10. BRIEF SUMMARY OF SIGHTING Sighting in morn by 13 yr old boy of obj about 100 ft in diameter, round smooth or oval shape at alt of 100-160 yds exhibiting speeds of 100 mph to 1,000 mph. Direction of flight to North. Maneuvers included standing still, straight up, and side-ways. Color was red like a ball of flame. No sound. Duration was 1 1/2 mins coming down (approaching) 27 secs hovering & three secs going away. Sky conditions fog.				11. COMMENTS Duration indicates aircraft sighting. Ball of flame indicates jet w/afterburner or possible meteor; however, sighting at dawn & brightness not indicated. No mention of how time figured. 27 sec hovering not consistent with a/c analysis. Alt of 100 yd extremely low. Detail should have been noted during hovering. Sound should have been audible at such low level. Conflicting data- unreliable rpt.	

Sir,

I am enclosing a report,
from a friend who said
that he saw a flying saucer.

Note that it was a foggy
morning

Date: Dec. 6, 1962

Remarks: A lot of people think I'm batty
but I don't care because I really did see it.
I think it came from Venus. I'm very inter-
ested in science so so I'm not a crack pot.
looks like:

If you ever saw the movie "The Day
The Earth Stood Still" that's what the Flying
Saucer looked like. Reliavated
