34. Date you completed this questionnaire: 28 (Day) 8 (Month) 66 (Year)

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I feel that if these craft or objects were of the airplane nature they would have had to been something which could travel, stand still, move slightly up and down, and travel on again. They always moved forward and at no time moved in reverse. If you find a logical explanation it would and I know my friend would be very interested in finding out what they were. Thank you.
