. Object seemed to pass directly in front of me & lights closer to light than to me. Just as I called it off to object as my companions, it sped up & streaked west & disappeared into cloud formation between Newport & the shore.

25. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- ☒ c. Outdoors
- d. In an airplane (type)

- c. In open countryside?
- ☒ d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

27. What were you doing at the time you saw the object, and how did you happen to notice it?

I WAS FISHING OFF PIER WHEN I HAPPENED TO GLANCE TO MY LEFT (EAST)
I NOTICED WHAT I FIRST TOOK TO BE A LARGE PLANE FLYING SLOWLY TOWARDS ME
OVER THE WATER. THIS IS COMMON HERE EXCEPT THAT THIS "PLANE" MADE ABSOLUTELY
NO NOISE. IT SEEMED NEAR ENOUGH TO BE HEARD DISTINCTLY AS OTHER "PLANES"
WOULD BE UNDER SAME CONDITIONS BUT IT WAS SILENT. THIS CAUSED ME
TO CALL MY COMPANIONS ATTENTION TO IT.

28. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

28.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|

- b. From horizon 3-5 degrees.

31.2 When it disappeared:

- a. From true North _____ degrees.
- b. From horizon 3-5 degrees.

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

(Circle One) ☒ Yes No

37.1 IF you answered NO, then when, where, and under what circumstances did you see other ones?

38. In your opinion what do you think the object was and what might have caused it?

IN MY OPINION IT WAS A FLYING OBJECT OF SOME KIND WHICH MADE NO NOISE YET FLEW ACROSS MY LINE OF VISION AT INCREDIBLE SPEED, ANY MOTOR DRIVEN OR JET PLANE I HAVE EVER SEEN AT THAT DISTANCE MADE SOME SOUND, AT SOME TIME WHILE BEING OBSERVED THIS OBJECT MADE NO SOUND, AND IN ORDER TO KEEP IT IN SIGHT I HAD TO TURN MY HEAD FROM LEFT TO RIGHT VERY QUICKLY, BECAUSE IT WENT SO FAST.

39. Do you think you can estimate the speed of the object?

(Circle One)

Yes

(No)

BUT IT TOOK 5 TO 6 SECONDS TO GO FROM HORIZON TO HORIZON AS ABOUT

IF you answered YES, then what speed would you estimate?

The cigar or fuselage shape of the object is not unusual. The fact that it made no noise also can be explained either because of its distance, direction of the wind at the time (don't know) or the fact that it was flying over water might have prevented me from hearing it.

But there is one amazing thing that I cannot explain & that is the incredible speed with which it flew. I have never seen anything go that fast. My companions also agree on this. If it had been a jet flying close enough to go practically from horizon to horizon in that short a time, it not only would certainly be

heard but would have been close enough
for more detailed observation. Certainly the
lights at least would have been plainer &
easier to describe as to number, shape, etc.

The Object was called to my attention by my fishing companions. I observed the object when it was directly south of me and continued to observe it until it disappeared in the thunderstorms to the west. The speed of the object seemed to me phenomenal. I have never observed anything moving that fast before. That and the eerie appearance of it were the outstanding features of the

object.

I WAS SITTING ON THE PIER FISHING WHEN MY MOTHER SAID "WHAT'S THAT?" I LOOKED UP JUST IN TIME TO SEE WHAT APPEARED TO BE A LARGE GLOWING OBJECT FLYING VERY FAST AND MAKING NO SOUND AT ALL. I FOLLOWED THE OBJECT UNTIL IT DISAPPEARED INTO THE CLOUDS TO THE WEST.

ARABIC CHART

- (f) 30,000' - 320 degrees - 28 Kts.
- (g) 50,000' - 330 degrees - 33 Kts.
- (3) Ceiling - None.
- (4) Visibility - Unlimited.
- (5) Amount of cloud coverage - 1/10 to 2/10 in Northeast to West quadrant.
- (6) Thunderstorms in Northwest and West quadrants.
- (7) Temperature gradient - 3.2 degrees F. @ 1,000'.

h. At the time the observation was made considerable thunderstorm activity in the New Orleans area was reported by the Base weather station. Lightning from cloud to cloud to ground was reported.

i. None.

j. One (1) T-29 aircraft from Keesler AFB was airborne in the local area at time of observation. Exact location unknown.

k. The observer reported an estimated speed that, in the opinion of the reporting officer, is far beyond the capability of the human eye to see. The object was visible for five to seven seconds, not sufficient time, without prior warning, to give a comprehensive description. This observation is considered improbable and due to optical illusions brought about by the thunder storms, lightning and reflection off the existing cloud bank on the horizon in the direction of the sighting.

l. None.

1992

A large grid of 100 small grayscale images, arranged in 10 rows and 10 columns. Each image shows a different texture or pattern, ranging from smooth gradients to complex, noisy structures. The images appear to be generated by a model, possibly for a denoising or inpainting task, as they show varying degrees of detail and noise. The first few images in each row show more distinct patterns, while the later ones become increasingly noisy and less structured.

This figure displays a 10x10 grid of 100 small grayscale images, arranged in 10 rows and 10 columns. Each image shows a handwritten digit '4' formed by a cluster of black pixels on a light gray background. The images are arranged in a grid where the digit '4' grows progressively from the top-left corner towards the bottom-right corner, illustrating a sequence of states in a process, likely related to the '4' digit recognition task mentioned in the text.

This image shows a full page of blank graph paper. The grid consists of small squares formed by thin, light gray lines. There are no margins, text, or other markings on the page.
