3. SOURCE Civilian	10. CONCLUSION UNIDENTIFIED <i>Pass. physiological - after-image - eye lens blemish</i> <i>OTHER (DEBRIS IN WIND) - or perhaps a very close object in the wind</i> Does not conform in motion or description to conventional object phenomena.
4. NUMBER OF OBJECTS One	11. BRIEF SUMMARY AND ANALYSIS Sun high in Northwest. (At time of report sun was at 10 deg elevation 290 deg azimuth). Object in East at 30 deg elevation. Observed for 15 seconds and object then jumped up to 45 deg elevation toward the North and stopped for a few seconds. Called for additional witnesses but before they could come and view object it streaked across the sky disappearing in the West. Round shape, low glisten. Smaller than a full moon. Had concentric and rotating lines. Color described as a light smoky translucence. Had an outer circle like a shell. Initial speed prior to stopping was estimated at 125-150 mph.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

OBJECT APPEARED SLIGHTLY SMALLER THAN FULL MOON APPEARS WHEN HIGH IN SKY, Only small portion covered by Match Head!

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

IF you answered YES, then how far away would you say it was?

Very Difficult
could have been about
5000 ft.

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

c. Outdoors

d. In an airplane (type)

e. At sea

f. Other

23. Were you (Circle One)

a. in the business section of a city?

b. in the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

Nothing. Saucer does not describe
what I saw

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

Never

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes ☒ No ☐

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes ☐ No ☒

Under Section 26, you ask for a comparison with some common or familiar object, comparison with a common object escapes me; however it did remind me of a rather uncommon one. The outer chamber or ring reminded me of the accelerating chamber of an atom smasher. There was a pulsing motion of some kind in this space. whether it was a rotating motion or not I am unable to say.

The outer walls of this chamber were quite wide and could be seen very clearly. These lines were a different shade or color than the rest of the object. They were not as translucent and appeared to be a tan color.

The movements had to be guided by an intelligence of some kind ,

It is difficult to estimate the height, but I would say that it was over Ten thousand feet.

One of the things that seemed very puzzling was the way it took off in a straight line across the sky after it had stooped at the 45 degree position. It did not rise by following a line across the sky at the same height the way a plane would do.

Dear Sir:

at the risk of being declared
nutty, or of being held up to
ridicule, I wish to report
the sighting of a phenomenon
at 5.55 P.M. Sunday June
20, (1956). This object
was sighted in the Eastern sky
about 30° above the horizon.
It caught my eye for about
15 seconds and as I realized it
was unusual, it seemed to
jump up or fly to about a 45°
degree angle; then it stopped for

a few seconds, at this time
I yelled for my wife and son and
daughter in law to look but
before any one of them could follow
it it streaked across the
sky to the West and disappeared,
it appeared to be a round disc,
and had a low grade glister
to it or was glowing with
some sort of light. It
appeared to be smaller than the
appearance of the full moon and
there were concentric and
radiating lines, I am not
looking for publicity, but if this
is of any help to you & offer
it for whatever scientific value
it may have
Yours truly
