3 March 1965

Dear Mr. [REDACTED]

This is in reply to your recent letter in which you related an observation of an object which you could not identify.

From the information which you submitted, the duration, speed, and arc distance would indicate a meteor observation; however, the description including the color change is not consistent with this analysis. Your statement that the object seemed like it was going to ram you is not in accordance with the flight path from northeast ending in the south unless there was a change in course of the object.

Analysts at the Project Blue Book investigation office are unable to determine the cause of your observation. However, you can be assured that no unusual object or phenomena was observed in conjunction with the lunar eclipse on 18 December 1964.

Sincerely,

JOHN P. SPAULDING

REPLY TO
ATTN OF: TDEW

SUBJECT: UFO Sighting (18 Dec 64, Cudahy, Wisconsin)

1 Feb 65

TO: Hq USAF SAFOI PB (Mr. [REDACTED])
Wash D C 20330

1. Reference the attached letter from [REDACTED] reporting an unidentified flying object observed on 18 Dec 64 over Cudahy, Wisconsin.
2. The Lunar eclipse of 18 Dec 64 was observed by many astronomers, both professional and amateur, continuous photographs were made. No objects were reported from these observations.
3. From the information which [REDACTED] presented to us it seems that the duration, speed and arc distance traveled would indicate a meteor observation, however, the description including color change is not consistent with this analysis. The statement that the objects seemed like it was going to ram him is not in accord with the flight path from northeast ending in the south, unless there was a change in course of the reported object.
4. Analysts are unable to determine the cause of his observation. However, we can assure Leslie that no unusual object or phenomena was observed in conjunction with the lunar eclipse.

January 2, 1965

Gusabry, Wisconsin

Dear Jiri

Even though I'm only 11 years old, I don't see things that aren't there. I might as well get right to the point, I think I saw a Flying Saucer. I told only my best friend who I knew would believe me. Below are some of the details.

- 1) I saw the object December 13, 1964 in the evening.
- 2) It was during an eclipse of the moon.
- 3) The object was a sphere.
- 4) The color of the object changed.
- 5) The speed was very fast.
- 6) I saw it come from the eclipsed part of the moon.
- 7) I saw the object for about 7 seconds.
- 8) It started its path in the north east & ended its path in the south.

And I like to say, it definitely couldn't have been a meteor, comet, star, asteroid, weather, balloon, plane, bird, satellite, why couldn't it have been these things I mentioned because it didn't look like any of them.

turn over.

If you want to contact me for more information
my address is enclosed.

Yours very truthfully (

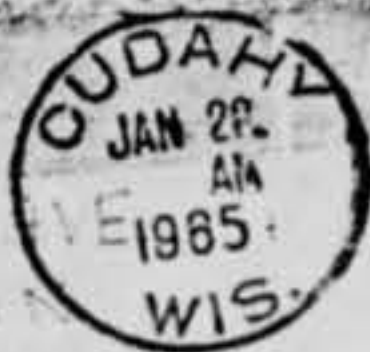

~~XXXXXXXXXX~~

P.S.

The object seemed like it
was going to ram me.
