To Whom It May Concern:

Dear Sir:

Please forward this to the proper authority.

You may take me for a nut. But consider this for what it's worth.

I think I have seen a "flying saucer" or some other unidentified flying object. I know it wasn't a satellite because it changed course and it wasn't a plane because of its speed and 90 degree change in course.

Here is the way I saw it. I live on a farm about 2½ miles Northeast of town (Fairfield, Iowa). I was walking through the field at 6:45 P.M. (September 19th). It was just dark enough that I could see where I was walking. I looked up to the East and saw this bright light moving from East-South-East to Southwest fairly fast like a fast jet plane. I stopped to watch and listen, but couldn't hear any noise. I thought it was close enough to hear. I looked at my watch and it was 6:45 P.M. I stood and watched and when it got due South of me it turned 90 degrees and went straight up on away from me at a great rate of speed until it got so dim I couldn't see it anymore (it was 6:49 P.M.). The weather was clear not a cloud in the sky. There were a few stars out.

I feel sincere about this and as a citizen it is my duty to report it.

Sincerely,

Fairfield, Iowa
