Dear Miss [REDACTED]:

This is in reply to your letter regarding an aerial object which you observed on 23 July 1965.

The object which you observed has been evaluated as a satellite. We are unable to identify the specific satellite that you observed. There are more than 30 satellites and satellite components visible to the naked eye. Thank you for reporting your observation to the Air Force.

Sincerely,

JOHN P. SPAULDING

Reference the attached letter from [REDACTED] requesting information on her observation of 23 July 1965. Her observation has been evaluated as a satellite. The description which she gave is in accord with this analysis. Both Echo and Pegasus schedules have been checked and none of these satellites were over the area at the time. However, there are more than thirty satellites and satellite components in orbit which are visible to the naked eye.

Dear Sir:

Our family was on the
patio enjoying the evening
air, when I spotted a
Sattalite moving from
North to South, approximately
at 10:40 P.M. July 22, 1965

Our home is located
about 50 miles North of
Portland Ore. in the state
of Washington

If you could give me
the name of this specific
Sattalite and what country
Orbitid it, it would be
greatly appreciated.

Thank you,
