Unfortunately, this case still remains unknown. Although I feel any further investigation is hopeless, I would suggest that wind direction for that night be established. If from the southwest, it could possibly have been a balloon with a scientific payload, but this seems unlikely.

End of report.

Sincerely,

A handwritten signature in cursive script, appearing to read "Allen".

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

8

Day

3

Month

65

Year

2. Time of day:

7

Hour

40 + - 5 min

Minutes

(Circle One):

A.M.

or

P.M.

3. Time Zone:

(Circle One):

a. Eastern

b. Central

c. Mountain

d. Pacific

e. Other _____

(Circle One):

a. Daylight Saving

b. Standard

4. Where were you when you saw the object?

R.F.D #

Nearest Postal Address

Mt. Airy

City or Town

MD. Fredrick Co.

State or Country

5. How long was object in sight? (Total Duration)

3

Hours

Minutes

Seconds

a. Certain

b. Fairly certain

c. Not very sure

d. Just a guess

5.1 How was time in sight determined?

Estimated

5.2 Was object in sight continuously?

Yes

No

6. What was the condition of the sky?

DAY

a. Bright

b. Cloudy

NIGHT

a. Bright

b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):

a. In front of you

b. In back of you

c. To your right

d. To your left

e. Overhead

f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- ☒ a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- ☒ c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- ☒ b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- ☒ a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- ☒ d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- ☒ a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

Traffic Signals

12. The edges of the object were:

- (Circle One):
- ☒ a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- | | | | |
|---|-----|-------------------------------------|------------|
| a. Appear to stand still at any time? | Yes | No | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes | ☒ No | Don't know |
| c. Break up into parts or explode? | Yes | ☒ No | Don't know |
| d. Give off smoke? | Yes | ☒ No | Don't know |
| e. Change brightness? | Yes | ☒ No | Don't know |
| f. Change shape? | Yes | ☒ No | Don't know |
| g. Flash or flicker? | Yes | ☒ No | Don't know |
| h. Disappear and reappear? | Yes | ☒ No | Don't know |

Not Sure

14. Did the object disappear while you were watching it? If so, how?

no we watched
until out of sight

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what
it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes No Don't Know. IF you answered YES, then tell what
in front of: _____

17. Tell in a few words the following things about the object:

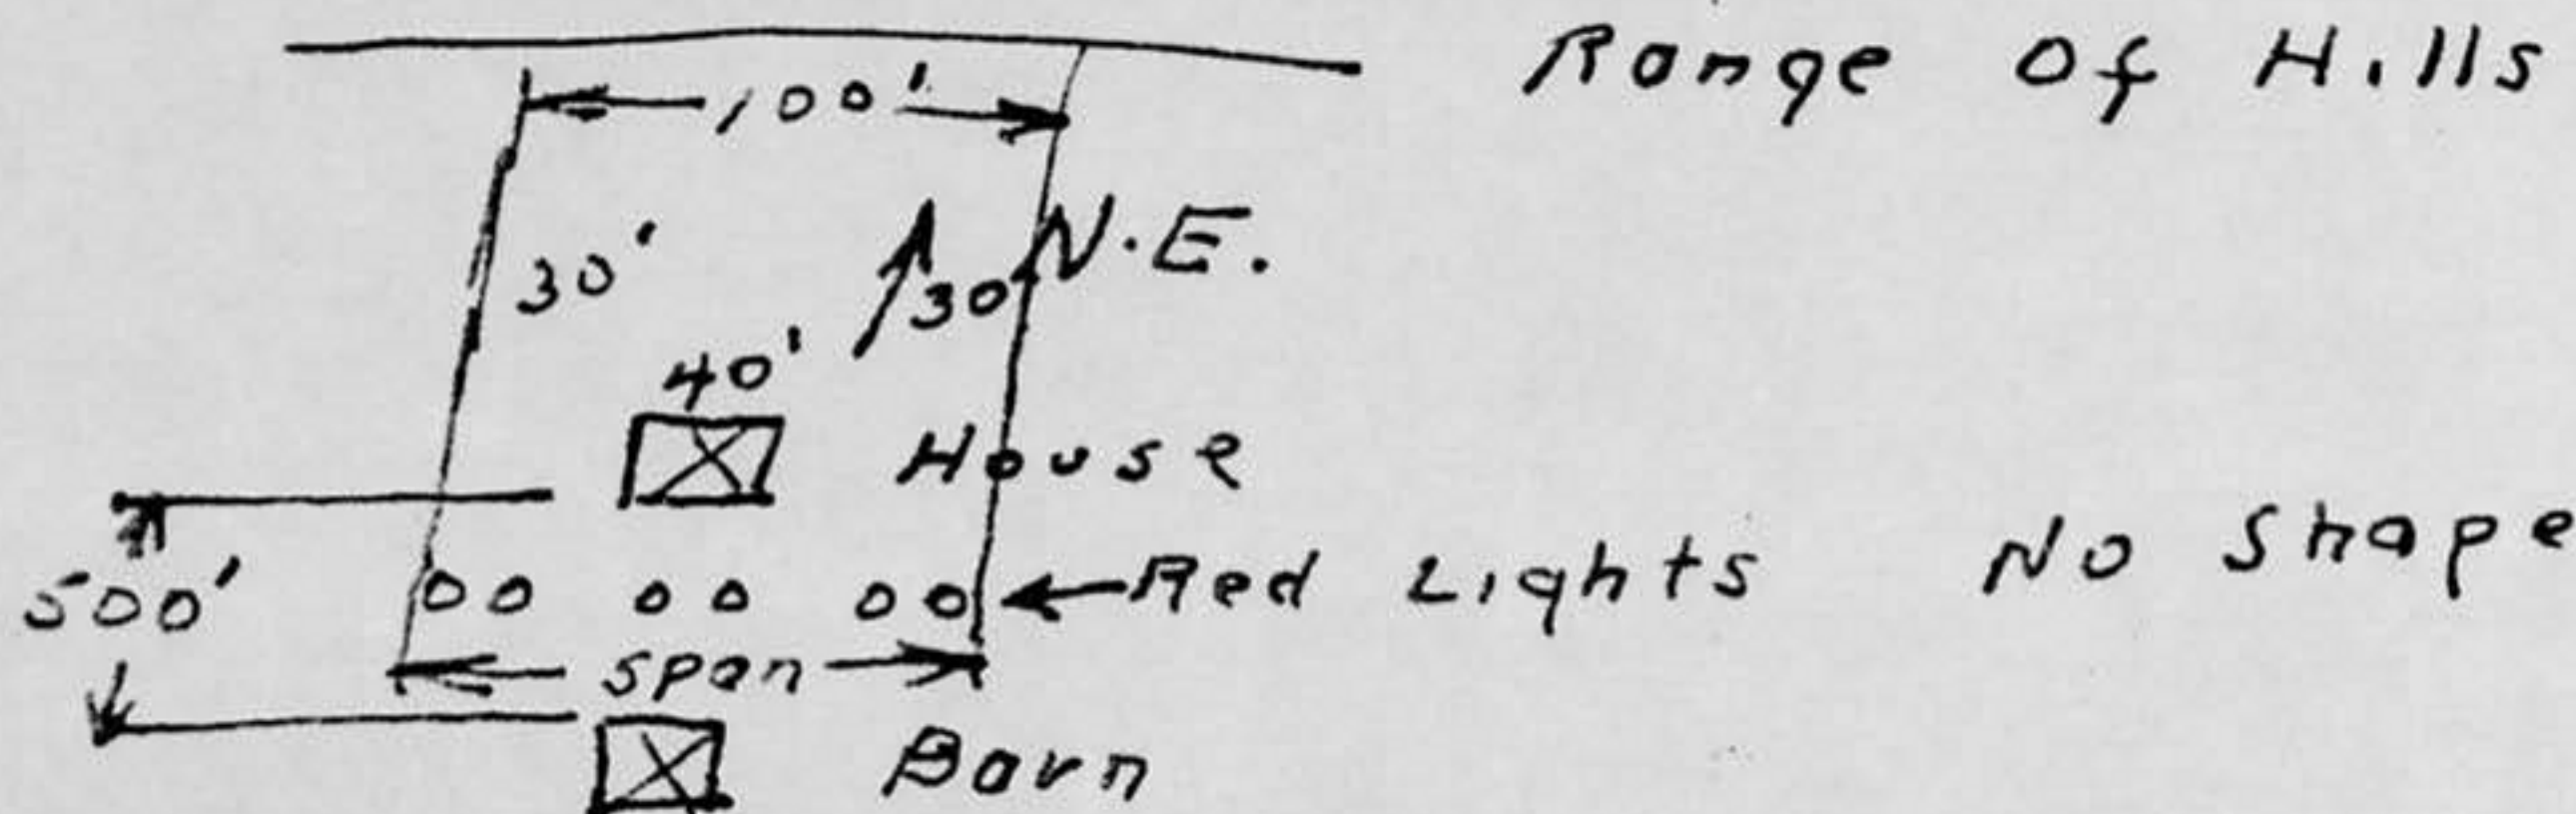

a. Sound None

b. Color _____

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

the match head would probably cover one
light.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then what speed would you estimate? 20 M.P.H.

21. Do you think you can estimate how far away from you the object was?

(Circle One)

☒ Yes

☐ No

IF you answered YES, then how far away would you say it was? 1200 ft.

22. Where were you located when you saw the object?
(Circle One):

a. Inside a building

b. In a car

☒ c. Outdoors

d. In an airplane (type)

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

b. In the residential section of a city?

☒ c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

☒ Yes

☐ No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

☒ No

e. Binoculars

Yes

☒ No

b. Sun glasses

Yes

☒ No

f. Telescope

Yes

☒ No

c. Windshield

Yes

☒ No

g. Theodolite

Yes

☒ No

d. Window glass

Yes

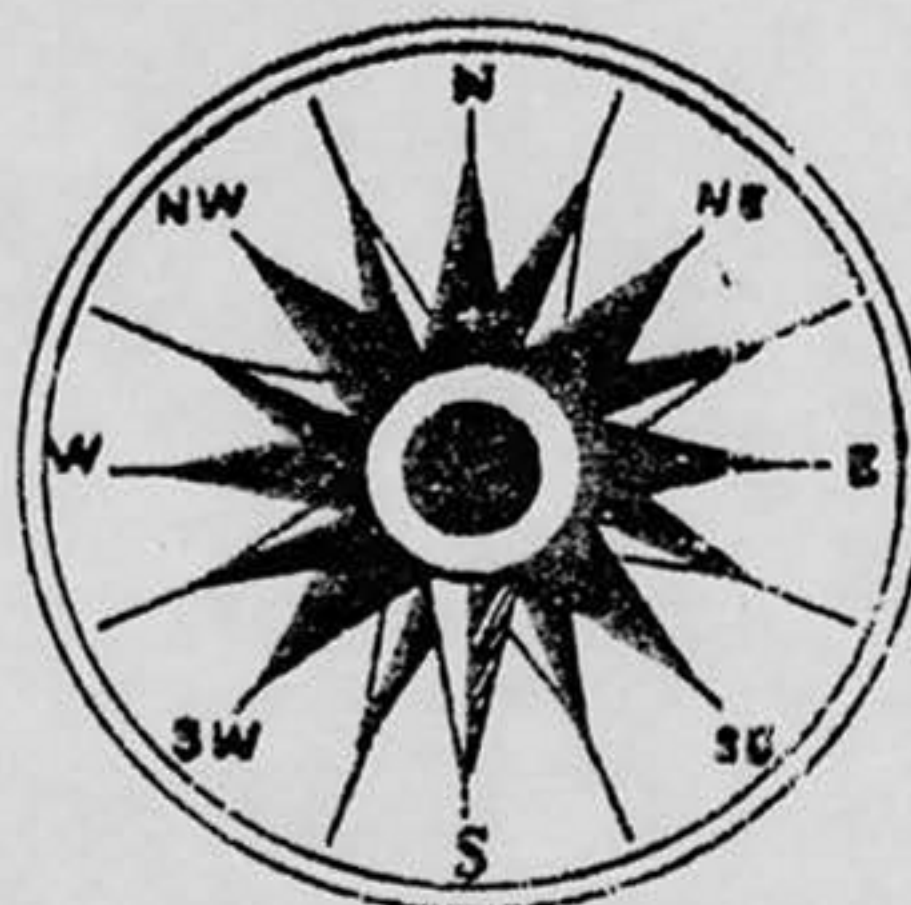

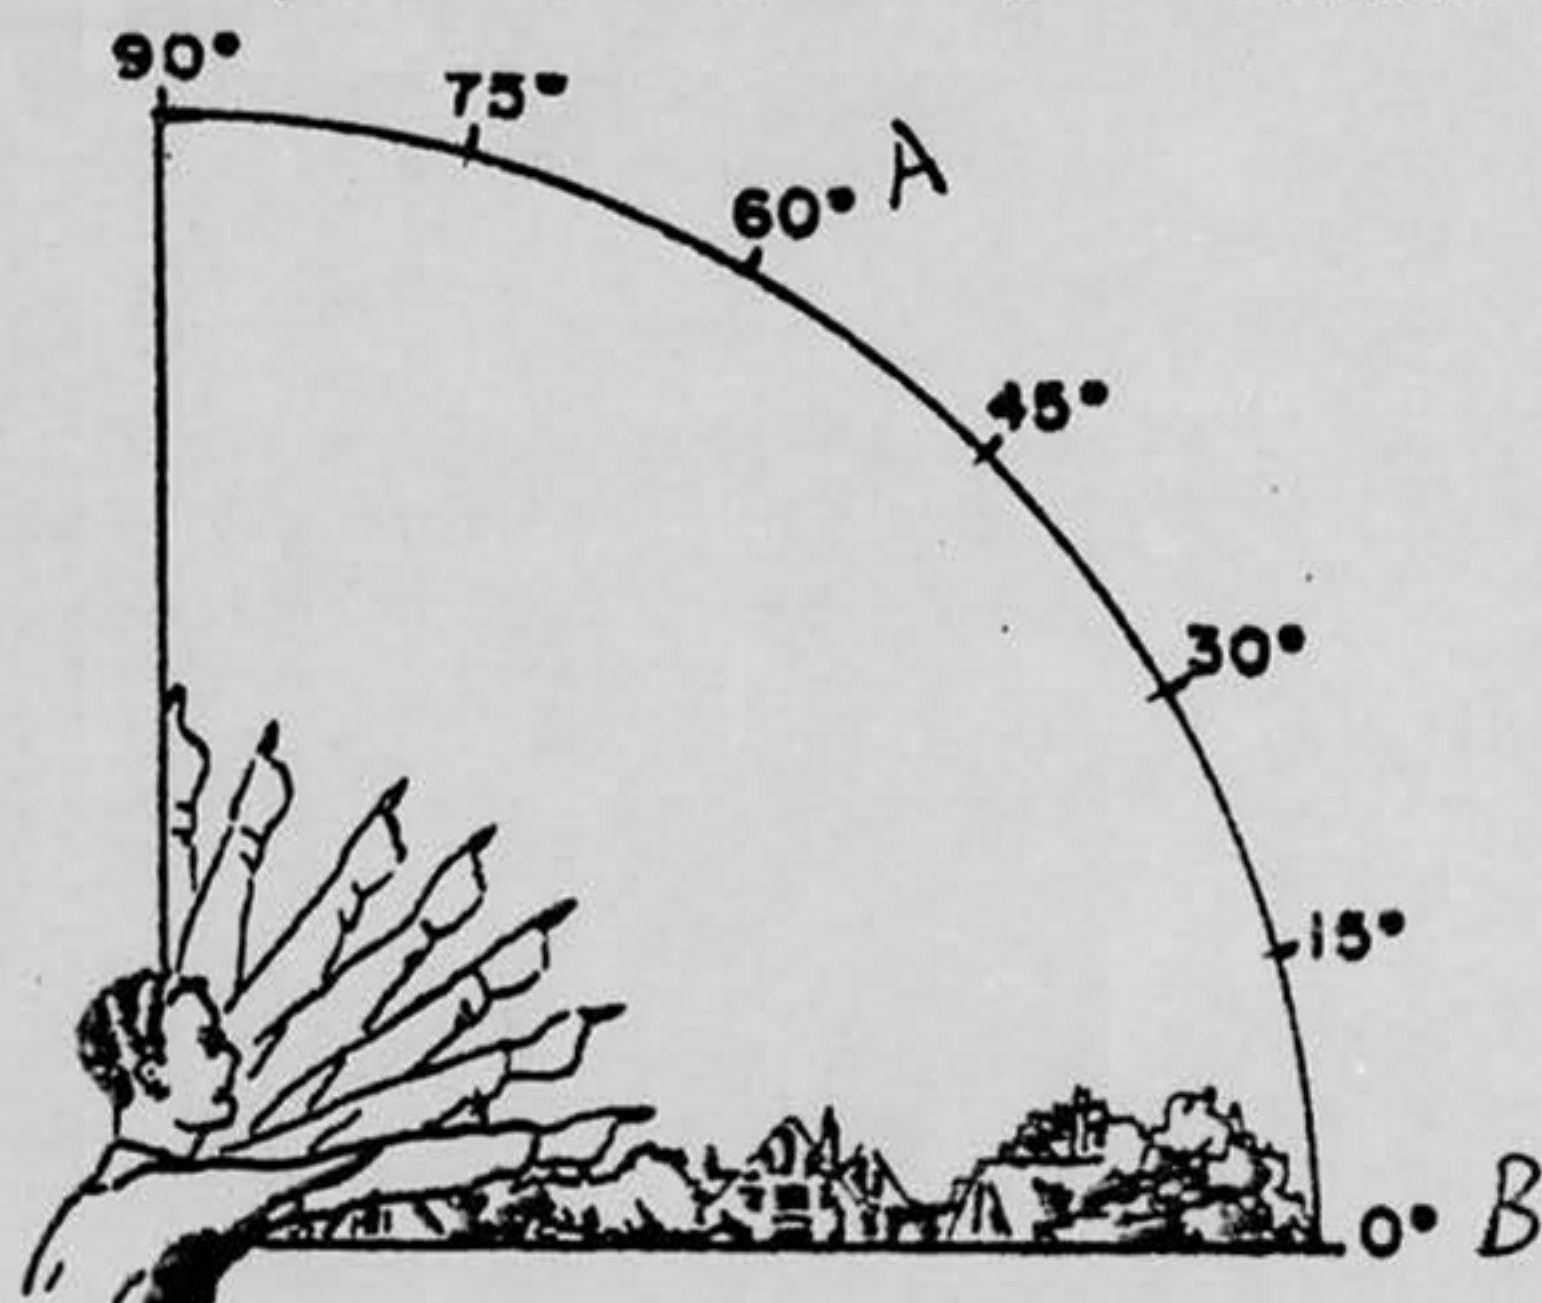

☒ No

h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

I saw no shape but from the symmetrical pattern of red lights it might have been a long winged glider with the speed a balloon might make with no noise

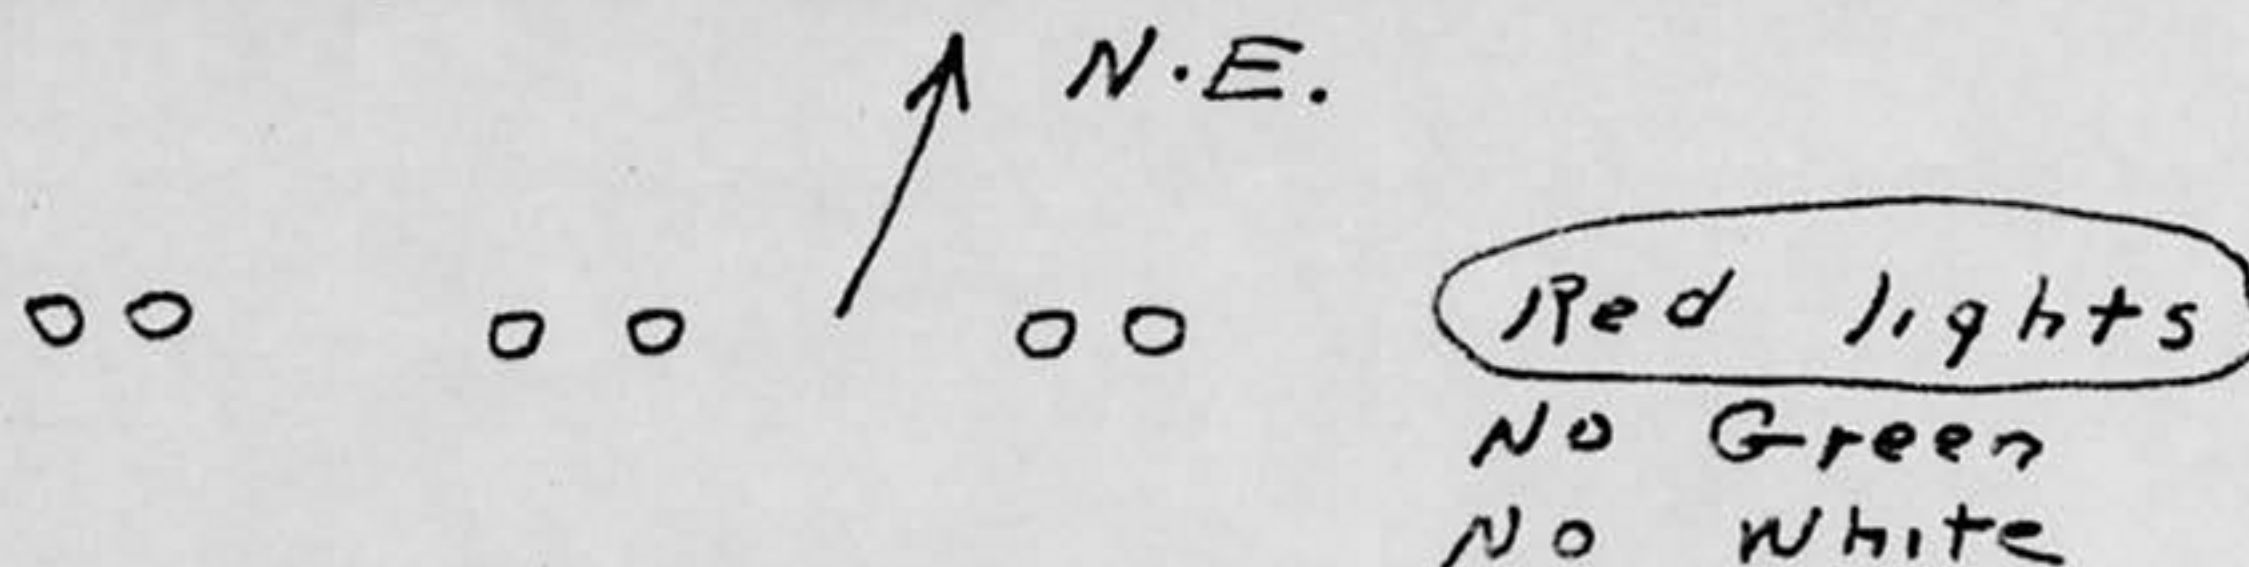

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes

No

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes

No

31.2 Please list their names and addresses:

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

When I came out of barn I noticed these red lights in a ~~distinct~~ pattern just past overhead my son 16 yrs. old was with me. We were both stunned at first to see these lights so close to the house. He started to run toward the house. I to speed was very slow because I considered calling him back in case it should hit the house. He continued on went into the house and called his older brother who came out and joined us. It continued on in a straight line toward a ring of hills about 2 mi away my oldest son exclaimed it would crash into the hills. It somehow managed to make it and disappear over the horizon.

I would like to say the object
was no more than 100' above but
I guess it could have been 500'

MT. AIRY, MARYLAND

8 MARCH 1965

At approximately 1940 EST an observer and his son came out of a barn and noticed six red lights estimated to be about 1200 feet from the observer moving at a speed of about twenty miles per hour, toward the NE. The lights appeared as three pair of lights, actually like the tail fins of a 1958 Ford. All of the lights had the same intensity and was comparable to a traffic signal. Another witness was summoned from the house and then all three observers viewed the lights. One witness stated that it looked like a flying wing. It was a very dark night and there were no stars out. The flight was in a straight line toward the hills, two miles away. All of the observers thought the objects were going to crash into the hills but it went over instead and disappeared over the horizon. The lights passed between the barn and the house at an altitude of 100 - 500 ft., and was in view for a total duration of three minutes. To simulate the sighting, one witness would take a dirigible or blimp oriented sideways and place three pairs of red lights along it.

COMMENTS

The outstanding factors in this sighting are the very slow speed, the floating sensation, and the extreme closeness, yet lack of sound was reported. A portion of the available data is characteristic of a balloon with a scientific payload or some type of large glider. Attempts were made to put either of the two in the area but to no avail. The wind was out of the northwest which also conflicts with an evaluation of a balloon. With the existing data the case is listed as unidentified by the Air Force.

1. DATE - TIME GROUP 0 March 65 20/0730Z	2. LOCATION Waverly, Ohio
3. SOURCE Civilian	10. CONCLUSION PSYCHOLOGICAL
4. NUMBER OF OBJECTS Three (?)	Regarded as a psychological category case in view of the fantastic sequence of events.
5. LENGTH OF OBSERVATION 15 Minutes	11. BRIEF SUMMARY AND ANALYSIS
6. TYPE OF OBSERVATION Ground-Visual	Very strange light above a hill. Initial impression was that it was a vague light when fast an object approached it took on a triangular shape. Object stopped, then took off quickly with a trail of sparks. The thing left three parts that then exploded. From the explosion came several smaller objects. One of these small objects fell toward earth stopping three times on way down. As obj. cleared street lights it got brighter. These lights burned the observers eyes. Thought to be size of Volkswagen at 200 yds. No tail etc and no sound. Sighting made from indoors at night. Initial observation at 10-40 deg elevation in South. Total observ time about 15 minutes.

YOU - THE NUCLEUS OF SECURITY!

Waverly, Ohio
March 25, 1965

Lockbourne Air Force Base
Columbus, Ohio

Att: Dept. of Unidentified Flying Objects

Dear Sirs;

On the night of Saturday March 20, 1965 at 2:30 A.M. we witnessed an unusual sight.

We saw a very strange object, above the hill on the right side of West North St. in Waverly, Ohio.

At first it appeared as a vague light which was moving at a fast speed. But as it came closer it took on a definite shape. (Diagram enclosed) It then appeared to stop in midair. It then took off quickly and as it left, it left a lot of sparks in which we saw three things like balls of fire that fell to the earth and disappeared. It then gave the appearance in the sky that it exploded. From this explosion several smaller objects appeared. Then one of the smaller ships? hovered around and then acted as if it turned off it's power and fell a fairly good distance and then stopped in thin air and then did this three times. The third time it disappeared. We don't know whether it landed or what.

One thing we particularly noticed was that as it came closer the street lights got brighter. Also the lights from the object burned our eyes.

On Wednesday, March 25, 1965 a family by the name of [REDACTED] saw what appeared to be a bright light just hovering above the cities water tower for a long time. This tower is located just across the street and up on the hill back of our house. Mr. [REDACTED] said that several other people had said that they had seen this light.

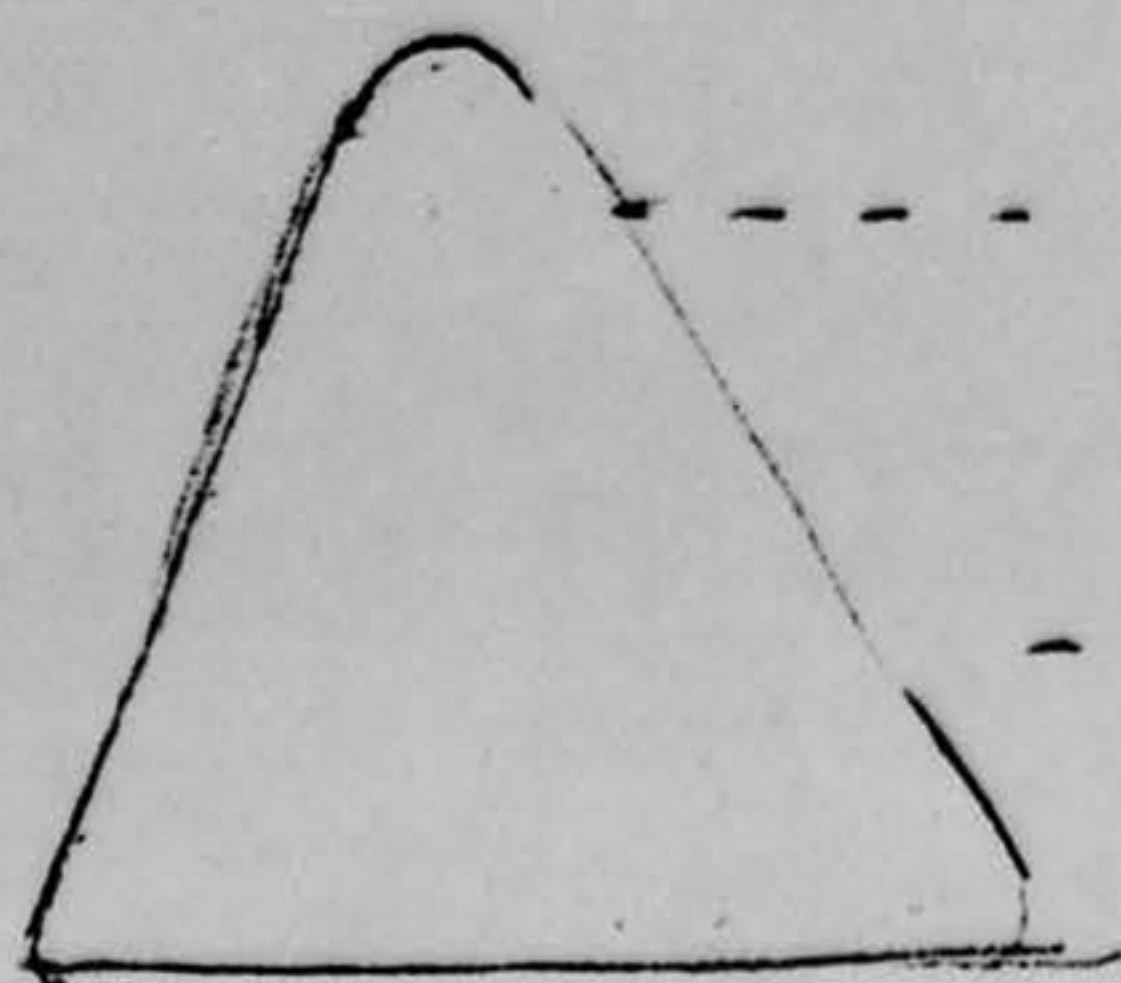

Sincerely

[REDACTED]
[REDACTED]

UFO REPORT

A. DESCRIPTION OF THE OBJECT:

(1) Triangular in shape at base, decreasing in size with height. See attached drawing in basic communication.

(2) At 200 yards, gave the impression of being about the size of a Volkswagon.

(3) Large bright light near top. Very bright aluminum bottom. (See attached drawing, attachment #2).

(4) Initially one large object. Later exploded into several smaller objects.

(5) The smaller objects formed no set pattern.

(6) No describable features except for its brightness and shape as in attached drawing, attachment #2

(7) No noticeable tail, trail or exhaust.

(8) No sound heard. Sighting made from inside the house with windows closed.

(9) Object gave off sparks and three things like balls of fire, which fell to the earth and disappeared.

B. DESCRIPTION OF COURSE OF OBJECT:

(1) Light in sky seen through window.

(2) 30 degrees to 40 degrees from ground, South of the house.

(3) Same general area as first sighting.

(4) Approached from sky, stopped, started away again and exploded.

Smaller objects from the explosion disappeared falling towards ground.

(5) Large object appeared to explode. Smaller objects disappeared falling toward ground.

(6) Time span from first appearance of large object, to last smaller

object disappearing, was approximately, 15 minutes.

C. MATTER OF OBSERVATION:

- (1) Ground visual observation
- (2) No optical aids
- (3) N/A

D. TIME AND DATE OF SIGHTING:

- (1) 0730Z, 21 March 1965
- (2) Night

E. LOCATION OF OBSERVER:

- (1) Southwest edge of Waverly, Ohio

F. IDENTIFYING INFORMATION ON OBSERVER:

- (1) Miss [REDACTED]
Age: 15
[REDACTED]
Waverly, Ohio
High School Student - Seemed fairly intelligent and sincere.
- Miss [REDACTED]
Age: 16
High School Student - Seemed fairly intelligent and sincere.

G. WEATHER AND WINDS:

- (1) Observers both recall clear sky. Mrs. Dolly Crabtree, Mother of Debra, confirmed clear sky.
- (2) Records of AWS at Lockbourne AFB, Ohio for time of incident indicate surface winds in area of 200°/07. Winds aloft not available.
- (3) Records from Lockbourne AFB, indicate ceiling at 0655Z as 8000 feet broken, and cloud cover at 0756Z as 3000 feet scattered and 8000 feet scattered.
- (4) Visibility 11 NM
- (5) Broken to Scattered
- (6) No thunderstorms in area
- (7) Not available in records

H. No unusual weather activity or conditions.

T. N/A

J. Air traffic not investigated due to odd movement and behavior of object. Visual check of area would tend to eliminate possibility of balloon release. No weather station in vicinity.

K. POSITION, TITLE AND COMMENTS of PREPARING OFFICER:

Report prepared by Captain Anthony L. Giuliano, AO 3009325, B-47, Navigator, awaiting PCS move. Preparing Officers comments are as follows:

Miss [REDACTED] and Miss [REDACTED] both gave me the impression of being typical teenagers, shy, fairly intelligent, and sincere in their beliefs as to what they actually saw. They agreed in general, at all times, on answers to all questions put to them. The girls were not questioned separately since they had been checked by [REDACTED]'s Mother, Mrs [REDACTED] immediately following the sighting. This will be covered more fully in a narrative covering additional and supplemental information given by Mrs. [REDACTED]

A Thorough check of the area of sighting by the investigating officer revealed no additional information. Particular emphasis was placed on search for foreign stone or ore, hunks of metal, burned spots or areas, and general disorder among the trees and bushes. The sparseness of growth in the area made possible a thorough search, but with negative results.

Before covering information received from Mrs [REDACTED], a description of the area behind the Crabtree house is needed in order to better understand and evaluate the facts.

The land behind the Crabtree house is level for about ten yards, forming a natural yard. The next hundred yards raises at a slow gradual rate and is sparsely covered by grass and weeds. After that the ground rises at a more rapid rate forming a hill roughly two (2) hundred yards from the house.

The hill is covered much like the other ground, with the addition of scattered bushes and trees. Past the hill is typical Ohio rolling terrain with scattered farms.

Following is information given by Mrs. [REDACTED]. Introduction is made of a ground sighting by Mrs. [REDACTED] which may or may not be connected with the original sighting, but is submitted because of the short time span between the two sightings.

On the night of the sighting, [REDACTED] tried to awaken her Mother to see the object. Her first attempt met with little success. The second attempt proved to be successful but by then the object had disappeared. Now fully awake, Mrs. [REDACTED] recalled hearing about an UFO sighting on the Huntington and Charleston News Broadcast two days before. To erase any doubts she had about the sighting Mrs. [REDACTED] separated [REDACTED], a girl friend who was spending the night with [REDACTED] and instructed both girls to draw a picture and describe what they had seen. The similarity of pictures and descriptions given by the girls, convinced Mrs. [REDACTED] that they had indeed seen something unusual. At this point she was content to pass it off as something that just happened.

On Tuesday evening, 23 March 65, the entire [REDACTED] family was at home watching television. Intermittently throughout the evening, reception was interrupted by a series of unequally spaced Beeping sounds. Conversation between Mrs. [REDACTED] and neighbors the next morning, revealed the interference was heard throughout the neighborhood. Conversation between the reporting officer and a neighbor confirmed this, although the neighbor refrained from giving her name, "So as not to get involved", as she put it. The weather at the time of the interference was hazy, with light rain.

The next incident occurred on Wednesday evening 24 March 65. Once again it was a dark, misty night with moderate rain. During a trip to the

kitchen a glance out the window revealed a sort of pole, sticking out of the ground in a place where ^{there} are no poles. A light in the back yard was turned on but did not illuminate the pole any better. (See drawing, attachment #1 for position of houses, yard light, and apparent pole). The "pole" disappeared.

Later that evening Debie called from the bathroom that there was some kind of pole sticking up from the rear corner of the house next door. At first Mrs. [REDACTED] thought it was the neighbors TV antenna, but a closer look showed the pole to be not on the corner of the house but out beyond the corner at approximately the same position she had seen it earlier.

At this time Mrs. [REDACTED] got a flashlight and went to the rear porch, and played the beam up and down the pole. It looked like a large automobile antenna, chromelike, about thirty feet tall. It appeared to have no base, and was topped by a small, gold colored ball. She then went to call her husband. When she returned the pole had disappeared.

It was at this time she decided to let [REDACTED] and [REDACTED] write of their experience.

The incidents of the television interference and the pole appearance, could possibly have been caused by some sort of weather phenomenon and were included in this report only because of the short span of time during which all three incidents occurred.

Mr. [REDACTED] was not available for comment on his proposed sighting on 25 March 65. (See basic letter). This too could possibly have been caused by some sort of weather phenomenon.

Mr. [REDACTED] confirmed that he, Mrs. [REDACTED], and two neighbors, thoroughly searched the area where the "pole" appeared, with negative results.

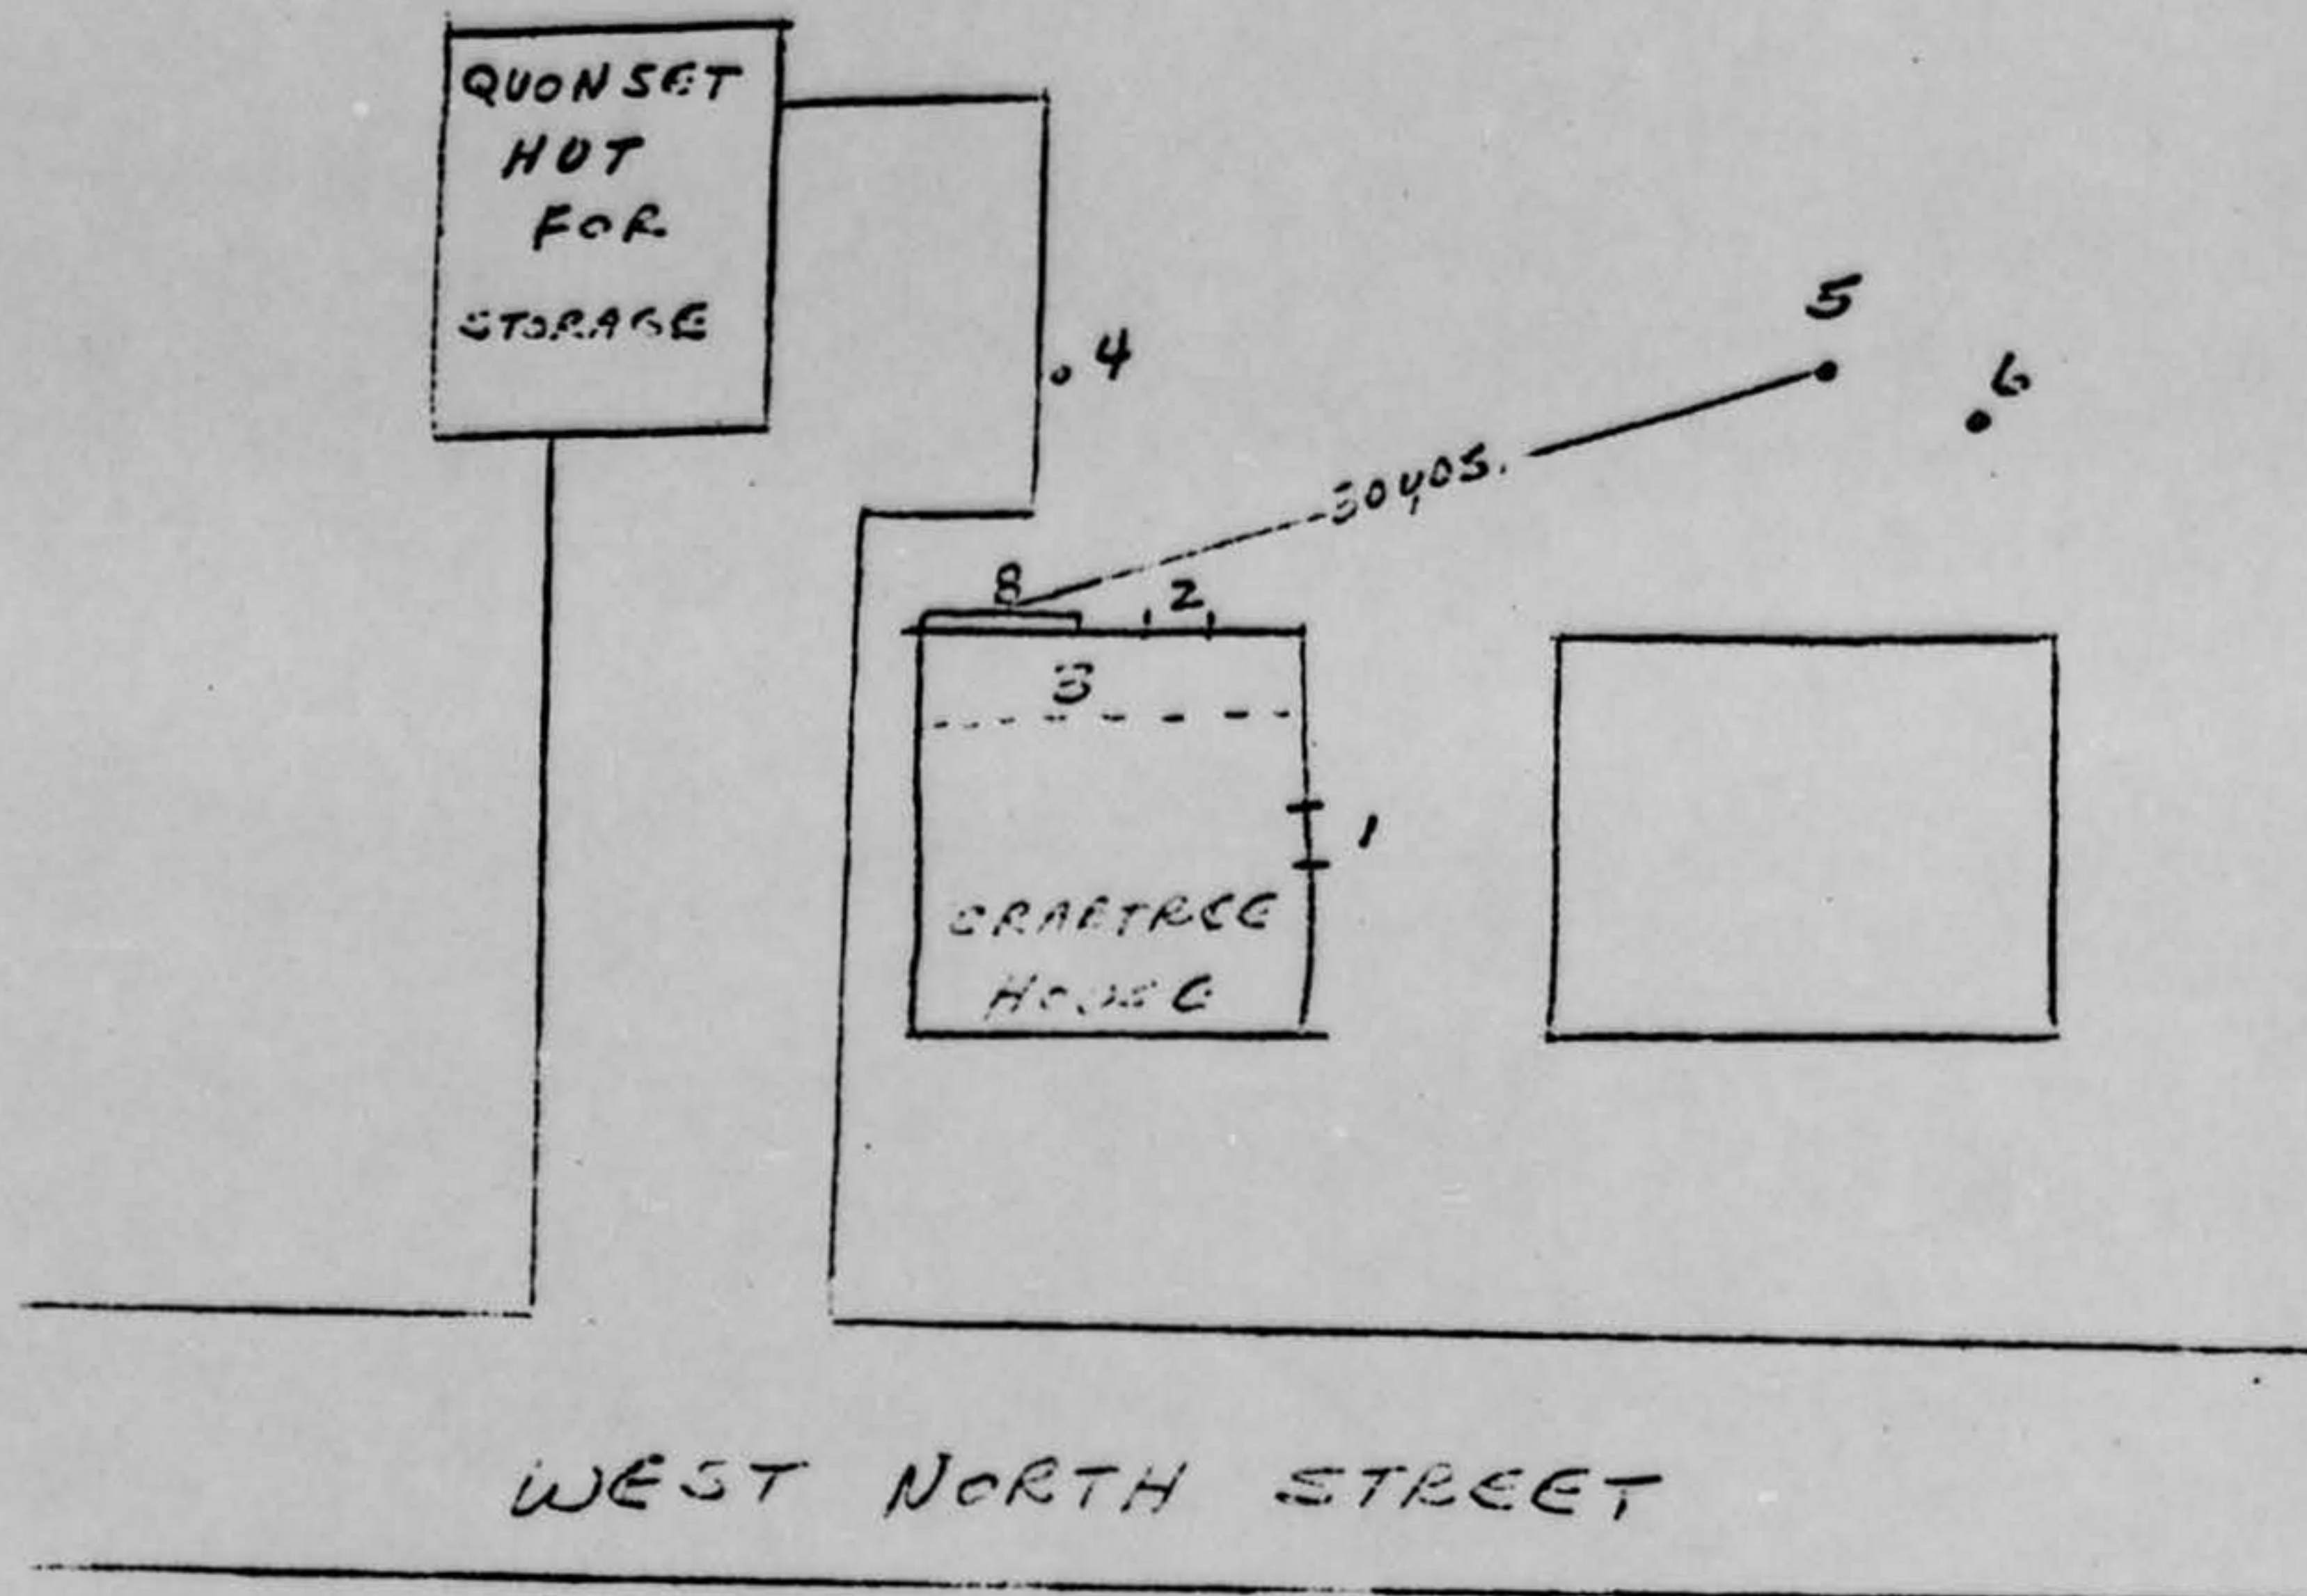

No unusual sightings have been seen in that area since that time.

An informal inquiry of merchants to determine the possibility of

spotlights being used at a Grand Opening of some sort of business during that period, also produced negative results.

Due to the lack of physical evidence, and an apparent lack of weather as a factor, the cause is undetermined at this time.

Drawing #2

March 25, 1965

Dear Sirs:-

With regard to your request for information on U F O I wish to report the following sighting.

Time : March 16, 1965 10:21 appx.

Direction of travel North North East

On the evening of the above date I along with my son was leaving a class at the Technical College in the city of Halifax, Province of Nova Scotia, and my attention was drawn to what appeared to be something like a group of jets in close packed formation, like that used when aerial displays are put on for the Public.

After watching for 3 seconds the absence of sound, and the appearance of what appeared to be some sort of jet thrust back further from the what had first appeared to be jets I concluded that this could not be so, as the rate of speed was sufficient to allow the sound to return to my place of vision.

Then the appearance of a bright whitish light in front and above the three lights (see diagram) that I had not previously noticed came to my attention, this kept the same rate of speed as the 3 distinct lights below and in back, and what appeared to be some sort of violet bluish flame (like that of a Acetylene torch) was seen to be emitting some sort of power like the thrust of a motor, the arch of vision was approximately 70-80 degrees, and then the lights disappeared behind some clouds.

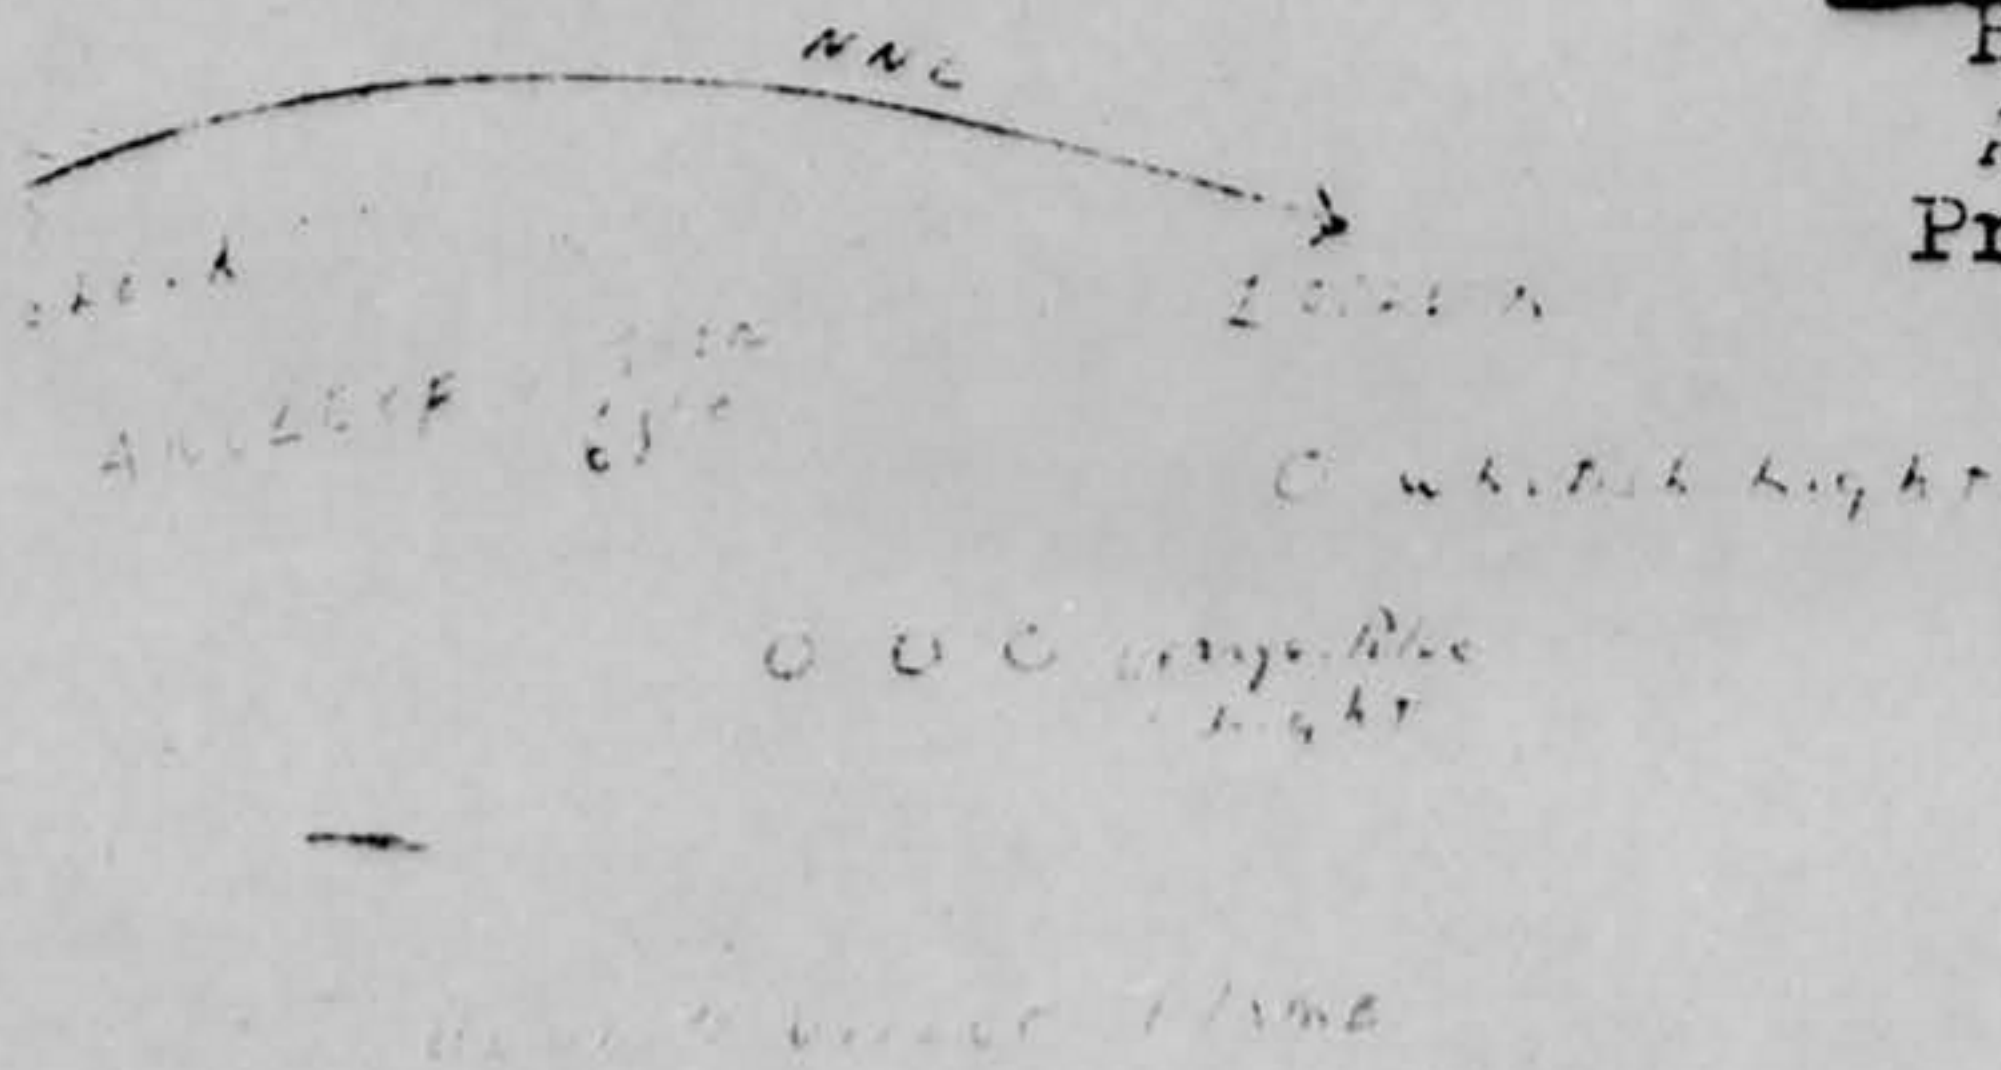

My conclusion is that if this was a vehicle of some sort it was of size of perhaps 1000-1500 in length as it appeared to be a the height of 50- 75,000 ft, and for the spacing of the light if the lights were some sort of port holes or observation areas the rate of speed was not that great that it could not have been some type of large jet plane but of enormous size. I can only conclude that my report to the RCAF in Canada confirms that such a craft would appear of radar, and that no craft was reported to their attention, and that they reported that they had other reports of the same sightings made me feel that we have either had a visit by craft from areas unknown, or that craft sighted was on course that Airforce officials do not care to make available to the public.

I trust that my account of the sighting will help correlate other reported so that some answer to the appearance of this unexplained craft can be found.

I have been at the Cape Kennedy operation while on vacation and have witnessed some launchings of the Gemini Titian 2, and ranger missiles as well as other during the latter part of January, and up till and including February 18, 1965 my observations of these launchings confirms my opinion that these were not missiles as the speed was too slow, and the height too low. Your comments will be appreciated at your convenience.

IN REPLY REFER TO

M-C MAO 1400

APR 6 1965

Mr. [REDACTED]

[REDACTED], Nova Scotia

Dear Mr. [REDACTED]:

We have received your letter dated March 25, 1965, and from your account of the event on March 16, 1965, it appears that you witnessed the orbital decay and atmospheric reentry of portions of a Soviet scientific satellite. COSMOS 57, launched by the U.S.S.R. on February 22, 1965, is known to have broken into over 100 significant pieces of which seven decayed from orbit, reentered the earth's atmosphere, and burned up on the evening of March 16, 1965. This conclusion is further evidenced by your altitude estimate of 50-75,000 feet--this is the altitude range where decaying orbital objects become luminescent from the friction created upon entering the atmosphere at orbital velocity.

Your interest in this matter as well as your excellent report are greatly appreciated.

Sincerely yours,

Original signed by

DEPARTMENT OF THE AIR FORCE
WASHINGTON

OFFICE OF THE SECRETARY

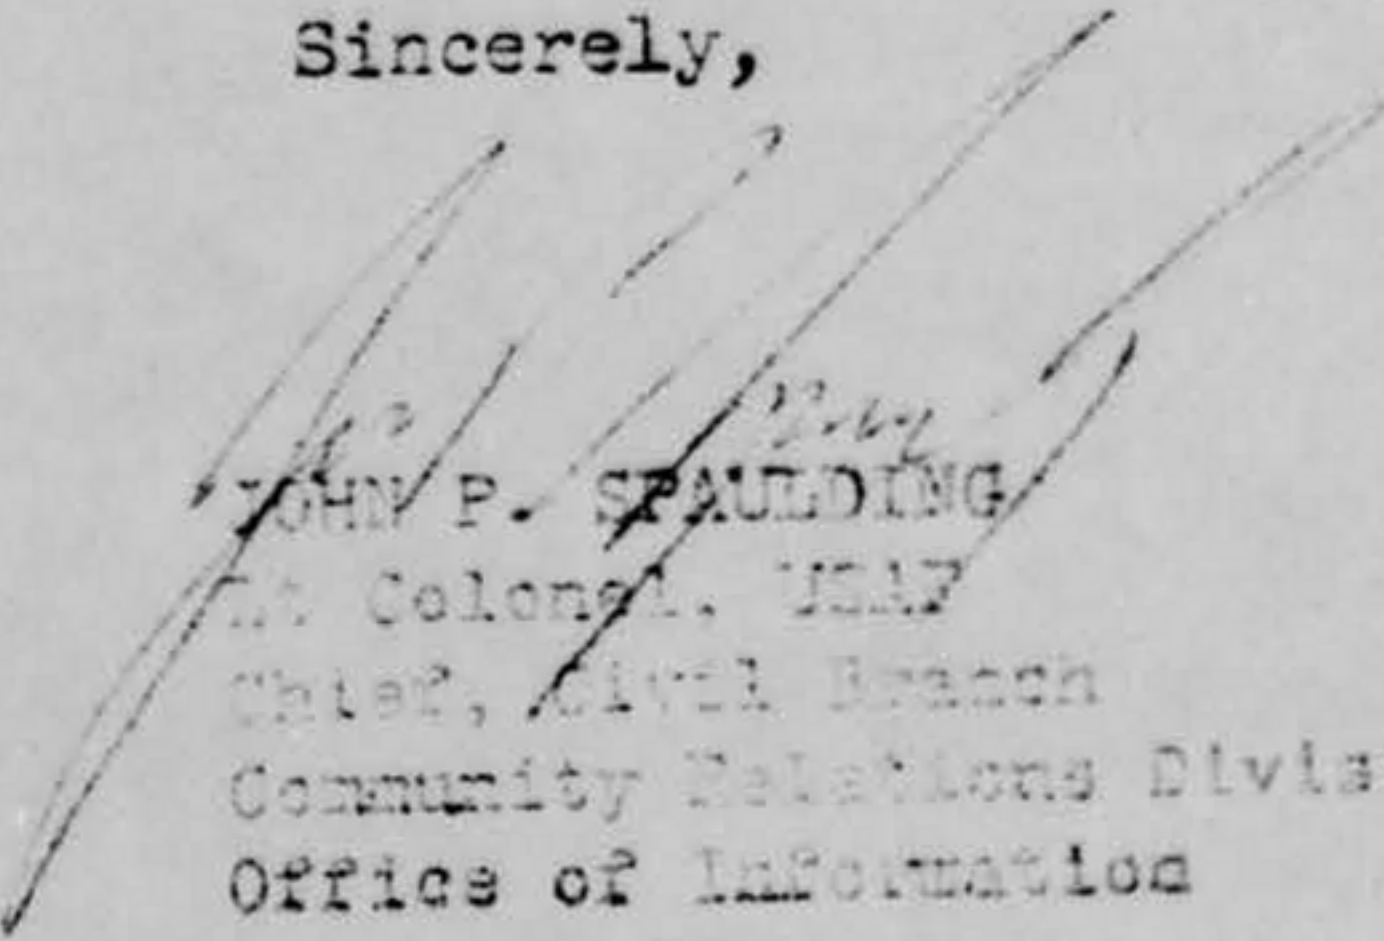

APR - 7 1965

Dear Mr. & Mrs. [REDACTED]

The Air Force is in receipt of a report which indicates that you observed an object which you could not identify on 17 March 1965. Although the report did not contain sufficient information to establish a definite identity of the object, it is believed that the sighting can be attributed to a reentry of space debris.

It is requested that the attached form be completed as fully as possible and returned to this office so that a complete evaluation can be made of the report.

Sincerely,

JOHN P. SPAULDING
Lt Colonel, USAF
Chief, Civil Branch
Community Relations Division

Mr. & Mrs. [REDACTED]
Doctors Cove, Nova Scotia

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

16 MARCH 1965
Day Month Year

2. Time of day: 10 20
Hour Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

Ducktown Cove Village Shelburne Co. VT
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

2
Hours Minutes Seconds

a. Certain
b. Fairly certain
c. Not very sure
d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes _____ No _____

6. What was the condition of the sky?

DAY NIGHT
a. Bright a. Bright
b. Cloudy b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right
d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

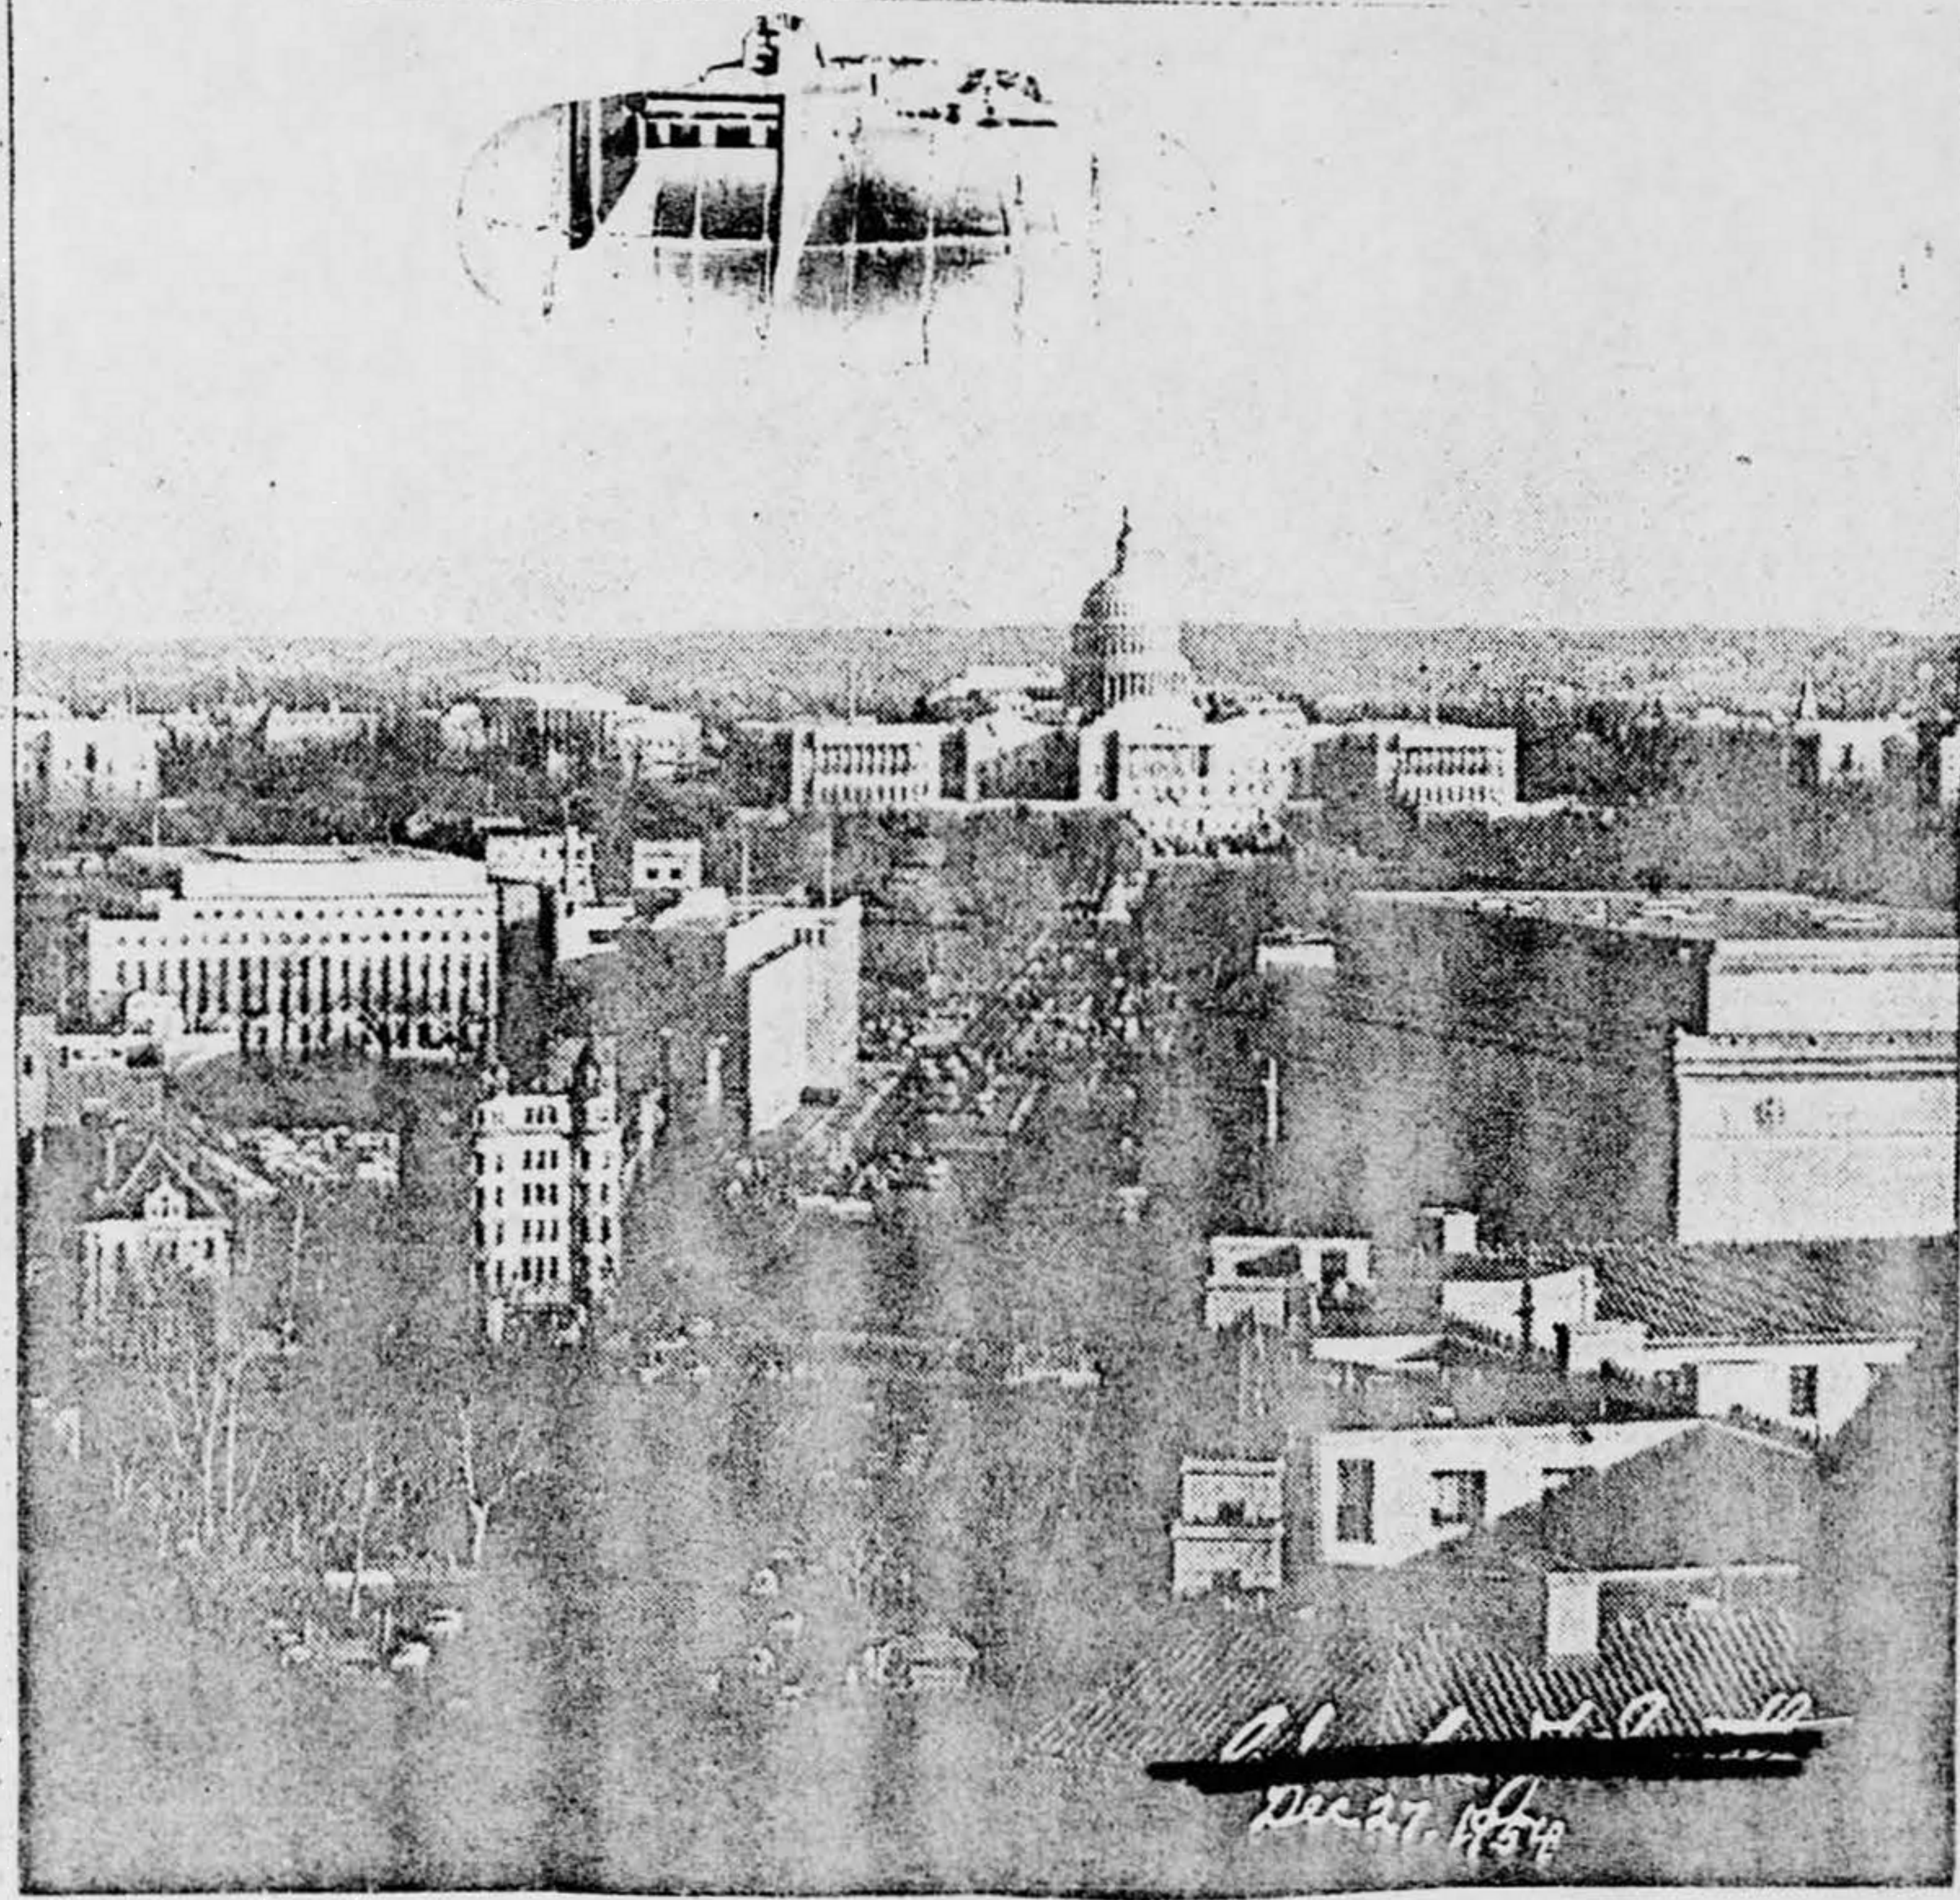

13. Did the object:

(Circle One for each question)

- | | | | |
|---|-----|-----------|------------|
| a. Appear to stand still at any time? | Yes | <u>No</u> | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes | <u>No</u> | Don't know |
| c. Break up into parts or explode? | Yes | <u>No</u> | Don't know |
| d. Give off smoke? | Yes | <u>No</u> | Don't know |
| e. Change brightness? | Yes | <u>No</u> | Don't know |
| f. Change shape? | Yes | <u>No</u> | Don't know |
| g. Flash or flicker? | Yes | <u>No</u> | Don't know |
| h. Disappear and reappear? | Yes | <u>No</u> | Don't know |

27 DEC 1954
Bronx, New York

NO GLE INFORMATION ONLY

Dec 27, 1954

14. Did the object disappear while you were watching it? If so, how? Yes

It went down Behind the HORIZON.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

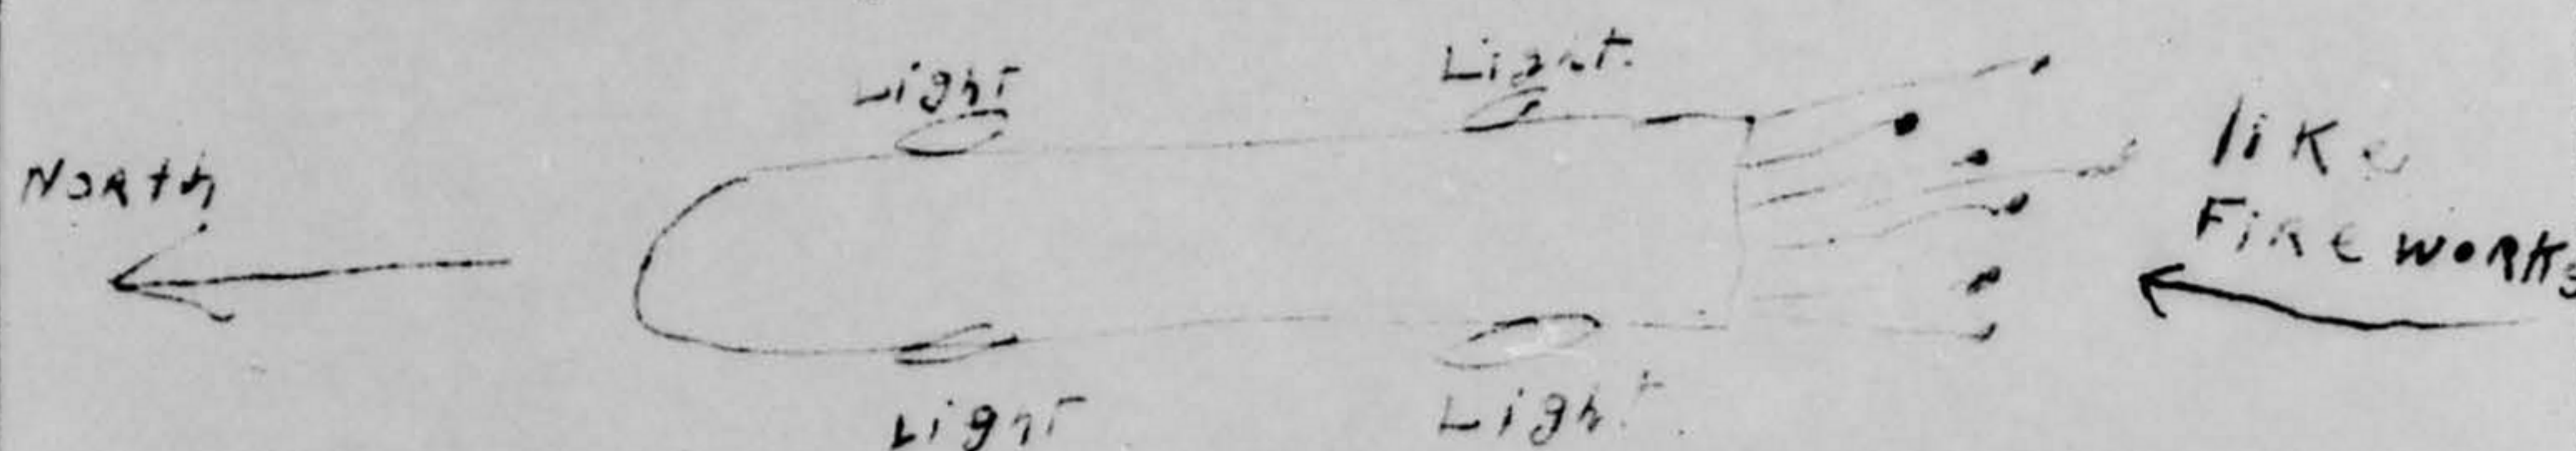

a. Sound There was no sound that could be heard

b. Color _____

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

About one quarter of the object.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One) Yes No

IF you answered YES, then what speed would you estimate? About 1000 Miles

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes No

IF you answered YES, then how far away would you say it was? 10,000 Feet

22. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other _____

23. Were you (Circle One)

- a. in the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes No

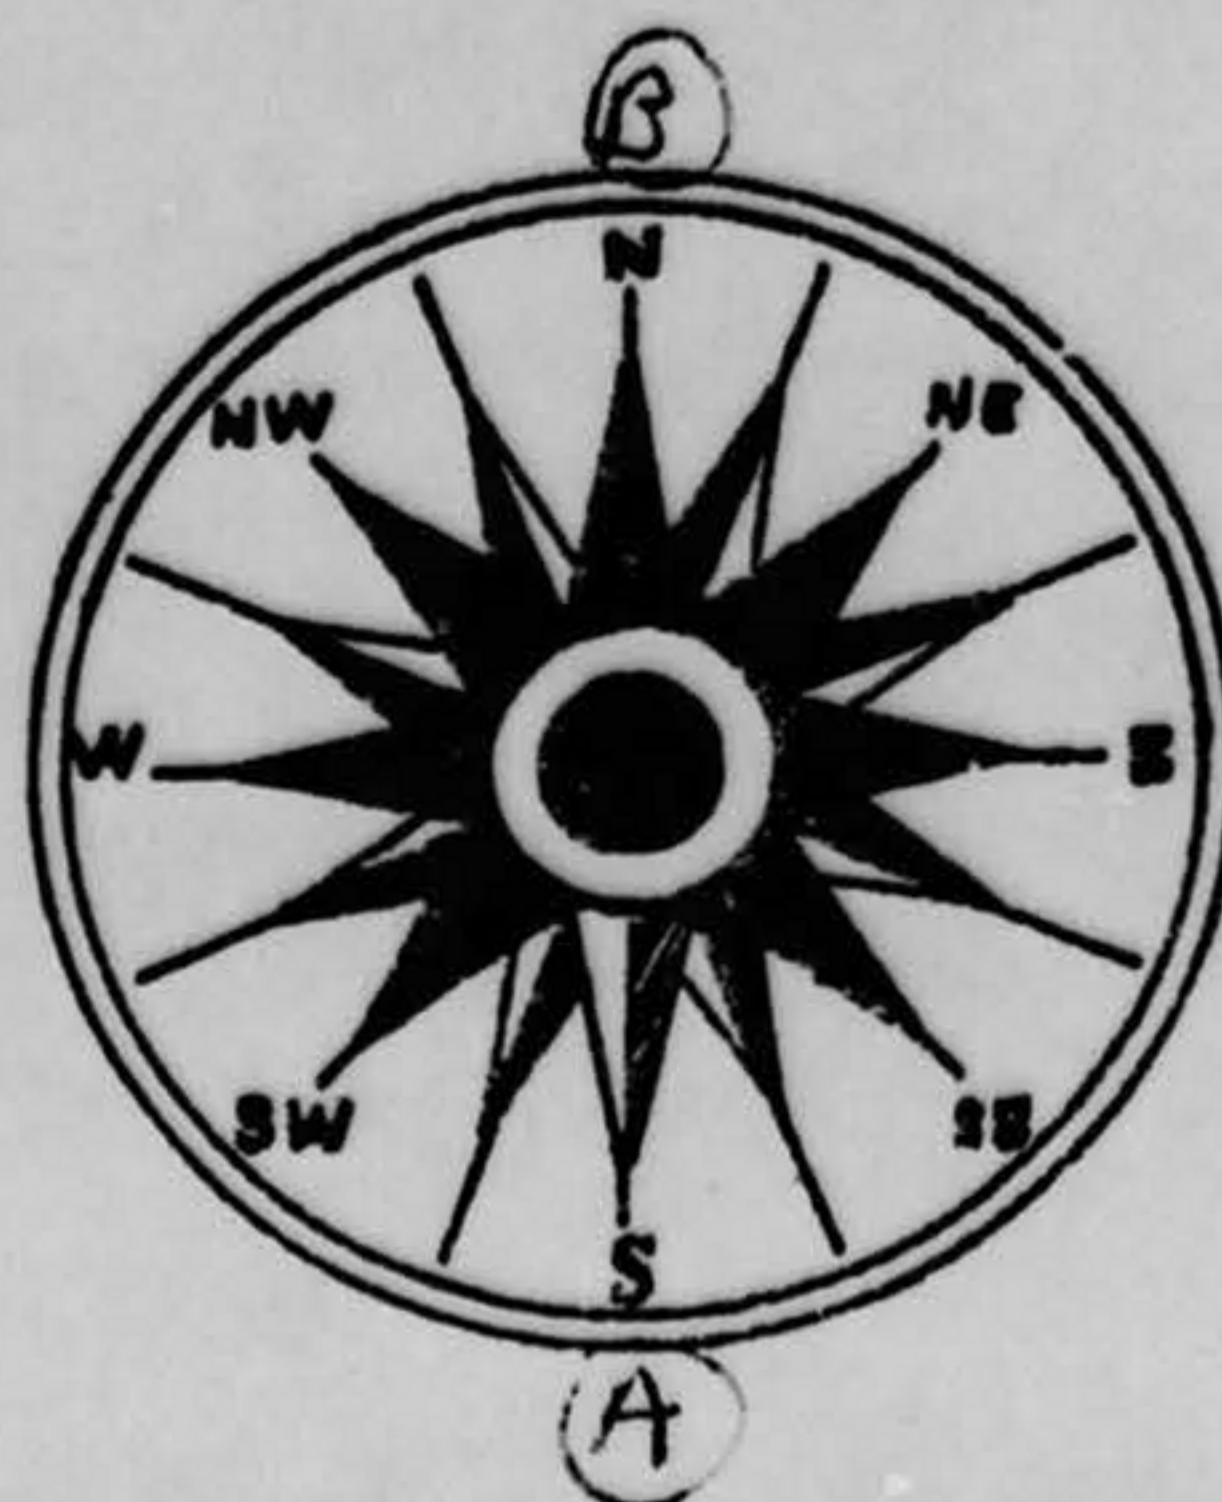

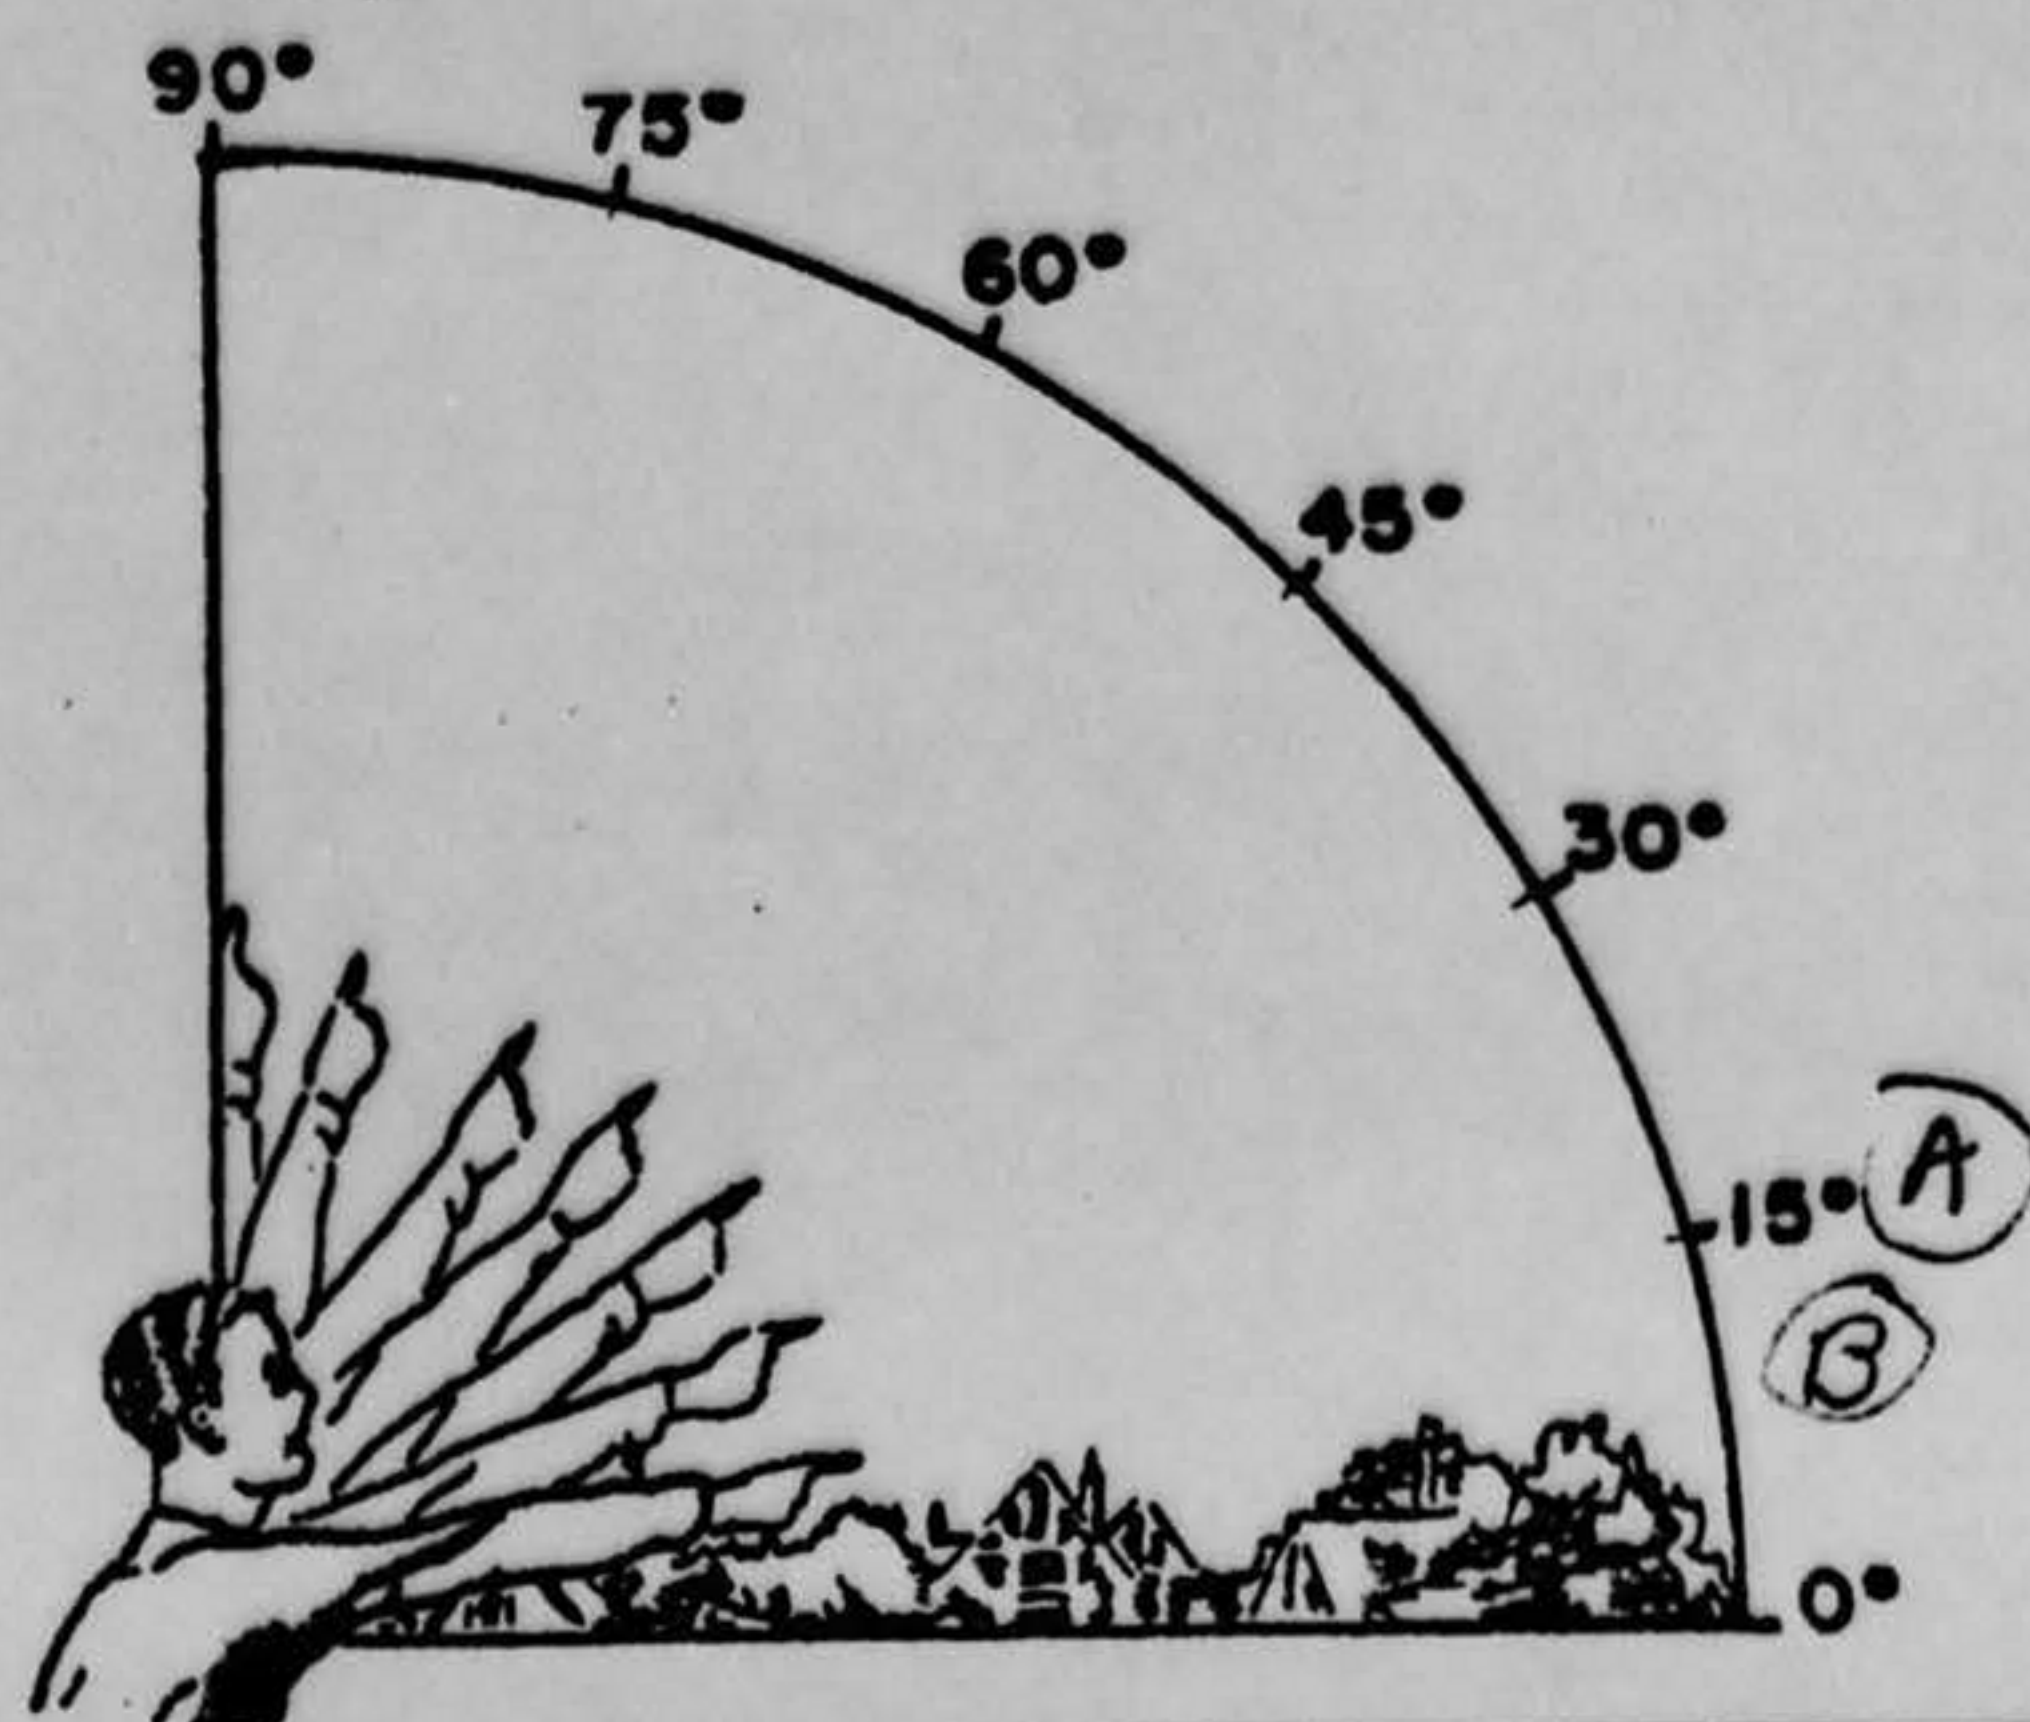

25. Did you observe the object through any of the following?

- | | | | | | |
|-----------------|-----|----|----------------|-----|----|
| a. Eyeglasses | Yes | No | e. Binoculars | Yes | No |
| b. Sun glasses | Yes | No | f. Telescope | Yes | No |
| c. Windshield | Yes | No | g. Theodolite | Yes | No |
| d. Window glass | Yes | No | h. Other _____ | | |

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It could be called A TRAIN IN THE SKY.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any change in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

I HAVE NEVER SEEN AN OBJECT LIKE
THIS BEFORE

31. Was anyone else with you at the time you saw the object? (Circle One) ☒ Yes ☐ No

31.1 IF you answered YES, did they see the object too? (Circle One) ☒ Yes ☐ No

31.2 Please list their names and addresses:

Mr	[REDACTED]	Doctors Cove	Shelburne Co. MS
Miss	[REDACTED]	"	" "
Miss	[REDACTED]	"	" "
Miss	[REDACTED]	"	" "

32. Please give the following information about yourself:

NAME [REDACTED] [REDACTED] [REDACTED]
Last Name First Name Middle Name

ADDRESS Doctors Cove Shelburne Co MS.
Street City Zone State

TELEPHONE NUMBER [REDACTED] AGE 40 SEX MALE

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I SERVED TWO AND ONE HALF YEARS
IN THE R.C.A.F. DURING WORLD WAR TWO

33. When and to whom did you report that you had seen the object?

16 MARCH 1965
Day Month Year

R.C.A.F. RADAR BASE
BACCHARO

34. Date you completed this questionnaire:

<u>18</u>	<u>APRIL</u>	<u>1965</u>
Day	Month	Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

When I first saw the object I thought it was four or five planes flying very close together.

Then I saw what looked like fireworks coming out behind. I thought then they might be going to crash.

I ran to the outdoors and as it passed over head I could see it was only one object. But the fireworks was still coming out behind.

I listened very carefully but could not hear any noise what so ever.

Information Only

U.S. Air Force
Washington D.C.

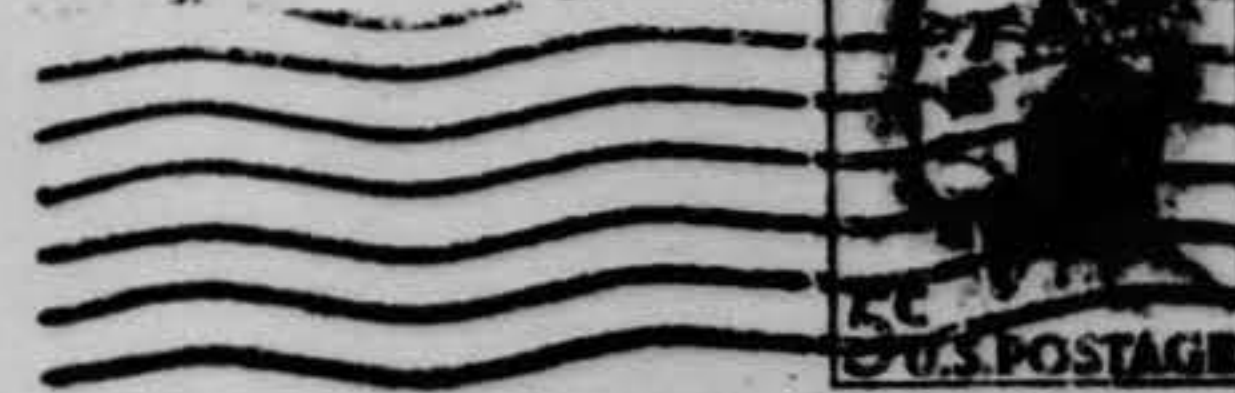

Dear Sir:

at 12:40 A.M. on March 26
I spotted a flying object going
North from Juno Florida at a
moderate speed and then making
a sharp turn west. It look like
a fish with head about the size
of a golf ball and a two feet tail.
It was not a ball of fire and
it was in my view for about
twenty seconds. This object was
not as high as the stars and was
a controlled flight. It was not a
plane because of the sharp turn
this object took from North to West.

Sincerely
~~_____~~

DEARBORN OBSERVATORY
NORTHWESTERN UNIVERSITY
EVANSTON, ILLINOIS 60201

May 26, 1965

Major Hector Quintanilla, Jr.
Box 9494
FTD Wright Patterson Air Force Base
Dayton, Ohio

Dear Major:

I would like to report on my telephonic investigation of the Mt. Airy, Maryland, case of March 8, 1965. I had a long telephone conversation with the father and with the sons in the background. Father sounded steady and reliable, puzzled, but unexcitable. I can't pick any holes in the reliability of the report. There were two witnesses, followed by the third. The seventeen-year-old son was with the father when it happened and they had time to call to the twenty-eight-year-old son to come out of the house and take a look. There is some possibility that the event might be tied in with Camp David which is about twenty miles away in the same general direction the lights were observed going. The lights also paralleled Rt. 40, which is about a quarter of a mile away and which has alot of traffic on it.

Mr. [REDACTED] is an instrument maker at the Bureau of Standards, but also operates a farm.

The outstanding things in his mind were the very slow speed (as if attached to a balloon), the floating sensation, and the extreme closeness yet lack of sound. Mr. [REDACTED] said that to simulate the sighting, he would take a dirigible or blimp oriented sideways and place three pairs of red lights along it--a pair of lights like the tailfins on a 1958 Ford. He said it looked like a flying wing. All lights had the same intensity.

Mr. [REDACTED] felt, "It was just something I couldn't understand." Lights were diffused but bright. It was windy, but he doesn't know the direction of the wind. I checked him on the length of time, but neither he nor his sons would shorten it. I checked him about his reaction since that time, and he says he is still very puzzled and has been kidded about it quite a bit. And, someone gave him a book on air craft. I confirmed that the object came directly over their heads and that it gave the appearance that it was about to crash into the house. He saw no fusilage whatever, but lights appeared to be attached to something. It was a very dark night.

The whole thing could be explained if we could establish the presence of a large glider headed for Camp David; however, no green or white lights, only red, and speed seems too slow.
