Dear Mr. [REDACTED]

This is in response to your recent letter requesting information on the subject of unidentified flying objects.

This Office, which has the primary responsibility for releasing information concerning the subject of unidentified flying objects, does not have a clerical staff of sufficient size to permit our entering into prolonged discussions with individuals other than bona fide scientific researchers.

It is recommended that you obtain a copy of "The World of Flying Saucers" by Menzel and Boyd. This book has recently been published by Doubleday. It may help to clarify some of your queries on this subject.

Dear Mr. [REDACTED]:

The Office of the President has asked the Air Force to reply to your letter.

There is no truth to allegations that the Air Force withholds or otherwise censors information vital to public understanding or evaluation of the nature of unidentified flying objects (UFO). In some instances the names of individuals are withheld to protect them from the curious. It is sometimes necessary to withhold information concerning investigative procedures which are also used in the evaluation of other intelligence information to prevent compromise.

As of this date, no unidentified aerial object has given any indication of threat to the national security; there has been no evidence submitted to or discovered by the Air Force that unidentified sightings represented technological developments or principles beyond the range of our present day scientific knowledge; and finally, there has been nothing in the way of evidence or other data to indicate that these unidentified sightings were extra-terrestrial vehicles under intelligent control.

Your interest in Air Force activities is appreciated.

Gentlemen:

I am really surprised at
the Armed Services especially the
Air Force of not admitting the truth
to the people that "Flying Saucers
are real", "credible", "The Real McCoy".
Gentlemen I would like to know that
the people of the United States are well
educated in reading Science Fiction stories
the good kind, the kind with morals to
them.

If now released it to the public
they would understand because this
is not October 28, 1938, this is
the Atomic age, the age and power
of the modern day, the age of science, the age
we are advanced we have not
reached the limits of discovery.
The people must know about it, they
must not be kept in the dark.

Because the world isn't filled
with scared people
We'll face the unknown.
The way the air force has
been acting about the 60's
Ideologically like communists.
They make cracks about her
being sold out when
they should.

Start thinking like men, instead
of scared mice, yellow, cheap
not caring for Americas welfare
by doing this your not.

Start being Patriots of democracy
instead of Patriots of Satany.
and I disown hierarchy and so on

Start thinking of America
as a smart country educated
to know powers
you must tell the people
the truth.
