

PROJECT 10073 RECORD

1. DATE - TIME GROUP 21 Mar 66 22/0030Z	2. LOCATION Cambridge, Mass. PA.
3. SOURCE Civilian	10. CONCLUSION AIRCRAFT
4. NUMBER OF OBJECTS Two	
5. LENGTH OF OBSERVATION ?	11. BRIEF SUMMARY AND ANALYSIS Two peculiar lights came out of the east traveling west and disappeared in the southwest. During the time of the sighting the observers heard a steady humming sound. Lights were bright red in color at first. Then the object looked like three sections one red, one white, and one green.
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE West	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No	2 Witnesses

March 28, 1966

United States Air Force
Washington, D.C.

Re: U. F. O. s

Gentlemen:

I don't know exactly ^{to} whom this letter should be addressed but perhaps it will be given to the correct individual. I don't ordinarily write to anyone concerning such a subject so you can see why I am uncertain about where to write.

You no doubt receive countless letters concerning sightings of "Unidentified Flying Objects", with many of the sightings explainable. I had always said of such things, "When I see one, I'll believe it." Well, I would still like to see an actual "Flying Saucer", though I am convinced that there are some sort of flying objects which do not fit the pattern of things, as known to the every-day person anyway.

Last year, a mother and her daughter, who live 6 or 7 miles from here, saw what was described as a flying saucer while driving home. Another lady who does cleaning work at Alliance College (where I am cashier-accountant) has seen saucers numerous times, in approximately the same area each time.

Now, even though I cannot say I have seen any actual saucers or even any defined shapes of objects, I have seen some strange lights that do not fit the pattern of any planes, helicopters, etc. that I have knowledge of. On March 21, 1966 from about 7:35 P.M. until 8 P.M., my two daughters and I watched two peculiar lights which came out of the east, travelled west and then disappeared in a southwesterly direction. During the time of sighting we could hear a steady humming sound, which did not seem to increase or decrease in pitch.

When I first saw the objects, they were bright red and as they travelled they changed from red to red and white, to white, to a sort of green and back to red again - not blinking lights but slowly changing lights. The only way I can explain it is if it were a round object with possibly three sections - one red,

one white and one green - and as it turned out would see the various colors.

Two Alliance College students also reported seeing the lights; a local business man also saw them at approximately the same time from an area about one mile from where I saw them; and a number of Edinboro College students in a small town six or seven miles from my home also saw these same lights on this same date.

Perhaps these reports have no value but I feel there is always the chance they may be important and should at least be noted.

If I can be of any service in contacting any of these people, please call on me at any time.

Very truly yours,
