k. Comments of preparing officer:

The [REDACTED] family appeared hospitable and cooperative, answering all questions asked without drawing any conclusions. The children were well informed on UFO sightings in and around this area and had read numerous books and newspaper articles on the subject. The parents stated that the object did not appear to be a meteorite or an airplane since in their opinion it was slower than the former and faster than the latter. Amarillo Approach Control radar and the 688th AC&W Squadron had no contact with the object. Since there are no airways in the vicinity, the probability of the object being an aircraft is slight. In the opinion of the investigating officer, the object was either a large meteorite or a satellite.

3. The information on the sighting at Andrews, Texas, is identical to that listed above with the following exceptions:

- b. (3) About 20° above horizon
- (4) A straight line from northwest to southeast.
- (5) Disappeared into a cloud bank.
- d. (1) 1100Z ⁵ August 1965
- (2) Dawn ⁷ 10-15 SECONDS
- e. 32° 20' N, 102° 32' W, Andrews, Texas.

I would like to report (2)

UFO sightings

1st sighting

Date - August 7. Time - a little after 3:00.

Direction - Drifted - NW to SE

Speed - 1000-1500 ft/sec.

Appearance - white blinding light

7-10 ft. in diameter, out of sky and about

100 ft. in diameter. Blinding in my house

then considered by a friend, about

200 ft. I lost sight of it when

cloud bank, to the SE

and sighting.

Atch 1

Date - August 12, 1946 - 9:10 PM

Direction - Sprawled - NE to SE

Place - a farm NE of Happy, Texas

Description - a white light traveled
over the sky in 10-15 seconds

Very clear night. I lost sight
of it in the SE when I looked
away.

The first was sighted by my
brother and myself. The second
by my father, my brother, my
mother, and myself.

I believe these were not
airplanes nor satellites because
of their nature and speed.

Thank you very much for
your time.

Sincerely,
