1. DATE - TIME GROUP 1 Apr 66 1/0900Z	2. LOCATION Bristol, Vermont
3. SOURCE Civilian	10. CONCLUSION Astro(MOON) <i>Very prob. . .</i> ✓ <i>jet</i>
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 10 Minutes	11. BRIEF SUMMARY AND ANALYSIS Object was sighted in the west or Northwest about 100 feet above the horizon. It was a big round object, Red in color and glowing. It lowered to tree top level then faded out about 10 minutes after it was first sighted,. Could have been the star REGULUS which was at 285 deg. Az, 0-5 deg. elevation at that time. However they reported its size to be the size of a silver dollar held at arms length which would be too large for a star. The moon was setting at the time of the sighting. This seems more logical because of the size size and the red glowing color.
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE Stationary-Down	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No	3 Witnesses (Corkins)
