

PROJECT 10073 RECORD

1. DATE - TIME GROUP 10 April 66 10/2345Z	2. LOCATION Osterville, Mass (1 Witness)
3. SOURCE Civilian	10. CONCLUSION Astro (METEOR) ✓
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION 5 Seconds	11. BRIEF SUMMARY AND ANALYSIS Observer sighted an object which he described as rectangular, 2 ft long and 1 1/2 ft wide, with 2 blue-white lights on the front. Object traveled a level path and went from 20 deg elev in the north to 20 deg elev in the south in 5 seconds. Investigating officer felt that the object was the exhaust glow off a low flying aircraft. However since the duration was so short and the speed apparently too great and no sound was observed, it is my opinion that it was a meteor.
6. TYPE OF OBSERVATION Ground-Visual	
7. COURSE S	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No
