5. PHOTOS ☐ Yes ☒ No		6. SOURCE military			
7. LENGTH OF OBSERVATION 15 - 20 seconds		8. NUMBER OF OBJECTS one		9. COURSE SW	
10. BRIEF SUMMARY OF SIGHTING Bright white light moving at great speed from 095 deg azimuth to SW at an unknown altitude. No flash. Course erratic. Sky overcast. Object observed through clouds. Also observed at second location. The case of 24 January, 1964 in Shark River, New Jersey could have been a bright meteor seen through the overcast. This one would have been interesting to follow up a little bit, especially since it was sighted from two different geographical locations.				11. COMMENTS Insufficient data for analysis. Object observed through overcast. Sound not reported and object appears to be a light and not burning. Possible a/c with landing light, however insufficient data for evaluation.
