

1. DATE - TIME GROUP 22 May '1965 22/1355Z	2. LOCATION Albuquerque, New Mexico
3. SOURCE Civilian	10. CONCLUSION AIRCRAFT
4. NUMBER OF OBJECTS 6 Lights	
5. LENGTH OF OBSERVATION 30 Seconds	
6. TYPE OF OBSERVATION Ground-Visual	11. BRIEF SUMMARY AND ANALYSIS 6 lights, oval, small in diagonal or wedge formation, appeared to be luminous travelling from East to West then turning back to NE. Objects travelling at high speed. Changed formation once and had no specific pattern as they change direction to the NE. Night was overcast objects (lights) appeared to be above a scattered cloud deck. COMMENTS: 6 lights confined to small area. Maybe one or more a/c Local traffic eliminated as source. Possible a/c from other area. Flight path indicates directional change to Santa Fe or Las Vegas direction. Observation brief (30 seconds) but long enough for a/c observation of the nature. Also observation occurred in overcast WX and some obscuration likely occurred due to clouds and haze. Case regarded as an a/c observation of one or more aircraft.

Rec from Dr. H

20 Sept 68

22/May/65

Mar. 24, 1966

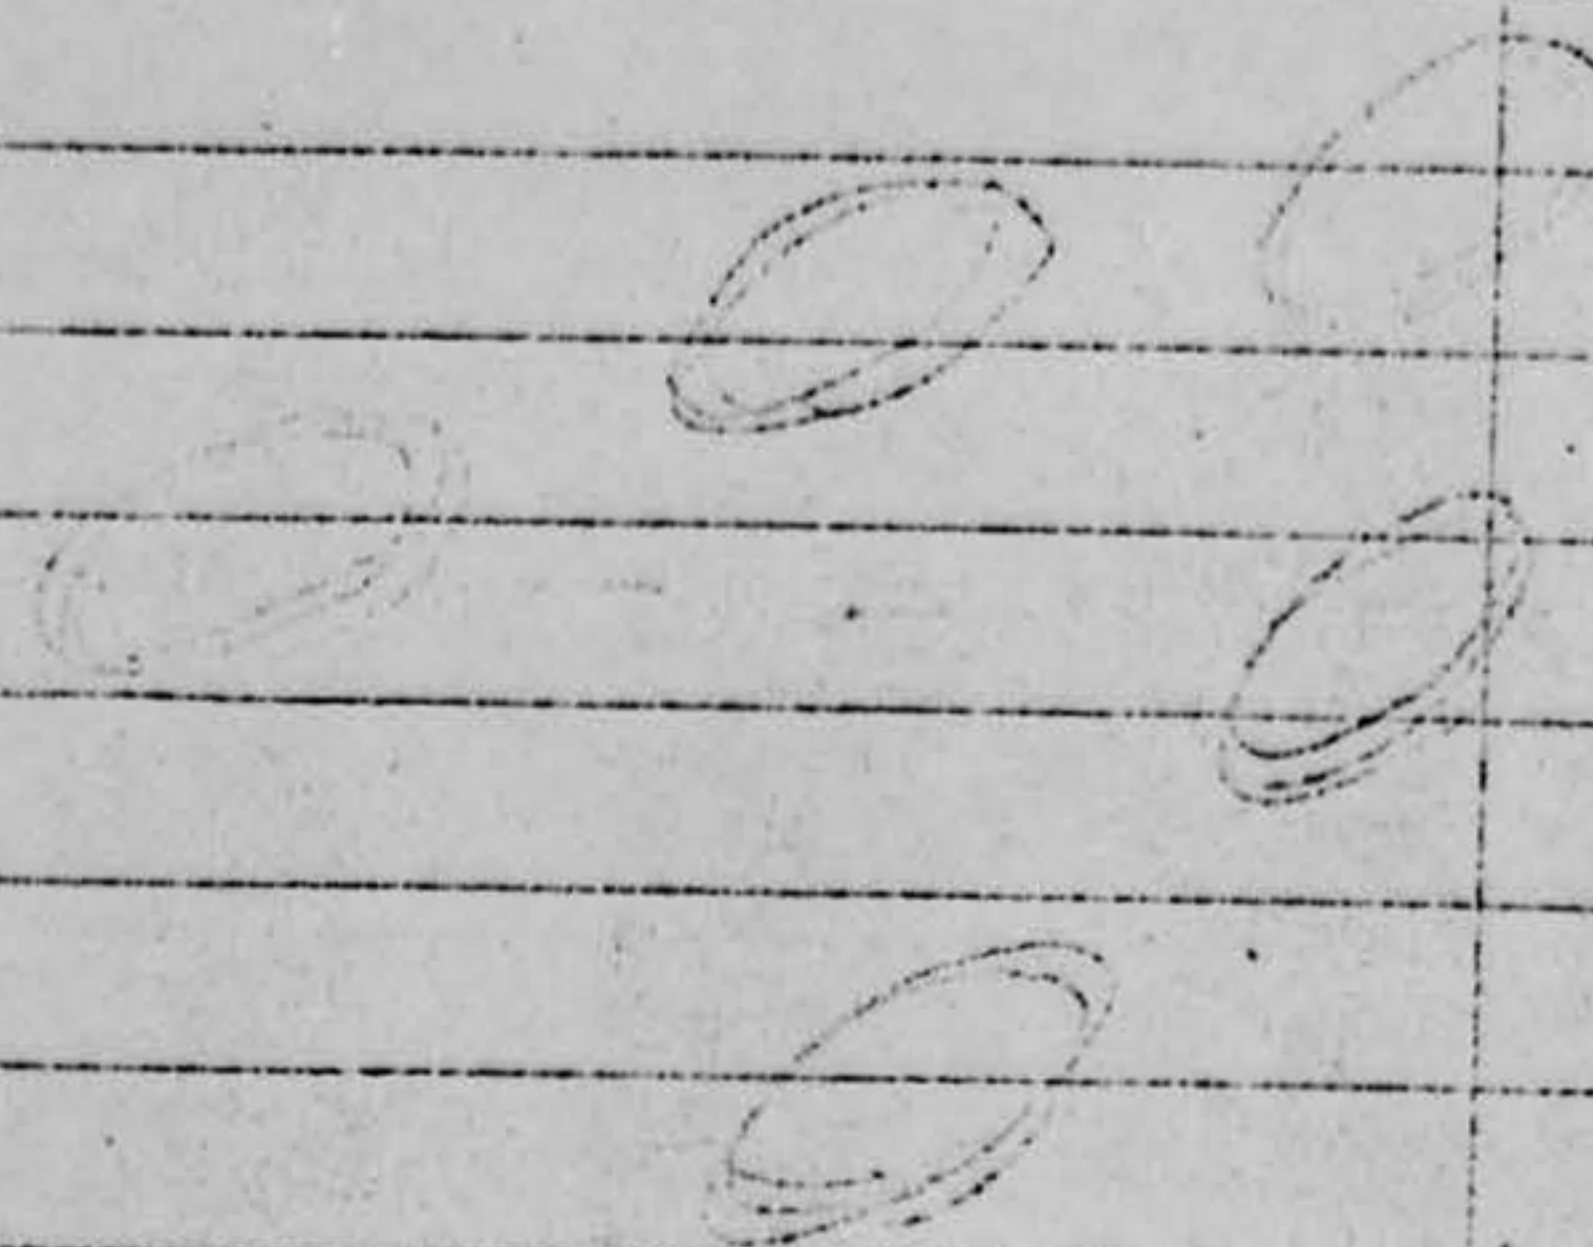

Dear Mr. Weynek

I am answering your letter in regards to our report of the U.S.C. on May 22, 1965.

1. At the time of our observation there were no stars visible. The sky was overcast. The objects were different from a star in that they were egg shaped & did not twinkle or shined, but glowed from within. They flew in a V shaped formation & broke this formation only to almost halt, make a turn, & head more northeast.

2. The objects covered only a small portion of the sky as if there were maybe 5 large airplanes flying together in formation. About the same area would have been covered. There was no sound whatsoever. However the sky was overcast & we could not decide if the objects were very large & far away or if they were small & close to earth.

This is an illustration of the objects
as they passed directly over our
heads.

There seemed to be between 5 to 7
but they passed so quickly we could
not be sure. They all seemed approx-
imately the same size & shape but
again we couldn't be positive.
Their glow was not bright but
very dim.

3. Since the observation, no
solution has entered our
minds. We are positive they
were not planes because we
had seen one South of us
about the same time (seconds
earlier.) We watched the objects
for about 30 seconds from

The time they approached was not
of the western sky until they
went out of sight northeast of
us. We were all laying on
lounge chairs on our patio & were
looking into the sky as we talked.
It was completely dark and we
probably would not have seen
them.

4. We have not witnessed anything
similar to the event before or
since.

We are glad to be of assistance to
you. If there are further questions
we will be glad to help. The people
that were here at the time feel
the same. They were: Mr. & Mrs.

[redacted] 56th N.W. Albany.
N.M.

By the way our names were spelled
wrong. I believe they meant

[redacted] and wife instead of
[redacted]
Sincerely
Mrs. [redacted]
