

PROJECT 10073 RECORD

1. DATE - TIME GROUP 30 August 66 31/0030Z		2. LOCATION Alley Springs, Missouri <i>Multiple</i>	
3. SOURCE Civilian		10. CONCLUSION Balloon	
4. NUMBER OF OBJECTS One			
5. LENGTH OF OBSERVATION 90 minutes		11. BRIEF SUMMARY AND ANALYSIS Observers noted round object about the size of a marble. The color was silver that later changed to orange. Object was visible for 1½ hours before disappearing toward the west. The object was seen by many people and some said that it looked like a balloon. A balloon was launched by Litton Systems Incorp. of Minneapolis, Minnesota on 24 August 66. The balloon dropped its package; however, it did not function properly and the balloon went toward the south for the next 10 days. This balloon was over the southern Missouri area on the 30 August 66. Balloon was confirmed by B 52 pilot over eastern Arkansas.	
6. TYPE OF OBSERVATION Ground Visual

DIGEST Mr. Little called concerning the balloon and we discussed it briefly. He stated that Mr. Flener had been designated by Dave Thomas to be the one to keep an eye on the situation and take whatever action was appropriate. Mr. Little asked that Memphis Center work closely with Fort Worth and Houston to supply Mr. Flener and Control Central with current information. Mr. Flener would like to know immediately when any of the following conditions occur: 1. If the balloon descends at any time below 45,000 feet. 2. The instant it reaches the coastline. 3. If at any time we lose contact or are unable to determine where the balloon is. 4. Advise Mr. Flener if balloon moves substantially further south or west. The Watch Supervisor should determine from Fort Worth and Houston Centers, and GCI, the location of the balloon, including height. The Watch Supervisor should check for current information as to location once each hour so that this information will be available for Mr. Flener, if asked for. Mr. Little stated that FAA will trust GCI for location and painting of the balloon tonight instead of aircraft maintaining a watch. Watch Supervisors are requested to notify Mr. Flener immediately concerning Items 1, 2, and 3 above, or any other information considered significant. Also, significant information should be forwarded to Mr. Wyatt Lewis for the Area Office.

AN ADVISORY TO BE ON THE LOOK FOR A WEATHER BALLOON BUT AT NO TIME
COULD HE SEE THE BALLOON. CAPTAIN HERRIG ALSO ADVISED THAT AT
APPROXIMATELY 31004Z AUG WHEN HIS ESTIMATED POSITION WAS APPROXIMATELY
60 NM SOUTH OF ST LOUIS, MISSOURI HE RECEIVED AN ADVISORY FROM
THE KANSAS CITY CENTER TO BE ON THE LOOK FOR A WEATHER BALLOON WHICH
PAGE 4 RUWGHU 1317 UNCLAS

HAD BEEN RELEASE AT ST. LOUIS. CAPT HERRIG ADVISES THAT HE SAW THE
BALLOON AT THIS TIME.

AN EXAMINATION OF CAPT HERRIG'S FLIGHT ROUTE INDICATES THAT HIS AIR-
CRAFT TURNED SOUTHWARD AT THE ST. LOUIS VORTAC AT 310035Z AUG
WAS ABEAM AND APPROXIMATELY 10 NM TO THE WEST OF THE FARMINGTON,
MO VORTAC ON A TRUE HEADING OF 176 DEGREES AND AT AN ALTITUDE OF
37,000 FT AT 310042Z, AND WAS APPROXIMATELY 6NM SOUTH OF POPULAR
BLUFF, MO AT 310055Z AUG.

AT 011430Z SEP, MAJOR JOHN C. GODFREY, 97BW COMMAND POST ADVISED THAT
HE HAD RECEIVED AN ADVISORY FROM MEMPHIS CENTER THAT A WEATHER BALLOON
WAS IN THE AREA. MAJ GODFREY FURTHER ADVISES THAT AT 010000Z SEP HE
OBSERVED A WEATHER BALLOON FROM A POSITION APPROXIMATELY HALF WAY
BETWEEN MEMPHIS, TENN AND BLYTHEVILLE AFB, ARK. MAJOR GODFREY ESTI-
MATED THE ALTITUDE OF THE BALLOON AS 45000 FT AND FURTHER ADVISES

THAT THE BALLOON HAS BEEN REPORTED IN THE AREA APPROXIMATELY 10 DAYS,
THAT THE ALTITUDE VARIES BETWEEN 40 AND 69 THOUSAND FT, THAT THE
DIAMETER IS APPROXIMATELY 500 FT AND THE KBOA RADIO STATION IN
KENNETT, MO, HAD REPORTED A WEATHER BALLOON IN THE AREA.

PARA 14K(KILO): CHIEF, INTELLIGENCE DIVISION, 97TH BOMBARDMENT WING
BLYTHEVILLE AFB, ARKANSAS.

PAGE 5 RUMGHU 1317 UNCLAS

THE MOST LOGICAL EXPLANATION OF THE CAUSE OF THIS SIGHTING IS THAT
THE OBSERVER SAW THE LARGE WEATHER BALLOON WHICH REPORTEDLY HAS BEEN
DRIFING IN THE AREA FOR APPROXIMATELY 10 DAYS. SEVERAL OFFICERS
HAVE REPORTED SEEING THE BALLOON. THE B-52 WOULD NOT HAVE BEEN UNDER
OBSERVATION FOR THE LENGTH OF TIME REPORTED BY THE OBSERVER AND
UNDOUBTABLY WAS TOO FAR AWAY AND TOO HIGH TO BE OBSERVED, PARTICULARLY
IN VIEW OF THE LATE AFTERNOON TIME OF OBSERVATION. IT WILL BE NOTED
THAT THE OBSERVER REPORTED THAT THE OBJECT WAS FIRST OBSERVED AT
APPROXIMATELY 30 MINUTES BEFORE SUNSET AND WAS IN VIEW FOR
APPROXIMATELY ONE AND ONE-HALF HOURS BUT DISAPPEARED WHEN THE SUN
WENT DOWN. THIS APPARENT DISCREPANCY MIGHT BE ACCOUNTED FOR BY THE
FACT THAT EMINENCE, MO, IS ON DAYLIGHT SAVING TIME OR BY POSSIBLE
ERRORS IN THE OBSERVER'S ESTIMATE OF THE TIME OF DAY, BUT THE

AF N: 10707 (8 Sept 66)

DISCREPANCY IS NOT CONSIDERED SIGNIFICANT. FURTHER, AND EXAMINATION OF THE SATELLITE SCHEDULE PREPARED BY DR. J. H. SENNE OF THE UNIVERSITY OF MISSOURI AT ROLLA AND PUBLISHED BY THE MEMPHIS, TENN, COMMERCIAL APPEAL NEWSPAPER FOR SUNDAY, 28 AUG, INDICATES THAT THREE SATELLITES, ECHO I, ECHO II AND PEGAS-A WOULD BE VISIBLE DURING THE WEEK OF 28 AUG BUT NONE AT THE TIME FOR THIS SIGHTING. CONSEQUENTLY, ON THE BASIS OF AVAILABLE INFORMATION, IT IS BELIEVED THAT THE WEATHER

PAGE 6 RUW GHU 1317 UNCLAS

BALLOON WAS THE OBJECT SIGHTED. THE USAF OPERATIONAL SUMMARY OF 2 SEP 66 CONFIRMS A FREE BALLOON IN THE AREA.

9 Sept. 66

Contact with Dr. Morris of NCAR (303-443-1960 ex. 502). Dr. Morris said that he knew a little about the balloon launched from Minn. It was launched by Linton Systems Incorp. (612-633-7110). He said that other groups launched balloons.

Winzen Research Incorp. Mr. Dan Williams (612-881-5871)
Raven Industries Mr. Keauser (605-336-2750)

Was a balloon launched from Palistine, Texas on 5 Sept. 66 which went westward. Over Lubbock, Texas, Tucumcari, New Mexico, Gallop, New Mexico, to Prescott, Arizona. Dr. Morris didn't know where the balloon was at the time of the conversation. This was 9 Sept, 66 and the balloon was still loose.

Dr. Morris also said that it was quite possible for a balloon to reach the US after having gone around the world. There have been balloons launched from New Zealand by NCAR that have gone around the Southern Hemisphere in 10 days,.

Contact with Mr. Richard Olson of Litton Incorp. about their Balloon which was launched on 24 August 66. Their balloon was up from 24 Aug. to 4 Sept 66. Balloon was launched and stayed in the area for several hours. Balloon went up to 137,000 feet. Balloon traveled slowly westward and dropped its package about 7-8 hours about 40 miles west of launch area. Balloon traveled slowly toward south and was reported over Shenandoah, Iowa on the 26 August 66. 27 Aug. 66 Hastings Neb. 28 Aug. 66 Russell, Kanas, 29 Aug. 66 Kansas City, Mo. Balloon has a red pennant which has been reported as a big red tail. Balloon came down in SE Texas.

Contact with Balloon Control Center, Holloman AFB, New Mexico about balloons launched from Holloman. Balloon was launched on 7 Sept 66 at 2245 MST and came down 1155 8 Sept, 66 near Doglan, Arizona.

8 Sept. 66

Contact was made with the PIO Scott AFB, Ill. concerning the release of a balloon from the St. Louis area. The PIO stated that he knew of no balloons being released from the area. He had heard of two balloons; one in Wisconsin and the other in Texas that had "gotten away". He said one of the balloons was being tracked by NORAD and was now near Winslow, Arizona.

Conversation with Radio Station KBOA Kennett, Mo. Informed that a balloon(weather) had been launched near Minneapolis, Minn. on 24 August 66. The balloon traveled southward being over the Mo., Ark., Tenn. area on 30-31 August 66. The balloon left this area and was heading SE toward Alabama. Balloon went down in Texas. The balloon dropped its package; however it did not deflate properly. (314-88-84616)

9 Sept. 66

Contact with the FAA at Memphis Airport, Memphis, Tenn. (901-397-1473) traffic tower. The autovon number is 631-1620.

Balloon was west of Memphis, Tenn on about the 30 of August 66.

Balloon went over Wynne, Ark., Clarksdale, Miss. and was heading SW. Contact should be made with FAA(901- 363-1202) for more data.

An aircraft near Dyersburg, Tenn saw the balloon and identified it.

Contact with FAA Memphis, Tenn, chief controller (363-1202). Mr. Starns.

Mr. Starns said that they picked up the balloon on 30 Aug. 66 at 0400Z. The balloon at this time was reported to be at 10 miles NW of Sedalia, Mo. and was moving ESE at about 5-10 miles per hour. The altitude was ~~about 59,000 but not~~ not known but believed to be about 59,000 feet. Mr. Starnes said he would send us their report on the balloon flight path.
