26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

If the body of a helicopter had a huge blinking light enclosed in the glass dome. This was my very first impression, then I suddenly realized it couldn't possibly be a falling plane or helicopter or weather balloon because of the huge red light. I thought it was going to crash immediately in the windshield and roof of the car. At that

time I quickly applied the brakes so it would miss us, but then it stopped the sudden drop and glided around to the side of the car.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

I have never in all my life seen anything like this.

31. Was anyone else with you at the time you saw the object? (Circle One)

Indicate any additional information about yourself, including any special experience, which might be pertinent.

I have had no experience in connection with this, other than the one explained. I am of sound mind and body, I don't take any medicine other than prescription probably twice a year when the flu comes around, normal intelligence, my imagination never gets all carried away. The only time I get real upset is when one of my babies are sick, then I worry and fret, and lot of times cry out of grief for them, wishing it were me that was sick instead of them, very tender hearted.

33. When and to whom did you report that you had seen the object?

Year

shortly after sighted, early in the A.M. approx. 12:20 To a highway patrol.

14. Did the object disappear while you were watching it? If so, how?

YES, It seemed to fade out

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes ☒ No Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes ☒ No Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound none

b. Color white light like a star

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Part of it would be covered, but you could see the light all around the head of the match

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

 this is what the object ~~he~~ looked like only it was ~~what~~ white

34. Date you completed this questionnaire:

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Doris and I were discussing outer space objects earlier probably twenty minutes before we saw it. ~~The~~ During the conversation Doris said, "Kid just what would anybody do if any thing from outer space landed on earth?" I then told her I wouldn't be afraid, it would be fun to meet someone, or hide and watch, that I would never attempt violence. I would like to be the one to make friends with them.

From this I think the UFO can tune-in on a conversation. Otherwise why us, and while we were talking ~~we~~ would be on friendly terms in such a case, but as it turned out we were both afraid and wanted to get away from it. That is why while we were watching it I turned out the lights, except for the park lights, so that it wouldn't see us, for fear it may do something to us.
