B. Description of Course of Objects:

1. What first called attention of observers to the objects: The lady was driving East on Route 4 between Paramus and Teaneck, New Jersey. Her husband first saw the object to their left front (10:30 position) and commented "that aircraft is very low."
2. Angle or elevation and azimuth of objects when first observed: 30⁰ above the horizon to the Northeast, moving South.
3. Angle or elevation and azimuth of objects upon disappearance: Horizon obscured object as the auto passed it's position and it fell behind the cars position.
4. Description of flight path: Objects were descending in a glide-path type configuration. The objects were white and projected beams like landing lights. Suddenly the object stopped, the lights went out as if switched off and then came back on appearing dull red in color. The objects then appeared to reverse their course and move back up the glide path course in a climbing attitude.

5. How did the objects disappear: Object was blocked by horizon behind the auto as it proceeded East on Route 4.

6. How long was the object visible: Approximately 5 minutes.
