At 1600 hours, 2 Mar 65, TDEW(UFO) received a call from Mr Porter, Base Information Office, W-P AFB, Ohio. A Mrs St [redacted] Drive, Dayton, Ohio (Dayton View), phone [redacted] reported that at about 0445, 2 Mar 65 she and her son observed a dome shaped object, cone shaped at the bottom, five legs came out of the bottom of it. Only made noise when it came over. When it hovered, no sound. Looked like it was coming out to the base (W=P). Her son was the first to see the object, came in and told his mother about it, she went out to see but did not see any object. She didn't believe that he had seen anything. Her son came in again and said he saw it, this time she went out and saw it also. It made about eleven passes. Mr Porters said that Mrs [redacted] seemed reluctant to call the Base as she was afraid people would think she was crazy. She appeared to be a rational woman.

On 3 March 1965, TSgt Moody called Mr [redacted] at her home. Mrs [redacted] son, [redacted], first saw object at 0445. Mrs [redacted] saw it at about 0515 to 0530, 2 Mar 65. With description that her son gave her she thought perhaps it was a spotlight on the clouds. [redacted] said the object circled the area until about 0630, disappeared with daybreak. Looked like it was going towards the field. It went partly overhead and then towards the field and came around and dipped, the lights did go off when it dipped, looked like it was circling the city of Dayton, according to [redacted]. Mrs [redacted] saw it come across the sky, quite an arch, did hear it come in, looked like it was right above tree top level. Thought at first it was an aircraft, hovered in placed, lights went out, [redacted] sounded like a jet when it reappeared. When it again hovered there was no sound. One bright light. About the same size as an aircraft with no blinking lights at all. The light was the only thing observed. She said it was something you heard about but did not expect to see something like it.

Mrs [redacted] said that three boys saw it, including her son, around 0445 from a boys front yard looking towards Wright-Patterson. They said that when it got near Wright-Patterson it did dip and then went overhead. At one time it appeared to have five lights or windows. Appeared to be a big bubble. Mrs [redacted] called one of the boys mother and she relayed what her boy had seen. The description matched what Mrs [redacted] had observed. The boys observed it from a yard on Oxford Drive, in Dayton View. In that area the people have steep driveways and you can see the layout of the city of Dayton.

Mrs [redacted]'s husband, [redacted] got on the phone. He wanted to tell us that he didn't think his wife and kids were sending anybody on a wild goose chase. His wife was excited when he came home from work and so was his son. At first he thought perhaps it was spotlights on clouds. He did not see it but believes that something did occur. He just wanted to know if there were any other reports that could tell them if it was an aircraft or something of that sort. We informed him that reports of this nature were not uncommon and not unusual. We informed them that we would callback at 1600 hours to talk to [redacted].

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I saw nothing other than this strange light which seemed to glide across the sky and disappear suddenly. Can think of nothing except star or light or plane that could give same appearance.

A check was made with Sgt Young, at Base Ops, there were no helo flights out of Wright-Patterson. A B-52 took-off at 0420, a C-54 took-off at 0607, a C-31 took-off at 0629.

The weather data on 2 Mar at 0357 at 9,000 ft was overcast, temperature 44°, seven mile visibility, light rain showers, wind from 020° at 2 knots, WX at 0456 local was same, WX at 0510 local was 8,000 overcast, WX at 0550 was 3,000 overcast.

Sgt Moody spoke with Lt Russ Guerra, phone 223-1231 of the City of Dayton Police Department. Lt Guerra was up at 0500 hours on 2 Mar 65 and did not observe anything unusual. He traveled in Salem Avenue looking towards town at approximately 0545 and did not see anything unusual. At 0600 hours until 0623 he was at the corner of Needmore and Rt 25 waiting for his helicopter. He was constantly checking the sky for weather. He saw nothing in the sky, not any stars either. He said that if anybody saw it the Dayton Tower might have.

We again placed a call to the City of Dayton Police Department and spoke with the Chief's office, negative reply after checking around, included checking with telephone operators who might have taken reports.

Checked with Fire Department, no runs were made during that time.

Check was made with Al Butterfield and his helo's. He wasn't up at that hour nor were his helo's.

The following information was obtained from Mr Seizer, FAA at W-P AFB, extension 70242. There was a Rebo-45, practice approaches (instrument) using Runway 5 at Patterson Field. This was a KC-135, it made 5 landings, 2 not, altogether it made seven distinct passes over Dayton, between 0433 and 0540 hours.

Mrs [REDACTED] was informed of the above at 1500 hours, 3 Mar 65.

Conclusion: Mrs [REDACTED] and her son observed the KC-135 making its practice landings and the C-54 and C-31 accounts for the latter observations.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

I was not aware that the ^{moving} light, which I spotted at 10:02 p.m. March 30, was of interest to the Air Force, until I happened to see an account in the paper about a UFO near Lewisburg. The time the woman reported seeing the object rang a bell and after checking with my wife to verify the day & time I called WPAFB on Sat, Apr 3.

The object or light had appeared strange to me because I heard no sound in its direction. There were, as I recall, planes in the area but none close enough to be confused with this lighted object.

I saw no shape, just the light moving in a Southwesterly direction for a few seconds then disappearing quickly. That was about where my window was.

*I've read that about in the paper about the
Leviching, I sighting, thinks he saw some
thing as she did and thought his information
might help us. Last night 3. Mar I about 930 pm
he saw a white light in sky, was facing East. First
thought it was an arc, it appeared high, about 60°,
appeared to be moving slow, but for its alt it was probably
moving faster than it looked. It traveled uniform,
straight line, SSE, appeared as point of light, distinct
pulsation brightness, passed in the vicinity of Arcturus
more faintly than Spica, faded away. Did not
appear to change direction or speed. Motion
quite similar to satellite except it was yellow-

14. Did the object disappear while you were watching it? If so, how?

Appeared to go in and out of clouds

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

it moved behind:

clouds

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

in front of:

cloud

17. Tell in a few words the following things about the object:

a. Sound

none

b. Color

pink, white and occasionally orange

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

about size of basket ball

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

○ round, no protrusions

20. Do you think you can estimate the speed of the object?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then what speed would you estimate?

faster than an aircraft

21. Do you think you can estimate how far away from you the object was?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then how far away would you say it was?

Very high

22. Where were you located when you saw the object?
(Circle One):

☒ a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

☒ b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

☐ Yes

☐ No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

☒ No

e. Binoculars

Yes

☒ No

b. Sun glasses

Yes

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.
