

PROJECT 10073 RECORD

1. DATE - TIME GROUP 11 August 65 12/0415Z	2. LOCATION Far Rockaway, New York
3. SOURCE Not Reported	10. CONCLUSION Astro (METEOR) ✓
4. NUMBER OF OBJECTS One	Meteor of fireball class.
5. LENGTH OF OBSERVATION 1 Second	11. BRIEF SUMMARY AND ANALYSIS Facing East looking up and object moved through sky at fast speed. Observed for 1 second. Glow was like light from electric bulb. Appeared much larger and closer than a shooting star. Distance was about a yard in length.
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE Not Reported	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No

Dear Mr. [REDACTED]

The general description of the object which you observed on the night of 11 August 1965 resembles that of other reported meteors of the fireball class. These meteors appear at a low altitude and are extremely bright, having a magnitude greater than -3.

We are forwarding your letter to Dr. J. Allen Hynek, the civilian consultant to Project Blue Book, for his professional opinion on this observation. Should he feel that the object was not a meteor, he will no doubt contact you for additional information.

Sincerely,

JOHN P. SPAULDING

Gentlemen:

I wish to report to you that on the evening of Wednesday, August 11, 1965, at approximately 11:15 P.M., I saw what appeared to me to be an unidentified flying object.

My point of observation was in the community of Far Rockaway, New York. I was facing in an Easterly direction gazing upward. I saw an object of bright intensity move through the sky at an extremely fast rate of speed for about one (1) second and disappear. The glow from the object appeared to be like a small, bright, intense electric bulb however the shape of such object was impossible to determine because of the fast rate of speed at which it moved.

I have seen "shooting stars" on many occasions being that I live at the beach and quite often we are on the boardwalk and have occasion to see such phenomena. However, the object that I saw was much larger and appeared to be much closer in the heavens than any star could possibly be.

The object disappeared as quickly as it appeared and seemed to cover a distance of what I can only estimate to be a yard in length as compared with the course at which it was traveling in the sky and its distance from the earth.

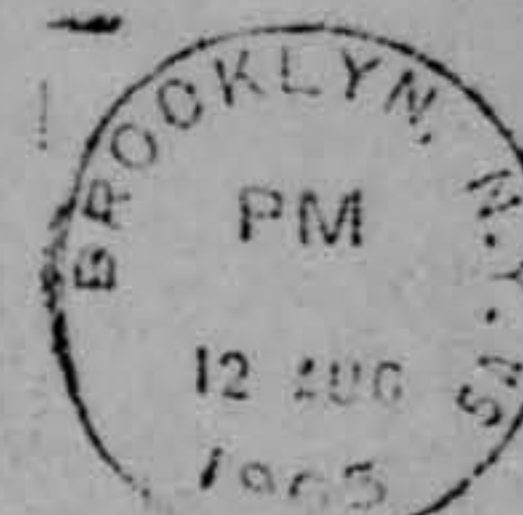

Needless to say, I consider myself a somewhat reliable observer and I felt that this information should be communicated to you.

Trusting that the aforesaid information will be directed to the proper authorities, I remain,

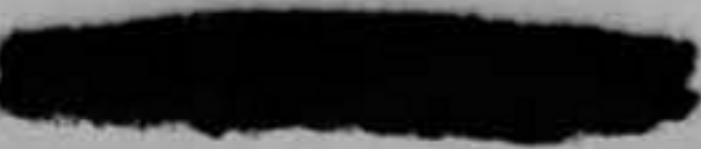

Sincerely yours,
[REDACTED]
