

PROJECT 10073 RECORD

1. DATE - TIME GROUP 11 August 65 12/0600Z	2. LOCATION Prospect Heights, Illinois
3. SOURCE Civilian	10. CONCLUSION Astro (CAPELLA) ✓ Object at 30 deg elevation in NE moving to the East and rising 20 degrees in two hours. Object in the position of CAPELLA. Object characteristic of observation of Astro Body.
4. NUMBER OF OBJECTS One	11. BRIEF SUMMARY AND ANALYSIS Object like a star too far off to show details. Flashing red green and white. At 60 deg elevation, azimuth not determined. Object moving West to East, No maneuvers. Still in sight at time of report. Watched for 2 hours. Colors consistant with those reported for CAPELLA.
5. LENGTH OF OBSERVATION 2 Hours	
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE Rising, East	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No

SEP 20 1965

Dear Mr. [REDACTED]

This is in reply to your report of an aerial object which you observed on the night of 11 August 1965.

It has been determined by our investigation office that the object which you observed was the star Capella. This star was in the northeast at the time of your observation. The colors reported are those associated with this star.

Thank you for submitting your report to the Air Force.

Sincerely,

JOHN P. SPAULDING
Lt Colonel, USAF
Chief, Civil Branch
Community Relations Division

Reference the attached unidentified flying object report from the Christianson family. The object which they observed on the night of 11 August 1965 has been evaluated as the star Capella. This star was in the northeast at the time of their observation; the position which they gave for the unidentified object. The colors reported are those associated with this astronomical object.

SUBJECT: U.F.O.

12 August 1965

A. Description of the object:

1. Would you please describe object's shape Almost like a star, too far
off to show any shape. Flashing red, flashing green, flashing white.

2. Size as compared to a known object held in the hand at about arm's
length. (Such as a pea, dime, nickel, baseball, etc.) Smaller than a pea
at arms length.

3. Color Flashing red, green, white.

4. Number One (1)

5. Formation, if more than one N/A

6. Any discernible features or details None

7. Was there a tail, trail or exhaust, including size of same compared
to size of object None

8. Was there any sound? If so, please describe the sound No

9. Other pertinent or unusual features None

B. Description of course of object.

1. What first called the attention of observer to the object was
watching for "Swift's" comet.

2. Angle or elevation and azimuth of object when first observed 60°
angle. Azimuth not determined

3. Angle or elevation and azimuth of object upon disappearance 45°
angle last notice then observer decided to go to bed. Object did not disappear
when last sighted by observer.

4. Description of flight path and maneuvers of object Moving West to
East. Noted no maneuvers of object.

5. How did the object disappear (Fade away or instantaneously) _____
Object was still in sky.

6. How long was the object visible? (Be specific, 5 min, one hour) _____
Observed object for two (2) hours.

C. Manner of observation.

1. How was object sighted, ground-visual, air visual, ground electronic,
air electronic. (If electronic, specify type of radar) Ground-visual.

2. Were any optical aids used. (Telescopes, binoculars) Binoculars - 7X35

3. Was this an airborne sighting? If so: N/A

A. Type A/C _____
B. Ident No _____
C. Altitude _____
D. Heading _____
E. Speed _____
F. Home Station _____
G. Telephone No _____

D. Time and date of sighting

1. Time Zulu 0500Z Date 12 August 1965
2. Was it, night, day, dawn, dusk Night

E. Location of Observer. Where did you make this sighting from? Give exact location. (If necessary give location in reference to a known land mark)

Approximately 87°58'W 42°06'N - From backyard of home.

F. Identifying Information on Observer

1. Civilian Name [REDACTED]
2. Age 36
3. Mailing Address [REDACTED] Prospect Heights, Illinois
4. Occupation Salesman
5. Reliability Stable
6. Telephone No [REDACTED]

Military:

1. Name N/A
2. Grade
3. Organization
4. Duty
5. Reliability
6. Telephone No.

G. Weather and Winds - Aloft conditions at time and place of sightings

1. Observer's account of weather conditions Unlimited Clear Night

Winds very still

2. Winds (from Weather Bureau)Furnished by Weather Station NAS Glenview, Ill.

Surface	220	Degrees	06	Kts
Aloft 6,000	270	"	12	"
10,000	290	"	12	"
16,000	310	"	20	"
20,000	360	"	12	"
30,000	020	"	25	"
50,000	330	"	20	"
80,000	Not available			"

3. Ceiling Clear
4. Visibility 6 miles in haze
5. Amount of cloud layer 0/10 - None
6. Thunderstorm in area and quadrant in which located None
7. Vertical Temp Gradient SEA +19°C / 850MB +14°C / 700MB +9°C / 500MB -5°C
300MB -40°C / 200MB -55°C. Freezing Level 14,000 ft.,
Stability Index +6.

H. Did you notice any unusual activity or conditions, meteorological, astronomical, or otherwise, which might account for the sighting "Swift" comet (saw pieces of this which appeared as a falling star.

L. Did you take any photographs? No
Do you know of any existence of physical evidence of materials? None

INITIALS EMH

ADDITIONAL REMARKS BY OBSERVER: Also observed by [redacted] wife, age 37 and [redacted] neice, age 16.

COMMENT: [redacted] appeared to be calm about this. He was looking at the "Swift's" comet at the time. He definitely felt he saw something unusual. Although to this reporter the coloration of flashing red, green, white gives the impression this could have been an aircraft, the duration of this sighting seems to discount this. The observer did not appear to be hesitant of what he saw.

Attention: [REDACTED]

Gentlemen:

This will confirm my telephone conversation with one of your principles of this morning in which we reported the sighting of what we would classify an unidentified flying object.

The sighting was made by Mrs. [REDACTED], and Mr. [REDACTED] at [REDACTED], Prospect Heights, Illinois, at approximately 12 p.m. last night, August 11, and the object was viewed for approximately two hours, or until 2 a.m., August 12.

The first reaction upon sighting was that it was a plane a long distance off and approaching directly with a red flashing light on the left, a green flashing light on the right, and what appeared to be a white flashing light in the center.

It was located almost due northeast and approximately 30° above the horizon. Over the period of two hours, it moved approximately 20 degrees east and 30 degrees up. At the final viewing, when we decided to quite and go to bed, it was located what I would say to be north -- 65 degrees east and 60 degrees above the horizon. It still appeared to be the same in figuration, although at such distance it was not possible to determine any shape; and at a distance almost comparable to a star, except that you could very definitely see the red, green, and white flashing lights.
