My son first noticed a "huge light" moving fast and drew my attention to watch. We watched 15 to 20 minutes 'til it disappeared. I thought it might be a star but the lights on the top of the hill flickering after it went behind caused me to question. The speed ^{and size} of the object also caused me to question.

I watched several nights thereafter and saw Venus and I am convinced that this is what it was.

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It was a round object like a ball only a very large one. Like a ball on fire without the smoke. Similar to the sun but not that big.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

*It moved up and down
and to the sides very slowly.*

29. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

no

31. Was anyone else with you at the time you saw the object? (Circle One) ☒ Yes ☐ No

31.1 IF you answered YES, did they see the object too? (Circle One) ☒ Yes ☐ No
