

PROJECT 10073 RECORD

1. DATE - TIME GROUP 27 Aug 66 28/0130Z	2. LOCATION Leonis, New Jersey 1 witness
3. SOURCE Civilian	10. CONCLUSION Aircraft(possible)
4. NUMBER OF OBJECTS one then two	
5. LENGTH OF OBSERVATION 15 minutes.	11. BRIEF SUMMARY AND ANALYSIS Observer watched a star like object travel across the sky. The object moved in zig-zag jerks like a water bug. When the object came close to the moon it disappeared. At the same time in another part of the sky two additional objects appeared. These objects made little progress across the sky, but they would separate then draw back together. This lasted about 15 minutes before disappearing completely. The witness lives in a high density aircraft area. The description is consistent with that of an or possible several aircraft observation.
6. TYPE OF OBSERVATION Ground Visual	
7. COURSE N/A	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No

Wright-Patterson Field
Ohio -

On the night of Aug. 27-6
at Doylestown Pa -

Bright moon light, very
few stars showing.

Between 9:30 and 10:30
a large star-like object
appeared in sky -

Position clock twice

It moved in zig-zag jerks
like a water bug - when
it came just below the
moon it disappeared. It
was watched constantly

At same time at 11:25
position two smaller
ones - made little progress
cross the sky, but
would separate then
draw together - This
lasted about 15 min
then disappeared entirely

Most interesting -

~~Very dark~~
