

PROJECT 10073 RECORD

1. DATE - TIME GROUP 25 Apr. 66 26/0200Z	2. LOCATION Baltimore, Maryland one witness
3. SOURCE Civilian	10. CONCLUSION Other(Birds) <i>Very prob. ✓</i> <i>gft</i>
4. NUMBER OF OBJECTS 200 plus	
5. LENGTH OF OBSERVATION Varied	11. BRIEF SUMMARY AND ANALYSIS
6. TYPE OF OBSERVATION Ground Visual	Observer watched ten different groups of objects flying in a "V" shape formation from east to west. There were approximately 200 objects in all; each group was at a different altitude.
7. COURSE westward	The description is consistent with that of a bird sighting. Contact with the control tower at Friendship Airport, Baltimore, Maryland, but they had no visual sightings of the same or similar objects.
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No	

appeared to maintain the same altitude from the time they were spotted until they disappeared from our line of vision.

It seems that there was a reason behind their pattern of flying at progressively higher altitudes as the night went on. It appears to indicate that they were purposely avoiding the direct rays of the sun to prevent their being easily seen. It did not appear that the purpose of their flight was to observe the earth's surface because they were travelling very swiftly and all in the same direction, as though they had some common destination. Assuming that they were inhabited at all seems rather far fetched. However, to anyone who saw them I am sure this possibility is not too unbelievable.

Mrs. [REDACTED]

I have drawn the diagrams so clearly
as I possibly could, for the hope that
they appear. The number of objects
in the larger groups is merely a
close estimate.

1. First sighting when it was directly overhead
2. First sighting as it moved toward the
western horizon.

3. General appearance of formation in
sightings 2, 3, 5, 6, 7 and 8, all of which
appeared to contain about twenty objects.
The largest of this diagram is almost as
apparent to the eye as the objects in
the sighting 7 which, as I mentioned in
the report, was the clearest of all
since it was directly overhead.*

4. General appearance of the two sets of
pairs of objects which went over the
groups 4 and 8.

5. Last sighting when it was directly
overhead. As I mentioned before it was
the largest group of pairs and at the
highest altitude.

* Even though the objects in the first sighting were at a lower
altitude, they were not as clear as those in sighting seven. The
reason for this is that the objects in the first sighting were at a lower
altitude than those in the other sightings, and the objects in the first sighting were at a lower
altitude than those in the other sightings.

IN REPLY
REFER TO:

June 20, 1966

Colonel Eric T. de Jonckheere
Deputy for Technology and Subsystems
Department of the Air Force
Headquarters Foreign Technology Division
Wright-Patterson Air Force Base
Ohio 45433

Dear Colonel de Jonckheere:

Reference is made to your letter dated June 17, 1966, subject:
UFO Sighting, 25 April 1966, Baltimore, Maryland.

At 0015 GMT, April 25, 1966, a Controller on duty in the Tower reported "a bright greenish-white fire ball with orange tail observed north of the airport descending". This was also reported by pilots of several aircraft in the vicinity. Subsequent newspaper stories indicated that it was identified as a comet. For verification we suggest you check with the United States Weather Bureau.

No other unusual objects were reported.

Sincerely yours,

F. A. Kane, Chief
Baltimore Tower

Al-ten

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

25 April 1966
Day Month Year

2. Time of day: 9:00 (APPROX. TIME OF FIRST SIGHTING)

Hour Minutes
10:30 (APPROX. TIME OF LAST SIGHTING)
(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): (a.) Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): (a.) Daylight Saving
b. Standard

4. Where were you when you saw the object?

[REDACTED] Baltimore Maryland 21218
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

Hours Minutes Seconds

a. Certain

c. Not very sure

b. Fairly certain

d. Just a guess

5.1 How was time in sight determined? _____

5.2 Was object in sight continuously? Yes ✓ No _____

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
(a.) Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- ☒ c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- ☒ d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- ☒ a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- ☒ a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- ☒ a. Solid
- b. Transparent
- c. Vapor
- ☒ d. As a light
- e. Don't remember

(It appeared as a solid object glowing within itself or reflecting light - not sure which)

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- ☒ a. Brighter *(except for the full moon)*
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

They were like smaller versions of the full moon on a very bright night

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - ☒ c. Sharply outlined
 - d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- | | | | |
|---|-----|-------------------------------------|------------|
| a. Appear to stand still at any time? | Yes | ☒ No | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes | ☒ No | Don't know |
| c. Break up into parts or explode? | Yes | ☒ No | Don't know |
| d. Give off smoke? | Yes | ☒ No | Don't know |
| e. Change brightness? | Yes | ☒ No | Don't know |
| f. Change shape? | Yes | ☒ No | Don't know |
| g. Flash or flicker? | Yes | ☒ No | Don't know |
| h. Disappear and reappear? | Yes | ☒ No | Don't know |

14. Did the object disappear while you were watching it? If so, how?

No. The objects simply moved out of sight over the houses and trees to the west.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what in front of: _____

17. Tell in a few words the following things about the object:

a. Sound *There was no sound that I could hear*

b. Color *The first 8 objects, which were largest (or closest), were orange colored. The rest of them glowed with a white light.*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

So many objects were sighted at seemingly different altitudes that it is hard to answer this question. The first sight object, would only be about 1/20 covered by the match head. The others ranged from 1/5 covered to just about the same size as the head.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

☒ No

Except that they travelled much more swiftly than any plane I have ever seen.

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

☒ No

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object?

(Circle One):

a. Inside a building

b. In a car

☒ c. Outdoors

d. In an airplane (type) _____

e. At sea

f. Other _____

23. Were you (Circle One)

a. In the business section of a city?

☒ b. In the residential section of a city?

c. In open countryside?

d. Near an airfield?

e. Flying over a city?

f. Flying over open country?

g. Other _____

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

☒ No

e. Binoculars

Yes

☒ No

b. Sun glasses

Yes

☒ No

f. Telescope

Yes

☒ No

c. Windshield

Yes

☒ No

g. Theodolite

Yes

☒ No

d. Window glass

Yes

☒ No

h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

Due to the fact that their shape changed from circular to elliptical as they moved nearer the horizon, I would say, in spite of the familiarity, that the objects were shaped like two saucers, one inverted over the other.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

A ————— B

This was not true of each individual object but of each group of objects in V formation, as a whole. Each individual object in the formation weaved slightly in different directions showing that they were not attached. However they never actually broke formation.

29. IF there was MORE THAN ONE object, then how many were there? about 200

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? (Circle One) ☒ Yes ☐ No

31.1 IF you answered YES, did they see the object too? (Circle One) ☒ Yes ☐ No

31.2 Please list their names and addresses:

*Mrs. [REDACTED]
[REDACTED]
Baltimore, Maryland 21218*

32. Please give the following information about yourself:

(MRS.) [REDACTED]
NAME [REDACTED] [REDACTED] [REDACTED]
Last Name First Name Middle Name

ADDRESS (NEW ADDRESS) [REDACTED] AVE BALTIMORE [REDACTED] MD

(OLD ADDRESS) [REDACTED] RD BALTIMORE, MD. 21234
AT TIME OF FIRST REPORT

TELEPHONE NUMBER [REDACTED] AGE 20 SEX F

Indicate any additional information about yourself, including any special experience, which might be pertinent.

33. When and to whom did you report that you had seen the object?

Day Month Year

*I sent the report to
the Air Force and to
NORCAP on the same day.*

Baltimore, Md

Dear Mrs. [REDACTED]

Reference your unidentified observation of 25 April 1966.
The information in your letter was not sufficient for
evaluation. Request you complete the attached FTD Form
164 and return it in the envelope provided.

We wish to thank you for reporting your observation to
the Air Force.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF
Chief, Project Blue Book

34. Date you completed this questionnaire:

July 1966
Day Month Year

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

The questions that you asked were very difficult to answer. As I said in my original report, there were a great number of objects sighted in groups ranging from 8 to about 40 or 50 objects. These groups flew directly from East to West and appeared at unevenly spaced intervals ^{of time}. They also flew in roughly a V or boomerang shaped formation. During the roughly one and one-half hours of sightings, the objects appeared to fly at progressively higher altitudes*. There were ten groups in all.

The answers that you request in this form are actually referring to one object or several objects at one sighting. I hope that the answers I have given are not confusing and that they are adequate to complete the information that you need.

* As the altitude of the object groups progressively seemed to become higher, the size of the objects seemed, of course, to diminish. At the same time the groups seemed to travel more slowly. This is the reason I was not able to answer question # 5. The first group of objects were in sight no longer than about three seconds, but as the night went on, the sightings became longer until, at the final sighting they were in view for about 30 seconds.

BALTIMORE, MD 25 APR 66 2200Z 66

TDEW

UFO Sighting, 25 April 1966, Baltimore, Maryland

JUN 17 1966

FAA

Friendship Airport

Baltimore, Maryland 21240

1. This office is in receipt of an unidentified flying object report regarding a sighting in the Baltimore area on 25 April 1966. Between 2100 and 2230 EDT an observer watched ten different groups of objects flying in a "V" shape formation from East to West. There were approximately 150 - 200 objects in all; each group was at a different altitude.
2. From the available information we feel that birds are responsible for the sightings. Information is needed from the radar section as to whether they had anything on radar that would resemble birds. If there was anything unusual on radar for that night we would appreciate knowing about it. If there was nothing unusual on radar for that night we would like a statement to that effect.

April 26, 1966

Dear Sir:

I am writing to report an observation of unidentified flying objects that my mother and I made on the evening of Monday, April 25. This sighting is not the same as the widely reported meteor sighting of the same night. The objects that we saw appeared later in the evening.

Attached is a detailed report of my observations which took place between 9:00 and 10:30 on that evening. I have had a great deal of difficulty in finding out if anyone else in the Baltimore area saw these objects besides my mother and I. The sky was so brilliantly clear at the time of the sightings that it is hard to imagine that no one else saw them. I had an equal amount of difficulty in reporting my observations by phone to the proper authorities. As a matter of fact, I was not able to find out until today who the proper authorities are. I am sure this is due to the fact that you were literally swamped with phone calls from the persons

(Send 164)

with respect to the flame object
later identified as a meteor

The observations I made were
very clear and I assure you that

my report contains no misstatements,
as you will realize upon reading it.
I admit to being slightly skeptical
at times but I am afraid that what
I saw last night cannot be passed
off as swamp gas or any particles
of a meteor. When fully taken
into consideration the shape, speed,
number, direction, path and flight
formation of the object shows an
unmistakable intelligent control
and a definite pattern

I sincerely hope that this report
will be of some interest to you. I

would greatly appreciate it if you
would send me a note acknowledging
the fact that you received and read
my observations and containing some
of your own comments regarding the
it. I would also like to know if any
conclusions regarding the report in
this area. I am sure you will
understand my curiosity and my
desire for any information that
you have on the object I saw.

Sincerely,
Wm. G. [redacted]

April 26, 1966

On Monday, April 25 I was
visiting my mother at her home
in the vicinity of Memorial Stadium
in Baltimore. At about 7:00 that
evening we went outdoors for a
walk. While walking I remarked
on the extreme clearness of the
air. At which time I looked up and
saw eight circular objects moving
from east to west. I
cannot judge as to their altitude
each appeared to be about
the size of a quarter. They were not
very bright and there were
no lights on them as far as I could
tell. The very slight glow emitting
from them was most likely caused
by reflection of the sun's rays.
They appeared to be made of a
solid substance and their
color was like bronze. They flew
in roughly a V-formation, but a
wide V, somewhat like a boomerang.
The flight of the formation as a
whole remained smooth and it
moved very swiftly in a straight
line. Each individual object traveled
with a slightly erratic movement,
but not a jerking one, completely
independent of the others. In spite

...only these. The green
...throughout the
...heights. I observed
...to almost a
...at times. As the
...toward the western
...their shape became more
...until they faded
...I they did not make
...and that I could

...shocked by what
...by the time I was able
...my mother's attention to
...were nearly gone and
...only a shadowy movement
...kept a close watch on
...that they might
...about three minutes
...a second group of objects
...toward the north but
...from east to west. This
...was at a higher altitude
...and an increasing
...glowed
...the first
...than
...the same
...there were
...In about four
...sighted another

formation of about twenty at
approximately the same altitude
as the second. A direct line from the
group camp four more objects were
seen. Although they
were placed at the same altitude
as the second group but not as
they were travelling much more
simply as it is taken up with the
formation just ahead of them.
The material the day very cloudy
between 9:00 and 10:30 and was
seen group well, amounting to
between 150 and 200 of the entire
objects. One of the group were seen
up of about twenty objects each and
as the night went on they seemed to
fly at a progressively higher altitude
than was in the group of four
travelling in pairs that appeared
the night lighting in the same manner
as the other eighting hour. The second
group was the clearly partially
seen at an altitude of 2000 ft. The
first group was the largest of the
highest altitude. All the group that
we saw travelled directly from east
to west although there was some
variation in their path from north
to south each individual group
