

MEMO FOR THE RECORD

EE

Lt Logman from Selfridge Air Force Base, Michigan, called on 15 November 1965.

He said that a bright light has been observed over Lake Erie for several weeks. He wanted to know if flares have been dropped in the area.

Sgt Moody told him that we could do nothing about Canadian reports.

1. Mr. [REDACTED], Chatham (Ont., Canada) Daily News contacted this office 15 Nov 1965 requesting information on the following sighting:
2. For the past two weeks, between 1900 and 2000 hours, individuals from an area along Lake Erie about 50 miles east of Windsor, Ont., and 15 miles west of Cedar Springs, Ont., sighted a bright light on the horizon. This light, bright with a touch of red, seemed to glow up, dim out, and move slightly horizontally and downward, and disappear, according to his description. He stated that numerous individuals have reportedly seen this object, and that the RCAF investigated after initial sightings lead to the conclusion that a plane had crashed in the area. He also stated that each evening the object was seen was extremely clear.

For the Commander,

Jerome P. Lagemann
