Dont understand

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

This object left no exhaust trail.

The object looked bright.

The object looked round.

II. The aircraft was not of a type

known to the military or naval authorities.

The aircraft was not of a type

34. Date you completed this questionnaire:

17 February 1965  
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

21. From what I saw, this object seemed to be very high up.

It looked as high, or higher, than an airplane would go.

The objects were small, much smaller than an airplane would be. But the brightness made the object noticeable.

The brightness of the object could have been caused by the sun reflecting against it. But it is possible, also,

that the object gave off its own light. These objects were directly above me. I had to look up in order to

see them. 29. I am not sure how many objects there were.

I think there were about ten at the most. The way they flew was strange. They would stop in mid air at times.

When I first saw these objects, they didn't want to leave the area they were in, but still they were moving. They

would turn around and go back and forth, but each one had a path of its own. After a while, these objects

started to leave the area, all heading in the same direction.

I have never seen anything like these objects before.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? See 35  
 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

*I don't remember  
 how they were arranged*

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? (Circle One)
