35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was skeptical at first - because of all the claims to sightings in Michigan - This was shortly thereafter - and they had been well covered in the press. Naturally, I thought it was a plane at first - banking and catching the early rays of the sun. However, the object appeared to hover in one position for about 30 seconds - then moved away from me, slowly at first - then at what appeared to be a great speed. (diminished in size very quickly) Many things went through my mind in that minute - but especially the fact that, so I thought, the sun hadn't risen enough by that time to reflect off the object - hence the object must be its own light source.

Thank you for your time, sir. If the USAF can afford another stamp - I would appreciate hearing your explanation. Very sincerely, [REDACTED]

My dear Sir:

By nature I do not tend to be an alarmist or a radical. Still, I feel that what I observed on April 5, should be brought to your attention. Because of Easter, this is the first opportunity that I have had to write.

On Tuesday, April 5, at approximately 6:06 A.M. while on my way to offer Mass, I spotted a very unusual aerial phenomenon. There, to the west, was a very bright orange object which appeared to hover 2,000 to 3,000 feet above the ground. It had the shape of a pancake, but thicker in the center with a definite bulge top-side. It stayed in this position about 25 seconds and then receded at apparently a great speed. It lost its size very quickly as it went away from me. It was lost to my vision 4 or 5 seconds after beginning the apparent movement and disappeared behind a horizon of trees.

I have been studying psychology for some time at Xavier University and am well aware of mass suggestability, especially since the recent business in Michigan. Also, I was skeptical because in the direction of the sighting is the glide-path for the Greater Cincinnati Airport. But I have seen a number of planes reflecting the sun as they bank and turn, but nothing like this. Furthermore, I checked the rising sun when I got to the church and decided that the sun's rays could never have been the cause of the orange color. The shape of the object too, did not in any way fit a known aircraft.

Finally, since size is relative to distance, I had no way of judging either. An uneducated guess of the distance would be 3 miles. A 707 at this distance would appear much smaller than this did.

Should you wish to pursue this further I will be happy to give any help I can.

Sincerely,

Re: [redacted] O.F.M.
