26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

LIKE NOTHING I'VE EVER SEEN

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

NO

31. Was anyone else with you at the time you saw the object? (Circle One) ☒ Yes ☐ No

31.1 IF you answered YES, did they see the object too? (Circle One) ☒ Yes ☐ No

Saturday Sept 25, 1965

The object was first spotted approximately at 9:30 AM over the horizon in the northeast. At first it appeared to be a bright star, but a closer look proved otherwise. It was a brilliant blue-white light. At times it would flash a red glow so that what appeared to be cloud formations could be seen around it. However, it was a clear night and there were no clouds. These red flashes lasted about 3 seconds. At times it seemed to flash more of a blue-white light. The object had the ability to move to the right or left or in a small arc. It dropped down in the sky and an air plane appeared. Three red dots came from the object one after the other. One and three red dots went after the plane. Number two red dot bounced through the air and returned to the object. The other two dots continued on. They either attached themselves to or followed the plane closely. Later they returned and stationed themselves near the bright object. The object turned at an angle and rose a little higher in the sky. It then resumed former shape and angle. A second plane approached. As the plane passed the object the object vibrated, became much brighter, and acted as though there had been an internal explosion. A dull red glow again like what appeared to be cloud formations as it did when the red dots were fired. The object darted toward the plane, stopped, and fired one red dot which followed the plane. The object remained for a short while longer. It then seemed to move backward a short distance and rose into the sky until it appeared to be.

nothing more than a bright star. This happened about 10:20 or 10:30 PM.

Sunday Sept. 26, 1965

Approximately 7:45 PM, the bright object was noticed in the northwest ~~above~~ the horizon. It moved slowly northward, hovered for a while and then began to descend down toward the horizon. The object hovered again for a short time, descended to the horizon and moved slowly along the horizon to the north. The object hovered once more for a short time and then disappeared down over the horizon.

Mr. [redacted] and Mrs. [redacted] went to look for the object. As they drove up over a hill they spotted it to the south west where it hovered on the horizon of another mountain. The object then disappeared in the same manner as before. In the mean time Mrs. [redacted] and I saw it back on the horizon in the same place where it had disappeared the first time. It then disappeared in the same manner as before. About three quarters of an hour later, we thought we saw it to the north and moving skyward.

Mrs. [REDACTED]

Dear [REDACTED],

Reference your recent unidentified observation. The information which we received was not sufficient for evaluation. Request you complete the attached FTD Form 164 and return it in the envelope provided.

We wish to thank you for reporting your observation to the Air Force.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Project Blue Book

Mr. [redacted]
[redacted]
Cogan Station, Pa

Dear Sir,

I filled out the form you sent, but since the object was more than once by more people other than myself I thought you should be informed.

Mrs. [redacted] of [redacted] Cogan Station was telephoned by me on Saturday Sept. 25th and asked to take a look at this object which she did. She also saw another object nearby which acted somewhat like the object Mrs. [redacted] and I saw. On Sunday night Mrs. [redacted] brother-in-law, my husband, and Mrs. [redacted] husband saw the object.

The report on the back pages of the form was actually written the day before we received the form. Mrs. [redacted] and I wrote the report for our own record.

On September 27th and 29th in the evening ~~we~~ Mrs. [redacted] and I saw some interesting moving

objects in the sky that moved
in an irregular pattern across
the sky. We would like to know
who we could talk to or where
we could find more information
about these objects. We have many
questions we would like to have
answered and would appreciate
any help you could or would
give us.

It is difficult to put down
in words what has been seen.
I hope the information I am
sending is sufficient or at least
of some help.

Sincerely yours,
Mrs. [REDACTED]

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

14. Did the object disappear while you were watching it? If so, how? NO

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't Know.

IF you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound WAVE

b. Color BRIGHT BLUE - WHITE

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head? ABOUT 3/4

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.
