10. BRIEF SUMMARY OF SIGHTING Series of blue flashes spaced about 3 seconds apart observed to the right of overhead moving toward 3'o'clock and the right extrmeity of the horizon. About 15 or 20 flashes. Flashes similar to a flashbulb. No sound. Stars visible with scattered clouds. Flashes evenly spaced.			11. COMMENTS Check with WP Operations revealed that a T-33 from Minneapolis with Home Base at Maxwell landed at 2228 (0328Z) and was over Xenia at the time in a normal landing pattern. No a/c was noted by the witness. Since the witness did not observe any other object it is assumed that this a/c is the cause of the report.		

32. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it.

33. In the following larger sketch place an "A" at the position the object was when you *first* saw it, and a "B" at its position when you *last* saw it. Refer to smaller sketch as an example of how to complete the larger sketch.

39. Do you think you can estimate the speed of the object?

(Circle One)

No

IF you answered YES, then what speed would you estimate? 109,000 MPH.

40. Do you think you can estimate how far away from you the object was?

UFO Sighting phoned in at 1300 on 12 June 1963

Time/Date of sighting:

2210 local 9 June 1963

Location:

West edge of Xenia (Lanewood Housing Development)

Xenia, Ohio

Observer:

Mr.

ASI 23177

Observer was lying on a chaise lounge in the backyard of his home (his feet toward the West) and looking straight up when he noticed a series of blue flashes spaced about every three seconds. Assuming that right overhead was the center of a clock, the blue flashes moved progressively to the right toward the position of three o'clock. The flashing crossed the heavens from the center point (straight overhead) to the right extremity of the horizon (that is to the North) in 45 to 60 seconds. About 15 to 20 flashes.

Observer believes bright blue color rules out meteor and a/c. Flash was similar to that of flashbulb.

Flashing seemed to be high in sky and moved at a speed that was "phenomenal." No sound of a/c.

WX: Stars could be seen, scattered clouds.
