Gentlemen:

On the night of March 24 (a very clear, but dark night) at 10:45 p.m., my sister and I were on our way home when we spotted unusual twin lights which were almost centered over the road ahead of us. Our curiosity aroused, we continued into the next block instead of making a right turn where we ordinarily would have to get home. We continued slowly for about a half block, watching whatever it was, at which point we found ourselves directly beneath the object. We then came to a stop and discovered that the object had also stopped moving. We gazed at it for 164 seconds.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

When we first sighted the object, it was about 1 block ahead of us. At this point it appeared to be two white, bright lights. When we were beneath it the span between the two lights seemed to be equal to a large airplane. The lights did not flicker or flash at this time. After gazing at the object we could make out hairs from the lights, or possibly was the outline of it.

We were the only moving vehicle on the street at the time. When it appeared again it seemed it may have circled around to pass over us again. Now we could see numerous lights, mostly white but some red and green. Many of these lights were flashing in a most indefinite way. The object at this time was approximately the same height as shown on diagram page 5, at 15° on curved line.

upward in amazement. We saw
two bright, white lights, the span
between which seemed to be like
that of a large airplane. Above each
white light were glowing flames -
one red in color, the other green - which,
by the silhouette, seemed to be contained
within a bowl shape base. I was
not driving, so I concentrated on ~~the~~
adjusting my eyes to try to distinguish
any features. The object seemed to be
just high enough to clear the tree tops
and houses; yet all I could make
out was either an outline of the form or
two bars - whatever it was that
formed a shallow V shape.

There was also a smaller, dimmer light visible at
the bottom, or possibly it was more to the rear.

A weird feeling came over us, especially since we were the only people on the street and in the only moving vehicle on the street at the time. We had the feeling it might descend and became a little afraid. Then we drove to the next corner, turned right, and continued for about a half block; there we parked so as to watch from a safe distance; but now it seemed to have disappeared. While we were wondering about the disappearance, we were completely surprised when the large object came from behind us and passed over us approximately 50 ft. above ground level. Now it seemed that it might have circled around to pass over us again. Now we could see numerous lights, mostly white but

some red and green. Many of these lights were flashing in an indefinite pattern. We heard no sound at all coming from it at any time, and we watched for approximately one minute as it flew very low across our city from south to north and disappeared from view.

We then went home and reported the sighting to our local police. We know of at least one other person who reported a sighting on the same night.

The first thing that caught our attention was a "pair" of bright, white lights.

When we got beneath the object we could see that the span between the lights was approximately like the span of the wings of a large airplane. At this time all the lights as depicted in drawing on page 3, no. 19, were not flashing but were steady. We are not sure whether the shallow V shape we could make out was two bars or an outline of the object.

We were the only people on the street at this time.

The object did not disappear while we were watching it, but after we moved to a different location we could not see it where it had been before and thought it did disappear. We were amazed when it re-appeared from behind us, (from opposite direction we were watching) flew right over us just above the treetops, flew very low across the city and disappeared from view. At the time of this second sighting there were more lights, mostly white, some red and green. This time the lights were flashing in an irregular pattern.
