Reference: EMBTELS 109 and 111

Have examined two pieces of material found near latitude 13 degrees 35 minutes north, longitude 2 degrees 38 minutes west reported in my message from Abidjan 10 October reference unknown and Embassy Ouagadougou messages 109 and 111 to SECSTATE.

Both pieces suggest explosion, have been subjected to intense heat and burning. Apparently not an aircraft. Appears to be cowl from rocket booster of US design. Unit previously referred to as exhaust pipe resemble a guidance control rocket. Pieces were found 40 kilometers apart. Ambassador contacting Foreign Office to gain possession of material and if successful I will forward soonest. Photos will be pouched as soon as processed.
