REPLY TO
ATTN OF: SMBB

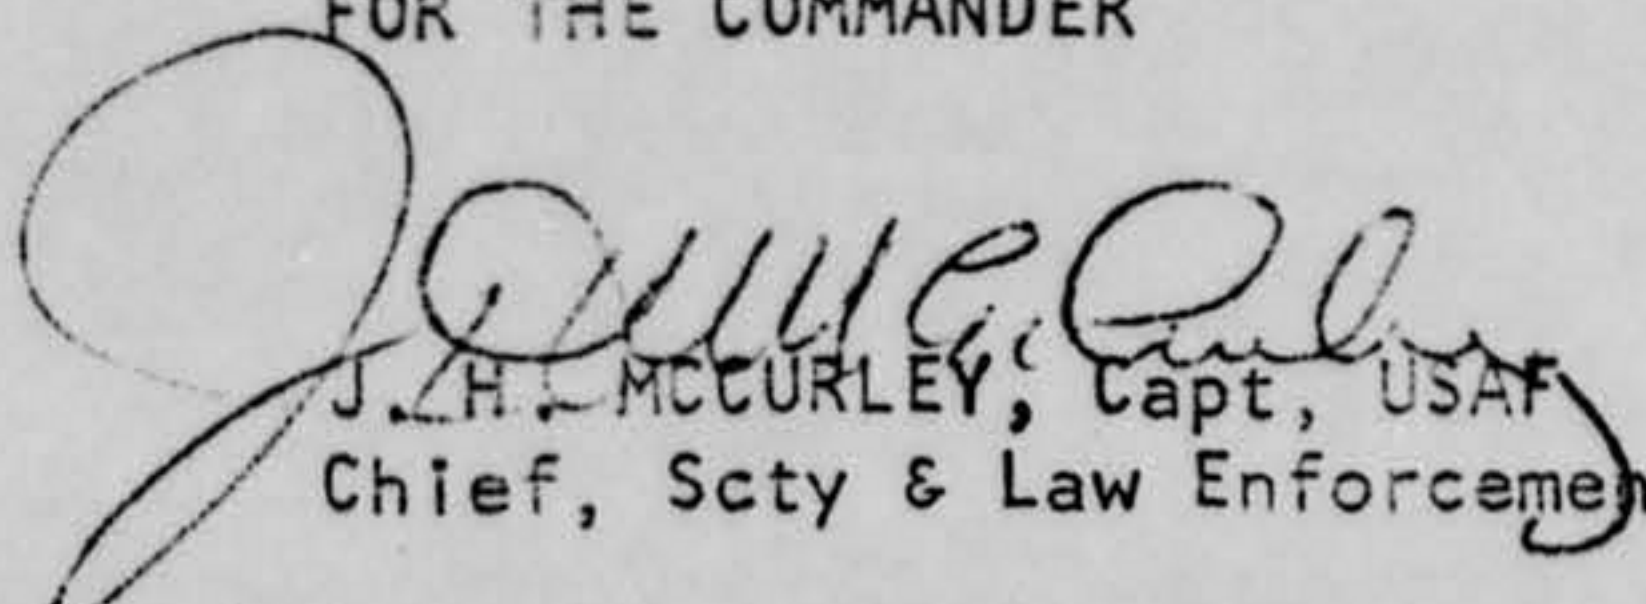

24 AUG 1966

SUBJECT: UFO Report for 19 July 1966 (TDETR Ltr, 2 Aug 1966)

TO: FTD (TDETR)

1. Miss [REDACTED] was contacted as suggested and could give no additional information.
2. The preparing officer, Mr. [REDACTED], made a check with Base Operations and the Control Tower. They revealed no sightings or reports of sightings from aircraft in the area on that particular day. He also checked with the Base Weather Station and there was no weather phenomenon in the area that could have lead to a mirage or reflection type sighting.
3. Conclusions by preparing officer:
 - a. Visual observation from the window revealed the morning star (Jupiter) and another planet that appears near and to the lower left were in the line of sight of [REDACTED]. Due to the time period and length of sighting (3 to 4 hours), it is probable the observer was watching the morning star and the associated planet.
 - b. No justification could be found to associate the humming sound with the lights.
