UFO Sighting, Pike County, Missouri

Hq USAF SAFOICC (Mrs Hunt)
Wash D C 20330

1. Reference the attached unidentified object report from [REDACTED]. The sighting of objects on the nights of 26 July and 4 September 1965 are similar to many reports in our files of helicopter observations. The slow flight, including portions of hovering, the whoosh sound and the apparent erratic fluctuation of the red light is characteristic of these reports. The intensity as well as deviation in appearance at a regular interval is caused when the aircraft is in a turn or at an angle when the light shines through the "bubble" or open portion of the craft. It's quite likely that Mrs. [REDACTED]'s landmark, which is located on aviation section charts, is used as a reference point in cross country flights.

2. We had no unusual reports from Pike County, Missouri during this period. The ADC reported no unidentified tracks from her area. Helicopters on flights of this nature could be flown by the Air National Guard, Navy, Army and/or other military units within a radius of 150 miles. In view of the reported characteristics and delay of the submission of her report no attempt will be made to identify a specific flight.
