35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

To begin with I saw these lights while I was waiting for my wife and son to come out of the doctor's office. I was looking up in the sky. I first noticed the 8 lights and they were in the form

0¹0²0³

I watched them for some time as the big light seem to have a red light blinking on it. The next thing I noticed was the number 1 light started moving down toward number 2 light. I thought it was going to hit the number 2 light but it stopped along side of it and stayed there about 5 minutes. Then at the same time that number one and downward number two moved up and it stopped in the number one place. Number two moved on down below the big light about 100 feet below it and that is where it stopped. My son and myself watch these things just about every night.

Three night Jan 4th 1966 the sky had several of these lights up in it and we also saw a big light near the top of mountain.

(over)

top of a mountain that we have have called
Round Top the light was a sort of a big yellow
light that would go off and on and also move
up and down, the light was about 50 feet
~~above~~ above the top of the mountain we watched
it for about 1 hour and it finally went out

I certify that this is all
true and I stand by the
best of my knowledge
Signed
yours truly
