27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

DIRECTION.

IF HELPFUL, I CAN FABRICATE A MOVIE SHOWING WHAT
I SAW, TO EXPLAIN EXACT MOVEMENT SEQUENCE, AT
YOUR REQUEST.

LIGHTS DID NOT APPEAR SMALLER, BUT RETAINED SIZE

Dear Mr. [REDACTED]

There have been several sightings similar to yours reported to the Air Force during the past year. In most cases, we have found the cause of these sightings to be an aircraft towing an electrical advertising sign.

The Chicago area has a company engaged in this type of advertising. We have found these aircraft advertising a furniture sale, a Ford Motor Company sale, and a Go-Go band. It is difficult to read the message unless the observer is fairly close to the aircraft. These aircraft normally fly at altitudes of 1000-1500 feet, therefore, I would estimate that if the aircraft was a mile from your position, then you would see only the sequential rows of electric lights.

Thank you for reporting your observation.

Sincerely,

HECTOR QUINTANILLA, Jr, Major, USAF

Dear Sir,

Last night I stepped out of my house for my usual walk with my dog. I went to the corner of our block, which has an almost unobstructed view of the southern sky. Looking South, my eyes caught sight of several unusual-looking white lights, all the same size, which appeared to be the approximate size of headlights of automobiles. At first, I thought they were very low airplanes flying in formation, but seconds later, I observed that they were moving in an absolute straight line, from West to East, and much too large to be lights of airplanes. Living in the Chicago area all my life, I have seen quite a few airplanes' lights, but none so large as these. I would estimate height at about one thousand feet, or possibly lower.

One of the strange things about them, which I cannot understand, was that as they were moving, they seemed to change positions. At first, there were five or six lights in a row; seconds later the first of the group would disappear and another appear at the Tail end. Often, as they kept moving, as if going behind a cloud, they all disappeared. Another second later I could see them all again, still moving the ~~the~~ same rate, and then starting the sequence of the first one going out, and then another appearing at the Tail.

I returned my eye to see if there was some object obscuring this row of lights, but I could not make out anything but them.

Traveling in pursuit, it would seem, at the same approximate speed, but much higher, I also saw the white and red lights of an airplane; I cannot remember the sound; if it was not a prop. But this could have been one of the lights from above, coincidentally traveling the same speed and direction.

(3)

First of all, my wife and I have not told anyone of this; I thought it better to write you first.

Secondly, if you have had either another report of this same incident on this same night, or can explain it, I am hoping you can advise me of this, so I can feel a little easier about it.

I believe I have covered everything I can remember about this sighting.

Sincerely,
