~~REDACTED~~
NEWARK N. J.

U. S. Air Force;

N/A MAY 1964

Sirs:

I would like to tell you about a
incident I saw a little over two years
ago. It has to do with the so called
flying saucers. Maybe my eyes deceived
me, but anyhow here is what I saw. It
was in May 1964 I cannot recall the date
but I believe it was early in the month.
I got off a PATH Train at Penn Station
Newark N. J. and was walking up Commerce
St, on my way to Broad St. where I was
going to catch a bus on my way home.
I stopped for a light at the Highway
(over)

② Near the N.J. State Bldg. I happened to glance back toward the Station, while waiting for the traffic light to change. When I noticed a light reflection coming from a object in the sky in the direction of Penn Station, but not over it. being further Eastward. maybe the object was 1,000 feet higher 1500 ft high in the sky. I thought it might be a airplane as that is where the Planes sometimes fly landing at New York Airport, but this object was stationary, Maybe I figured it was a Helicopter, but I saw no whirlybird. Just a round metallic object, silvery or stainless steel colored, with a little ~~elevation~~ elevation in the center, where the housing with the controls might be (next paper)

③ When I saw it first, it was angled at about 45° angle, and I spotted it, because it was reflecting sunlight, I watched it for a few minutes then it straightened out to be edge on, and I could just about see the edges. ~~after~~ after another 2 or 3 minutes, it took off, not straight up but at a 70° or 80° angle and was gone from sight. Luckily it made no sound I could hear or no vapor trail. I am convinced I saw a flying saucer. Tho some Airline official or an authority on aircraft, may say I saw an ordinary aircraft stacked up waiting for landing, but I never heard of a ~~commercial~~ commercial airplane that can hover.

(over)

(4) I am convinced that there are flying saucers. either from our Planet, being secret or experimental planes, being tested by our own government or a foreign Govt. or from another Planet. If these new aircraft are our own, ~~that we have~~ then we have nothing to fear from them. If on the other hand they are from a foreign power or another Planet. Then it is a job for your Boys to keep right on top of them, I hope you dont think I am a Kook or Nut, I am just telling you what I saw two years ago. I ~~know~~ ^{know} ones eyes can deceive you. I am just telling you what I saw.

yours Sincerely
