11. BRIEF SUMMARY AND ANALYSIS

SEE MEMOS FOR DETAILS

Various observers reported red, white, green lights moving in various erratic flight paths. Some objects were going in circles while others remained stationary. No definite shapes were noted, just lights in the sky. Objects appeared as lights only. One object was observed to appear in the west and travel in an eastern direction at a high rate of speed, disappeared over the horizon.
Andrews AFB reported no sightings from their tower or their radar. Investigating officer did observe a satellite during the approximate three hour sighting. Insufficient data for comprehensive evaluation.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was notified of this object by a citizen on 6th St Lanham Md. while watching the object it moved from side to side and up + down, I then proceded to head in the general direction which would be N-NW the object then dipped down behind the tree then reppeared it rose straight up then took off at a very high rate of speed in a E-NE Direction. I turned around when I saw that it was moving in the opposite direction from my direction of travel. At this time it was over my left sholder at about 30° altitude, it passed by to my left and I was traveling appox. 90 mph when it reached my left front it stoped and hovered. I went as far as possible without going out of my Police Dist. and stopped and watched at that time I called officer Smith and we both watched as it moved about in the sky. As we watched there were 5 other objects which came into view and flew about and hovered in the general area of the first object which was either closer than the rest or or larger because the first was brighter than any of the others. Officer Smith and myself watched these objects until almost daylight.

SEVERAL MOVING OBJECTS WERE REPORTED AT DIFFERENT TIMES. ONE SUCH OBJECT COULD HAVE MADE SEVERAL "PASSES" BUT SEVERAL WERE REPORTED AT THE SAME TIME, BY OTHER OFFICERS.

MEMO For the Record

1 August 66

In regards to the Eastern Maryland Area sightings the following comments are offered:

At approximately 0230 EDT

Capella 45° Az & 18° Elevation
Aldebaran 73° Az & 8° Elevation

At approximately 0500 EDT

	Capella	58°	Az	40°	El
Stars	Betelgeuse	90°	Az	15°	El
	Aldebaran	95°	Az	33°	El
	Pollux	58°	Az	8°	El
					Stellar Mag.
Planets	Jupiter	65°	Az	8°	El - 1.4
	Mars	67°	Az	12°	El
	Venus	70°	Az	15°	El - 3.3

According to the Smithsonian Institute tracking service various satellites were due to be visible at 0146, 0225, and 0255 in the morning. Echo I passed over the area at approximately 0146. Echo II should have been visible at approximately 0443.

Since no definite shapes were observed by any of the witnesses, just lights in the sky it appeares that the witnesses observed the various stars and planets and satellites that were visible during that August morning. It is a difficult matter to actually determine which of the above culprits were responsible for each of the observations. There were no radar returns of unknown objects in the area, and considering the approximate three hours these objects were visible there should have been some type of radar pickup. Jupiter and Venus were unusually bright in the morning sky and should have definitely been observed.
