

PROJECT 10073 RECORD

1. DATE - TIME GROUP 25-30 Oct. 66	2. LOCATION Southhampton, Long Island, New York multiple
3. SOURCE Civilian	10. CONCLUSION Astro(Capella)
4. NUMBER OF OBJECTS One	Capella was rising at approximately 1745 EST on the 25th of October 1966.
5. LENGTH OF OBSERVATION 10-30 minutes	11. BRIEF SUMMARY AND ANALYSIS Observers noted a white very bright light in the NE part of the sky. The object was stationary and flashing various colors. Red, green, and white were seen during the observation. The object appeared to go up and down and then drift slowly toward the south. The description is consistent with that of an astronomical observation.
6. TYPE OF OBSERVATION Ground Visual	
7. COURSE Stationary	
8. PHOTOS ☐ Yes ☒ No	
9. PHYSICAL EVIDENCE ☐ Yes ☒ No	

Location of Observer(s):

Pinpoint location accurately. Use street and building names if it will help. (Example - backyard of house at 22 Dune Road, Westhampton Beach, N. Y.)

Identification of Observer:

Name

Age

19

Mailing Address

South Hampton

Phone Number

Occupation

Student

EDUCATION Junior College

TO PERSON COMPLETING FORM - Give your estimate of observer's reliability and reasons.

Witnesses - Obtain name, age, address, phone, and occupation of every witness. Use other side of this sheet if necessary.

Physical Evidence: Were photographs taken or was any physical evidence of the object left behind? (Note: If the caller says there is physical evidence still present, contact Wing Operations Duty Officer through CAC, Ext 493, or the Air Police, Ext 408, immediately).

NO

Weather:

clear

(Observer(s) account of weather conditions.

THIS IS THE END OF QUESTIONS FOR THE OBSERVER. RECORD ANY OTHER COMMENTS HE MAY WANT TO ADD. THANK HIM (HER) FOR CALLING.

Object is still there ✓

WHEN THE CALLER HAS HUNG UP, CALL BASE WEATHER AT EXT. 483 FOR THE FOLLOWING INFORMATION:

	<u>WIND DIRECTION</u>	<u>VELOCITY IN KNOTS & DEGREES</u>
SURFACE:		
6,000'	280°	15
10,000'	270°	30
16,000'		50°
20,000'	260°	85°
30,000'	240°	90°
40,000'	250°	85
50,000'	250°	
80,000'		

Note: Weather questionnaire continued on page 5.

Ceiling: 10,000 ft.

Visibility: 7 mi.

Amount of cloud cover: 00/10

Thunderstorms in area and quadrant in which located:

Vertical temperature gradient: stable. Decreases 14° To 10,000

Any other unusual activity or condition, meteorological, astronomical, or otherwise, which might account for the sighting.

NEXT CALL THE COMBAT ALERT CENTER, EXT. 493, FOR THE FOLLOWING INFORMATION:

Was radar sighting made? By whom? NO

Was intercept action taken? NO

Location, approximate altitude, and general direction of flight of any air traffic or balloon releases in the area which might possibly account for the sighting.

FINALLY, CALL GRUMMAN AIRCRAFT OPERATIONS SECTION AT 727-1500, EXT. 611 TO FIND OUT IF THEY HAD ANY AIRCRAFT FLYING WHICH COULD ACCOUNT FOR THE SIGHTING.

NO

Do not discuss the report with any civilian callers. Only the Office of Information, Hq. USAF, is authorized to release information concerning UFO reports. If you are called by members of the press, ask them to please call the Information Officer, Capt. Craig at 288-2747, or his assistant, Lt. Campbell at base ext. 098.

The regulation which covers UFO reports is AFR 200-2. Refer to it if you have any questions in the handling of this report. Turn in this form with your OD report in the morning.

One final note. Most UFO reports are rather routine "lights-in-the-sky" sightings. When a report comes in that is obviously based on more tangible evidence, or when several reports of sightings at the same time are received, contact the Operations Duty Officer through the CAC, Ext 493. Reports are much more easily investigated at the time of the sightings than a day or two later. Your cooperation and good sense will help the Air Force investigate these sightings in a professional manner.

~~_____~~ statement

I was alerted by my sister-in-law, Mrs. ~~_____~~, "there is something in the sky that might be interesting to take a picture". I walked out, about supper time, 6:20, in my shirt sleeves. Spotted object north along power line. Traveling north to south, then south west. UFO had arms that sparkled like arc-light, which seemed to be in front of, lighting up area ahead of it. Heard slight hum, ~~XXXXXX~~ like electric turbine.

Was in sight for at least seven minutes. Guess to be at 1500 or 2,000 feet. Enormous size, over 100' wide.

Following power line south to ocean, then turned southwest along 27 Route 27 to hover over college. (Southampton)
Lost sight of it over college.

SPECIAL REPORT ON [REDACTED] PHOTOGRAPH

Of three 8 x 10 prints submitted by Mr. [REDACTED], [REDACTED] Southampton, L. I., to Mr. W. R. Robinson, one contains a photograph of an alleged UFO and also shows three star trails. A study of star and moon positions previous to the date of the supposed UFO photograph has shown that the three trails are images of the three brightest stars in the constellation Aries. The hypothesis was tested that the bright elongated object in the picture is a trailed image of the moon.

The coordinates of the three stars (1966) are as follows:

Alpha Aries	2 ^h 05 ^m 15 ^s	+23° 18' 09"
Beta Aries	1 ^h 52 ^m 45 ^s	+20° 38' 33"
Gamma Aries	1 ^h 51 ^m 40 ^s	+19° 07' 40"

The first task was to calculate the plate scale on the assumption that these were in fact the coordinates of the ends of the star-trails. Since the paths were parallel on the print, the declination difference (at right angles to the direction of trail) was used. The separation of the three stars in declination, on the print, was measured to be

Alpha-Beta	0.695 inch
Beta-Gamma	0.388 inch

The plate scales obtained, uncorrected for geometry, were then used to compute an effective focal length for the lens used, as if the photograph were made directly onto the 8 x 10 print. The result was 16.31 inches. If the original negative were a 4 x 5 plate, the lens would have had a focal length to 8 inches; if a 35 mm. camera were used, the focal length comes out to be 56 mm., quite close to a standard lens.

NO

Description of object's (s') course:

What first called the attention of the observer(s) to the object(s)?

OTHER PEOPLE

Having the focal length, a correction factor could be computed to take into account the off-axis angles. The resulting corrected on-axis plate scale was 0.004175 inches per minute of arc, the scales computed from the measured separations agreeing within 1%.

The ratio of the declination separations on the print is 0.1767; the ratio of the actual declination-differences is 1.756; the error is 0.011, or 0.63%. The identification may be taken as proven.

Next the declination-difference between each star-trail and the center of the moon-trail was measured. The distances were:

Alpha - moon	3.233 inches
Beta - moon	2.524 inches
Gamma - moon	2.144 inches

A mean geometry correction was computed for the mid-points of these distances, and then they were converted into angles, and the declination of the moon was computed, as follows:

	Difference Angle	Moon's Declination
Alpha - moon	12° 30!0	10° 48!15
Beta - moon	9° 52!0	10° 46!55
Gamma - moon	8° 21!5	10° 46!2
Mean computed declination		10° 46!9

The declination of the moon is given in the ephemeris as viewed from the center of the earth; thus a person standing on the earth at a northerly latitude will see too low a declination due to parallax. This parallax was computed for a latitude of 40° north, and it amounted to 28 minutes of arc. The corrected ephemeris declination of the moon was

thus $11^{\circ} 14' 9''$.

Right ascension was computed by first measuring the location of the end of the moon-trail relative to a line drawn at right angles to the star-trails; in this way the relative right ascension of the image of the moon could be found. The position of the center of the moon was estimated by centering a line as long as the star-trails on the elongated image, and then picking one end of that line as the starting-position of the moon's center. The difference in right ascension was not corrected for curvature of the right-ascension lines, the declination being sufficiently close to zero that little convergence would be expected. The measured difference was again corrected for plate scale and off-axis angle, with the result that the moon's right ascension at the start of the exposure was found to be $2^{\text{h}} 01^{\text{m}} 17^{\text{s}}$.

From the American Ephemeris and Nautical Almanac for 1966, the following table of apparent lunar coordinates was taken; all entries are for 29 October 1966:

UT	EDST (Oct. 28)	RA	DEC	RA error	DEC error
0200	10:00 PM	$1^{\text{h}} 59^{\text{m}} 09^{\text{s}}$	$+10^{\circ} 43' 47''$	$+2^{\text{m}} 03^{\text{s}}$	$+30'$
0300	11:00 PM	$2^{\text{h}} 01^{\text{m}} 01^{\text{s}}$	$+10^{\circ} 56' 48''$	$+ 16^{\text{s}}$	$+17'$
0400	12:00 PM	$2^{\text{h}} 02^{\text{m}} 53^{\text{s}}$	$+11^{\circ} 09' 47''$	$-1^{\text{m}} 36^{\text{s}}$	$+05'$

By a simple interpolation formula, the time was found when the absolute amount of error was the same, in minutes of arc, in both directions:

Time: 0332 UT, or 11:32 PM EDST, Oct. 28th
 RA: $2^{\text{h}} 02^{\text{m}} 05^{\text{s}}$ (12 minutes of arc high)
 DEC: $11^{\circ} 03' 8''$ (11 minutes of arc low)

Eleven minutes of arc on the print is 0.046 inches on the print. We take as proven the hypothesis that the picture is a trailed image of the moon, and that it was not taken on Sunday, October 30th, as claimed by Mr. [REDACTED], but on Friday evening, October 28th, between the hours of 11:00 and 12:00 PM, EDST. The picture is therefore a fraud.

8. IF you saw the object at NIGHT, what did you notice concerning the STARS and MOON?

8.1 STARS (Circle One):

- a. None
- b. A few
- c. Many
- d. Don't remember

8.2 MOON (Circle One):

- a. Bright moonlight
- b. Dull moonlight
- c. No moonlight - pitch dark
- d. Don't remember

9. What were the weather conditions at the time you saw the object?

CLOUDS (Circle One):

- a. Clear sky
- b. Hazy
- c. Scattered clouds
- d. Thick or heavy clouds

WEATHER (Circle One):

- a. Dry
- b. Fog, mist, or light rain
- c. Moderate or heavy rain
- d. Snow
- e. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

It was as bright in the sky as a close street light

12. The edges of the object were:

- (Circle One)
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other Saw it through a pair of binoculars. The edges were hazy.

13. Did the object:

(Circle One for each question)

- a. Appear to stand still at any time?
- b. Suddenly speed up and rush away at any time?
- c. Break up into parts or explode?
- d. Give off smoke?
- e. Change brightness?
- f. Change shape?
- g. Flash or flicker?
- h. Disappear and reappear?

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

2. Time of day:

6 about 15-30
Hour Minutes

(Circle One):

A.M.

or

P.M.

23 October 1966
Day Month Year

3. Time Zone:

(Circle One):

- a. Eastern
- b. Central
- c. Mountain
- d. Pacific
- e. Other _____

(Circle One):

- a. Daylight Saving
- b. Standard

4. Where were you when you saw the object?

Nearest Postal Address

City or Town

State or County

5. How long was object in sight? (Total Duration)

Hours

Minutes

Seconds

a. Certain

b. Fairly certain

c. Not very sure

d. Just a guess

5.1 How was time in sight determined?

personal judgment

5.2 Was object in sight continuously?

Yes X

No _____

*object alleged
observed for
5-10
minutes*

6. What was the condition of the sky?

DAY

- a. Bright
- b. Cloudy

NIGHT

- a. Bright
- b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One):

- a. In front of you
- b. In back of you
- c. To your right

- d. To your left
- e. Overhead
- f. Don't remember

Angle of elevation. (The horizon is 0° elevation. Directly over the observer's head is 90° elevation. The object must appear within this $0^{\circ} - 90^{\circ}$ range). 25°

Azimuth (which direction on the compass was it headed)? North is 360° . East is 90° . South is 180° . West is 270° . E

Angle of elevation and azimuth upon disappearance.

STILL VISIBLE

Description of flight path and maneuvers of object(s).

STATIONARY

How did the object(s) disappear? (Instantaneously to the North, etc.)

How long was (were) the object(s) visible? Be specific - five minutes, one hour, etc.)

10 MIN

Manner of Observation:

Use one or any combination of the following items: ground-visual, air-visual, ground-electronic. (If electronic, specify type of radar).

Statement as to optical aids (telescopes, binoculars, etc.) used and description thereof.

THIS QUESTION IS NOT PERTINENT WHEN CALLER IS A CIVILIAN.

COMPLETE ONLY IF REPORTED BY A PILOT.

If the sighting occurred while airborne, give type of aircraft _____, identification # _____, altitude _____, heading _____, speed _____ and home station _____

Date and Time of Sighting:

Date: 31-10-66

Zulu Time: 0400Z 0200Z

Light Conditions - day, night, dawn, dusk

20. Do you think you can estimate the speed of the object?

(Circle One) Yes ☐ No ☒

IF you answered YES, then what speed would you estimate? _____

21. Do you think you can estimate how far away from you the object was?

(Circle One) Yes ☐ No ☒

IF you answered YES, then how far away would you say it was? _____

22. Where were you located when you saw the object?

(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors ☒
- d. In an airplane (type) _____
- e. At sea
- f. Other _____

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other *Front yard of my parents house - very few trees*

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- | | | | |
|--------------|--------------|--------------|--------------|
| a. North | c. East | e. South | g. West |
| b. Northeast | d. Southeast | f. Southwest | h. Northwest |

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One) Yes ☐ No ☐

25. Did you observe the object through any of the following?

- | | | | |
|-----------------|---|----------------|---|
| a. Eyeglasses | Yes ☒ No ☐ | e. Binoculars | Yes ☒ No ☐ |
| b. Sun glasses | Yes ☐ No ☒ | f. Telescope | Yes ☐ No ☒ |
| c. Windshield | Yes ☐ No ☒ | g. Theodolite | Yes ☐ No ☒ |
| d. Window glass | Yes ☐ No ☒ | h. Other _____ | |

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It would look like a cymbal.

14. Did the object disappear while you were watching it? If so, how?

In NOT sure, because I sighted more than one. They were positively not airplanes, because of it hovering. (saw 10 min)

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

~~Don't Know~~

IF you answered YES, then tell what

it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

~~Don't Know~~

IF you answered YES, then tell what

in front of:

17. Tell in a few words the following things about the object:

a. Sound *couldn't hear anything*

b. Color *very bright white light - it the changed color red - green, white*

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

blackened in area would have been about the covering of the match

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

bell shaped

were in a row

On the bottom. Uncertain about the object. They seemed to be the different colored lights giving off.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

no

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes

No

31.1 IF you answered YES, did they see the object too? (Circle One)

☒ Yes

No

31.2 Please list their names and addresses:

Mr. & Mrs

Mr. & Mrs.

Southampton

Was It a Satellite, Star, Plane?

(Continued from Page 10)

On either side of the object, Mr. Saher reports, were two rods or arms which took off a light blue Fourth of July sparklers. In the face there appeared to be bright, light-like projections, and in the rear an orange, smoky exhaust. "It was so bright, it blinded," he said.

Mr. Sider is adamant in denying that the UFO could have been a star, a satellite, a plane, or even a bird. He points out that he is familiar with the aircraft patterns for this area, which in no way compare with the path taken by the UFO, which is, nevertheless, strikingly dissimilar to the south west streaks appearing in the vicinity of Henderson, Calif.

craft. Investigation is continuing of 6 reports on which insufficient information for positive identification has been submitted. Preliminary investigation has not been completed on 8 additional sightings reported last month, among which is included South-Carolina's report.

Contact was made with the Suffolk County AFB operations regarding their rescue helicopters. They had no copters in the air on 30 Oct. 66.

Contact was made with the Shinnecock Hills Coast Guard station concerning their helicopters. Their nearest copter is in Brooklyn and doesn't come out to this area unless there is an emergency.

Contact was made with Floyd Bennet Field, New York. Both Navy and Marine operations were checked for any helicopters that could have been in the Southhampton area about 1800 30 Oct. 66. A negative response was obtained.

Contact was made with the Southhampton town police. They on occasions use a Grumman helicopter but did not think that the copter was being used on 30 Oct. 66.

Contact was made with Grumman Aircraft Company. Again a negative answer was obtained for any craft in the Southhampton area on the night in question.

Contact was again made with the Coast Guard at Mattituck. They said that no patrols in the area this time of the year. They do have twilight patrols in the summer months only.

30 Oct 66 Southampton

31 Oct 66

[REDACTED] and several other students from Southhampton College reported watching an alleged UFO for more than 30 minutes. The object was seen in the southeast portion of the sky at an elevation of approximately 25 degrees. The observers did not notice and noise or any type of exhaust. The object just remained basically stationary in the southeast during the observation period. The lights flashed from red to green to yellow during the observation. The object did not appear to be moving from its position.

Oct 66 23 27

Conclusion:

Although there is incomplete data to warrant a comprehensive evaluation it definitely appears that the witnesses were watching the star Rigel which at the time of the sighting was on an azimuth of 120 degrees and at an elevation of 18 degrees. Sirius which had been reported previously as an UFO did not rise on this particular night until approximately mid-night, and is excluded as a possible explanation.

A closeup of the UFO, with what may be the edge of a cloud at left veiling the outline.

In this closeup, taken a few seconds later, the image is somewhat smaller, apparently due to cloud obscuration.

Brentwood late Saturday night.

And, although I did not see them, the final time exposure I took clearly showed three extra streaks of light in formation, east of the UFO I was photographing. They may have been three more of the mysterious aerial objects that have been roaming Long Island's skies in recent days.

At the same time I was visually and photographically tracking the UFO, the Air Force and The Press were both receiving calls about the same sighting and other sightings in Smithtown and Centerport.

I suspect a lot of people aren't going to believe it, but what I witnessed has nothing to do with the series, "UFO's Are Serious Business" that starts today on page 15 of The Press.

WHAT I first saw was a motionless object, much brighter and at least ten times as large as any planet or star in the sky that I could see at the same time.

It was brilliantly luminescent and its pale-yellow shade was close to the color of the ends of your classified telephone book.

Whatever it was, it was stationary enough so that I was able to get two very sharp-looking pictures of its outline. What my eyes saw was roughly a horizontal oval. The sharper eye of the lens showed a weirder shape with a weaker cone of light below it that had shifted its direction between the time I took the first and second pictures.

A slim bank of low-hanging cumulus clouds, nudged by the chilling gusty winds we had late Saturday night, moved in front of the UFO.

WHEN IT reappeared, the object was in motion—from west to east—and its yellow shade was swiftly disappearing, replaced by a bluish-purple color.

As it passed me, it looked as if it was moving on a straight and level course. It seemed to be going no faster than the typical one-motored private planes that I've flown out of Flushing, Zahn's and other Long Island airports.

As it continued eastward, the UFO seemed to be picking up speed. When it passed south of me as I stood on the Long Island Expressway border, the "whatever-it-was" was doing about 90 miles an hour.

BUT AS it got further east, the speed went up dramatically. The last two exposures, made of an object many miles away, show a pair of much longer streaks than those made when the UFO was close to me. This means a fantastically higher speed of travel.

Actual speed calculations, from examination of the

Friday, November 4, 1956

AF Identifies UFOs Sighted By 35 in L.I.

NEW YORK, Nov. 2 (UPI) — The Air Force said Wednesday it has identified the unidentified flying objects (UFOs) sighted by 35 persons in eastern Long Island last month.

The UFOs, two Air Force investigators said, included satellites, aircraft and stars.

In a report released by Suffolk County Air Force Base, the investigators said they established identification of all but six of 41 UFO sightings reported in the area on Oct. 21.

The report was prepared by William Powers of Dearborn Observatory, Evanston, Ill., and Lt. William Marley of Wright-Patterson AFB, Ohio.

The Breakdown

They said that in 21 of the cases, the UFOs proved to be stars. Seven sightings were identified as aircraft, and seven others as satellites. The investigators said there were no unusual identifications on any other nights. Other sightings reported Oct. 20 were still under investigation.

Among these reported UFO sightings the night of Oct. 21 were three redactions and a photograph. The investigators said the object referred to in this case was Sirius, the brightest star in the sky.

To prove their point, Powers and Marley took two of the policemen out at night to view the star again. The policemen said the officers agreed that the shape of the star appeared the same as the "fish" shape they said they saw in the sky before.

Saucers Or Sorcery It's Sirius Business

Residents of the Moriches Bay Area -- a traditionally stargazing breed -- became pop-eyed in mounting numbers this week as more and more skyward glances yielded a glimpse of unidentified flying objects.

Talk of flying saucers, blinking, cigar-shaped craft, strange bright lights and stationary air-liners creased and into a full-blown mystery throughout the area as they were sighted by stable, reasonable citizens who are not normally given to hallucination.

At least some of the objects were identified by the Air Force on Tuesday as a bright star called Sirius, which often dominates the heavens at this time of year. But it seemed to others that they had seen a number of local folks who saw something else.

Center of the mystery in most reports appeared to be the Moriches area, where one local

resident saw a silent brilliantly-lit craft that "really gave me a strange lonesome feeling because it seemed to be watching me."

Center Moriches District Principal Stanley Abrams, riding home from a meeting of school administrators and board members, saw another from Farm-to-Market Road near the old Suffolk Farm Preserve. Mr. Abrams described the object as similar in appearance to an airplane with its lights on, taking and out.

THE Publisher John R. Cummings viewed a like object over the Moriches area, which he said "looked like an extremely bright light, wider than it was deep, nearly motionless in the north-east sky." The object appeared brighter than any planet or star, he said, including the red and Sirius himself at the perihelion

that it was an optical illusion.

Many citizens who declined to be identified reported seeing objects vividly described as "a street light way out in the sky," "something like a flash-out-out of the clouds," and "a funny light that changed colors as you watched it."

Parents of Bay Area often matched those of other citizens, who have seen them in the past and in the Moriches area over the past few weeks. "Sometimes they have been reported down in covered areas by Farm-to-Market Road who insist that if you don't see them in the sky, it's been at these houses and back and you can't see them from directly underneath."

Meanwhile, the Air Force was investigating all the reports, including those of the citizens.

SCAFB Explains Flying Objects

SUFFOLK COUNTY AFB (ADC), N. Y.—The Air Force has completed initial investigation of 41 unidentified flying object reports submitted to Suffolk County AFB during the month of October.

Investigators have concluded that 21 of the sightings reported were stars, 7 were satellites, and 7 were aircraft. Investigation is continuing of 6 reports on which insufficient information for positive identification has been submitted. Preliminary investigation has not been completed on 8 additional sightings reported Sunday night. Findings will be announced when investigations have been completed.

Stars Identified

A sighting initially reported by three Suffolk County residents to the Patchogue police and which was subsequently photographed and published by the New York Daily News was positive identification of the star Sirius. The three investigators went to the scene where one of the officers pointed out the star as the object they had seen.

The preliminary investigations

Continued on Page 2, Col. 2

UFOs

Continued from Page 1

are being conducted by Mr. William Francis, Systems Engineer at Dartmouth Observatory, Northwestern University, and Lt. William Murphy of Wash. Pentagon Air Force Base, Ohio.

The Air Defense and Warning, No. 111

The Air Pollution and Climate Section

This was the first sighting reported in the United States. William Powers, who is studying the reports of unidentified flying objects for the Air Force, Powers has talked with more than a half-dozen persons who observed a bright object maneuvering in the skies. "They all apparently saw the same thing," said Powers. "It is a possibility that it was a helicopter. Not an ordinary one, but one big."

Bob Powers, a systems engineer at the Pentagon's Directorate of Northwestern University, Dept. of Defense, was not as keen as the Air Force, which only damaged 35 unidentified flying objects Monday. The UFOs all seen in Long Island state, were said the Air Force, seven airplanes, seven satellites and 21 jets. "I have a lot of checking to do before I can say anything definite," said Powers. "The Suffolk Air Force Base (in Westhampton Beach) has a sonar helicopter and I'll have to check whether they had them in the air when these people sighted something. If it isn't that, we'll have to keep working." The flight patterns were not available at the Air Force base last night.

Among those Powers spoke with yesterday were Mrs. John Acquino of 115 Cornish St., Southampton. She told him that she, her husband, and her son, John Jr. had all seen a large, luminous object in the sky about 6 PM Sunday. "It seemed too bright for a star," said Mrs. Acquino. "We could not see the shape, but it was very bright. The color seemed to have white and green lights. A neighbor, Mrs. George Walsh of 115 Cornish St. told Powers, "You could see red lights flashing and see the reflection of lights on metal. I had the rays of lights and it was kind of sparkly."

Students Say UFG

LONG ISLAND PRESS, WEDNESDAY, NOVEMBER 2, 1946

It Wasn't a Plane, A Star, a Planet . . .

"It wasn't any natural phenomenon like a passing plane, a star or a planet. The scientists will have to work on this one at headquarters."

That was the verdict of an Air Force UFO expert yesterday after he had heard the details of the sighting of an unidentified flying object seen and photographed by soldiers near the Long Beach Air Force Base.

The sighting of the object was reported by a soldier in the Air Force's 48th Central Postal Directory, who was on duty at the time. The object was seen at about 10:30 p.m. and was described as a bright, glowing sphere.

The Air Force's 48th Central Postal Directory is located at the Long Beach Air Force Base.

Press writer had made of an object that was first seen sitting motionless in the sky and that later revolved from west to east in the Brentwood area. At the extreme end of its 15-minute flight, the UFO peered by Victor and a crowd of soldiers students stood up in fact that it was certainly at least as fast as a plane.

One of the soldiers who heard from the state's Long Beach and the Brentwood area of the object, said that it was "a bright, glowing sphere" and that it was "a very fast-moving object."

Victor's first report came after the object was seen by the 48th Central Postal Directory.

UFO Wasn't a Plane, a Star or a Planet

Edward Victor shows Air Force Lt. Col. Markley the UFO poster in 1946.

The three objects which were the subject of the 1946 photograph were not a plane, a star or a planet, according to a new study by the Air Force Research Office, Dayton, Ohio.

A study which was published last week in the journal "The Journal of the Royal Astronomical Society" says the objects were "unidentified flying objects" (UFOs).

Dr. S. J. van den Bergh, who led the study, says the objects were "unidentified flying objects" (UFOs).

He said that the photograph was taken on Nov. 12, 1946, at the Washington Navy Yard, Washington, D. C.

Dr. van den Bergh said the photograph was taken by a group of people who were working on a project for the Navy.

LONG ISLAND PRESS, WEDNESDAY, NOVEMBER 2, 1966

She said that it did not matter how long it took, but she is accustomed to when the power goes out and she has to be home during that time.

SHE TOLD THE PRESS that she could hear a car "which might just have been traffic" as the car passed over her as she lay in the water, and she was not sure if it was a car or a plane. She said she was not sure.

She said she was not sure if it was a car or a plane. She said she was not sure.

She said she was not sure if it was a car or a plane. She said she was not sure.

Six Students Who Saw UFO Share Views With Reporter

The group of young people who saw Press reporter Leonard Victor photographing a UFO last night told his plot in yesterday's paper that they contact him.

They turned out to be six students at the State Agricultural and Technical Institute at Farmingdale.

They were returning on the Long Island Expressway from a concert at Suffolk Community College last Saturday night when one of the group, Joel Allen of Waterville, N. Y., spotted the unusual, purple object in the sky that reporter Victor also saw and photographed.

THEY TOLD Victor last night that they agreed with his description of a UFO that was last night seen in the sky. They moved about from west to east and finally swooped up to the top of the sky.

They were delighted with the report of the other of the group.

All of Marlene Parnell of Lloyds Neck, N. Y., said she had seen the object in the sky at the Suffolk Community College. She said she had seen it in the sky at the Suffolk Community College. She said she had seen it in the sky at the Suffolk Community College. She said she had seen it in the sky at the Suffolk Community College.

The group saw the light which was and pulled around Victor's car for a moment. The unidentified object disappeared just as he was about to take a picture.

Victor described the object as a purple object in the sky. He said it was a purple object in the sky. He said it was a purple object in the sky. He said it was a purple object in the sky.

was part of the object which were completely new.

Marlene D. Parnell said that when she last saw the light it was about as big as a dinner plate.

Allen and Salafsky, who have both done quite a bit of flying, added that as they saw the UFO "it was going twice as fast as a jet, if not even faster."

ALLEN ADDED that when he last saw the UFO it looked as if it was going straight up to the moon.

None of the six Farmingdale students saw the formation of three other light streaks which Victor found on the final time exposure picture he got out of the UFO during the night. The group agreed that it was slower than other UFOs seen in the sky. They said it was slower than other UFOs seen in the sky.

Miss Parnell told Victor that she was the one who asked him to take a picture of the object. She said she was the one who asked him to take a picture of the object. She said she was the one who asked him to take a picture of the object.

THEY SAID they were not going too far and would not be going to the Farmingdale college, where the group of young men were in the Nassau Hall dormitory.

The group told Victor they thought he was very intelligent. They said they thought he was very intelligent. They said they thought he was very intelligent.

Air Force Douses Hot UFO Reports

It's a star. It's a plane.
It's a satellite.

Pick one of the above
next time you think you
see a UFO and you prob-
ably be right.

That's what yesterday's
report from the Suffolk Air
Force Base in Westhampton
Beach belled down to.

According to Air Force
investigators, 35 of the 41
UFOs reported to the base
last month were either
stars, satellites or planes.

The remaining six UFO
sightings are still under in-
vestigation, although Air
Force officials indicated
they had neither sufficient
information nor positive in-
formation on them.

OF THE 33 October UFO
sightings discounted by Air
Force officials, 22 are be-
lieved to have been stars;
seven, satellites; and seven,
aircraft.

The UFO reported sighted
in Fairhaven by two Suffolk
folk yesterday on Oct.
21 was "positively identi-
fied" as the star Sirius by
Air Force investigators who
had two of the pattern of
flares near the object, due
to them.

Preliminary investiga-
tions are not yet complete
on a Saturday night sight-
ing by two staff sergeants
Lieutenant Carter and eight
additional sightings report-
ed Sunday night.

A SUNDAY night sight-
ing, viewed by more than

a dozen people on East Cen-
tral in Brightwaters, was
reported to The Press by
Peter McDonald, an aide to
Lt. Gov. Malcolm Wilson.

He said the object was
spotted hovering over the
Great South Bay at about
10:15 p.m. It was still there
an hour later, he said.

"I'm not a kook. I never
saw one before, but I sure
saw one Sunday night and
so did my wife and son and
neighbors."

After an hour and a half
of sky gazing, McDonald re-
ported. "All of a sudden a
(Turn to Page 5)

LONG ISLAND PRESS, TUESDAY, NOVEMBER 1, 1965

Air Force Douses Hot

(Continued from Page 1)
rocket came towards the
UFO from the east. It was

object. We thought the Air
Force at Westhampton
though it was shooting at it."

ANOTHER UFO report
was passed in to The Press
by a North Shore couple
who saw an object hover-
ing over the South Shore
Sunday night.

The East Northport man
and his wife and the un-
identified 15-year-old boy
"saw a bright object" over
the South Shore.

Mrs. Henry, 40, of
Easthampton, said the
object was yellow-orange in

color and spotted about 8:30
p.m. in the southern sky.

"It looked something like
a shooting star but it was
different," she said. "It
was smaller and smaller as
it disappeared. Mrs.
Henry said.

NEITHER SHE nor her

Red Lighted UFO Seen In Bayside

An unidentified flying object with red lights was reported hovering over a Bayside, Queens, intersection yesterday by two women.

Geraldine Smith, of 214-23 45th Rd., Bayside, Queens, and Leone Diamond, of 183 E. 36th St., Valley Stream, L. I., told police they observed the object at 2 p.m. over 45th Rd. and Bell Boulevard. It moved east about three miles before returning to the original area, they said.

Patrolman Joseph Cabot of the 100th Precinct sent to the scene after the women reported the incident said he saw no object.

25 See UFOs Over Island; AF Will Probe

More than 25 people in Suffolk and Nassau last night reported seeing moving objects in the sky which did everything from flashing red, white and green lights to breaking in two parts momentarily and coming back together.

A Southampton Village patrolman watched a bright ball of light in the sky over Southampton for 20 minutes, about 7 P.M. He said he heard no sound of an engine, namely the object was only about 100 yards off the ground. "It was definitely not an airplane," he said. John Accardi, of 115 Crillon St., Southampton, said the object he saw about 9:15 P.M. was moving so fast that he could not see its outline or identify it.

Descriptions Vary

A Centerville man said he watched an object in the south-west part of the sky at almost 9:00. But the object moved slowly across the sky about 9:15 P.M. He said it was white with a red light in the center. As it moved the object glowed red, blue, and green and came back together again. It followed a wave pattern. A Hempstead teenager and his six other friends, four adults and a little boy, saw something like a saucer-shaped object about 9:15 P.M. at Hempstead Harbor and that left a long trail of light. He said it moved straight up, then down and then around.

A spokesman for the Suffolk County Air Force Base said the base is conducting an investigation and that an officer would be assigned to investigate the report.

Norm Diamond, left, and Geraldine Smith peer skyward.

2 Girls Report Hovering UFOs

LONG ISLAND PRESS, MONDAY, OCTOBER 31, 1966

Two young ladies out walking a dog in Bayside last night saw what they believe to be unidentified flying objects.

The UFOs were spotted hovering over P.S. 31 on 66th Street off Bell Blvd. at Bayside, Long Island, N.Y., at about 10:30 p.m. last night. A sighting by a dog's head and a flashlight beam from the back of a car parked on 66th Street, about 100 feet from the home of the girls.

The girls, who were walking a dog when they saw the objects, said they were not alone. They were with a friend who was not with them at the time.

CHAS. CHAMBERLAIN, a police officer, said he did not believe the girls' story.

As they walked, the girls saw a bright light in the sky. They said it was not a star or a planet.

The girls said they were not alone. They were with a friend who was not with them at the time.

The girls said they were not alone. They were with a friend who was not with them at the time.

The Reports Keep Coming

Air Force Probes UFOs Over LI

The Air Force yesterday investigated reports of a multicolored unidentified flying object (UFO) that hovered at treetop level and screamed.

It was the second consecutive night that UFOs were reported in the eastern Long Island area. Other sightings were reported last week. The air force said it was looking into all the reports.

Several hundred persons, including policemen, said they saw the UFO, and at least one was photographed. The

photo showed a bright, starlike object in the dark sky.

The latest sightings were reported by a radio station which said it received 15 telephone calls Friday night and early Saturday from three communities encompassing the width of Long Island.

The callers reported seeing a white cylindrical object with red and green lights hovering anywhere from 200 feet above the ground to tree-top level. Some said it emitted screaming noises.

Saucers Just Balloons?

Dr. Robert R. Rusk, head of the cosmic research center at New York University, said yesterday that in the past 30 years more than 100 supposed close-up sightings of balloons have been reported by his project and that many of these may have been mistaken for flying saucers.

Rusk spoke at a press conference yesterday morning at the Explorers Club. His balloons, he said, are not meant to be seen and because they are large, it is also hard to tell if they are balloons or not.

Rusk said he did not believe in unidentified flying objects or in such devices but did concede that many strange objects were made at times when there is a high level of

Another UFO in Patchogue

PATCHOGUE (UPI) — Telephone calls to a Patchogue radio station Friday night and early today told a flying saucer — or perhaps a flying disc — was visible over a wide area of suburban Long Island.

Radio Station WALK reported receiving 15 calls between 8 p.m. and 1:30 a.m. saying there was an unidentified flying object in sight.

The UFO was described as a white cylindrical object with red and green lights on top and above windows. Some callers said it was "very bright."

Continued on Page 6, Col. 1

UFO

Continued from Page 1

The object was said to emit a strong light.

WALK said sightings were reported from the homes of Martin, Jennifer, Tom, William and Fred Smith and a neighborhood in both the city and suburbs and as many as 100 people may have seen it.

Police Lt. James J. McGowan said he had received 15 calls.

Official in the Suffolk County Air Force is investigating reports.

The regulation which covers UFO reports is AFR 200-2. Refer to it if you have any questions in the handling of this report. Turn in this form with your OD report in the morning.

One final note. Most UFO reports are rather routine "lights-in-the-sky" sightings. When a report comes in that is obviously based on more tangible evidence, or when several reports of sightings at the same time are received, contact the Operations Duty Officer through the CAC, Ext 493. Reports are much more easily investigated at the time of the sightings than a day or two later. Your cooperation and good sense will help the Air Force investigate these sightings in a professional manner.

'Bright Star UFO' Is Seen in Suffolk

Riverhead—A score of police and dozens of residents of Suffolk last night turned in reports of an unidentified flying object seen from one end of the county to the other.

The majority of the reports described the object "like a large bright star"—white with flashing red and blue lights. Other observers said it also had blinding green lights.

Numerous sightings were reported between 7 and 8 PM in the general vicinity of Lake Ronkonkoma, Patchogue and Bohemia. Additional reports later flooded the Suffolk police headquarters with reports from Riverhead, Lloyd Harbor, Holbrook, Suffolk County Air Force Base, Southampton, Westhampton and Southold and still later from Lloyd Harbor in western Suffolk.

For about an hour, police in two Southold radio cars and one car from Riverhead said they watched the object while patrolling at the town line. Patrolman Bill Hinchman of the Westhampton Beach town police was the last to report seeing the "big white star." Spotting it about 1:30 AM, he said he observed distinct, flashing lights through his binoculars. A Suffolk County Air Force Base spokesman confirmed sightings there but refused further comment.

Three Lloyd Harbor patrolmen, Gerard Sturman, Thomas Pappas and Philip V. Gelsinger said they spotted it while on patrol at about 1 AM. They described it as red and green later changing to a white glow. They said a white object appeared to have been fired from it toward the earth and then it disappeared.

Suffolk County police said no sightings were reported there. Last week, similar sightings were reported by police in Patchogue over the same area at last night's hour, considerably later at night. The object in that week was described as shaped like a "giant hot dog" with numerous flashing lights.

At least 100 people, including about 35 policemen, reported sighting the UFO last night. The Western Suffolk women said the object had the appearance of a bright star but lower in the sky. These reports, all from citizens, said the object appeared to continuously change color from red to white to green to red. Police said the four sightings in the western town were reported by Paula Klumpp of Westhampton Ave., Bohemia, Martin Nally of 18 Colonial Drive, 1-Bo Ronkonkoma, Kenneth Gault of 126 N. Road Ave., Patchogue, and Frank J. J. of South Ocean Avenue, also Patchogue.

AF and Bronxite On the UFO Trail

By MORT YOUNG
World Journal Tribune Staff

A Bronx man and the North American Air Defense Command found themselves in the same boat today. Both reported unidentified flying objects.

For three nights in a row, John J. Aury, of 1234 Forest Rd., said he watched a bright UFO "go by" until it disappeared overhead.

NORAD's air defense space detection and control radar screens have been tracking three orbiting UFO's for a month.

Aury said he didn't tell anyone of his sightings until he got the word, "because I figured no one would believe me."

The Air Force has officially stated that no UFO's have been tracked by radar and reported sightings.

But the NORAD's reported sightings of 10 minutes of sightings of the air force. He said he saw them in the sky and they were bright and they were in the shape of a glowing ball and he saw a reflection of them in the water.

"We don't know they're there," he said. "We don't know they're there," he said. "We don't know they're there," he said.

The three objects were reported to the Goddard Space Flight Center in Greenbelt, Md. Sept. 26 in a satellite observation report. Goddard was alerted of the UFO's by NORAD's headquarters in Colorado.

One of the objects was seen by about 100 people and the other two by about 50 people each.

completing its orbit in 163 and 165 minutes. The nearest they approach earth is 355 and 544 miles respectively; the farthest away, 3,574 and 2,784 miles.

The third object, orbiting at an angle of 35 degrees from the equator to radar, from a distance of 124 miles to an apex of 4,103 miles. It passes the planet every 165 minutes.

"We haven't listed them as debris," said an Air Force spokesman. "but that's what we think they must be. We have no problems tracking them. They present no danger of collision with satellites, or for any future space shots."

Aury—back in the Bronx—said he is completely puzzled by his UFO. On Sunday, Monday and Tuesday at 11:30 P.M., he watched this thing for five to 10 minutes.

He said he saw them in the sky and they were bright and they were in the shape of a glowing ball and he saw a reflection of them in the water.

"I was out there making sure and making sure and making sure," he said. "I was out there making sure and making sure and making sure," he said.

Aury is considered for a private detective agency.

Psychology Incident Reported

BRIGHT LIGHT SEEN IN PATCHOGUE SKY

U.F.O. Is Called Multicolored
by 5 Suffolk Policemen

By FRANCIS N. CLINES

PATCHOGUE, N.Y., Oct. 21.—Five Suffolk County policemen reported having observed early this morning a multicolored light "far brighter than any star" moving slowly through the night sky.

The policemen said they had watched the light gradually ascend above the southeast horizon during a four-hour period, while it changed in color from white to green, red and blue.

Their observations were presented to the Suffolk County Air Force Base in Westhampton as a report of an unidentified flying object. Initial news accounts had described the source of light as "a saucer-shaped."

In interviews at the police precinct this afternoon, however, the five policemen said they could not remember seeing the light. A sixth policeman, a photographer for The Daily News, took photographs of the light.

Report Under Study

A spokesman at the Air Force base said the report was being investigated and that there was no immediate action.

The light was first observed by Patchogue police. Two of the Patchogue police called at the Suffolk County Air Force Base this morning to report the sighting. The light was described as "a bright, white, saucer-shaped object" which moved slowly across the sky.

The light was seen for a period of about four or five minutes, according to the report. It was described as "a bright, white, saucer-shaped object" which moved slowly across the sky.

The light was not moving and appeared to be far away, the policemen said. It was described as "a bright, white, saucer-shaped object" which moved slowly across the sky.

The light was not moving and appeared to be far away, the policemen said. It was described as "a bright, white, saucer-shaped object" which moved slowly across the sky.

THE NEW YORK TIMES, SATURDAY, OCTOBER 22, 1966.

Timmy at First

"I thought it was Timmy at first and called him," Detective Sgt. Joe DeLoe, a fifth witness, said. "But then I saw it on the west horizon."

He said that he had called his wife, DeLoe, and they had watched through the picture window of their home in Patchogue for 15 minutes, until 3:30 A.M.

After that, I went to bed, but I heard the light was still there," he said.

None of the Patchogue police reported sightings.

The fifth police witness, Detective William DeLoe, said that he and his wife, "Timmy," saw the light for a short time. "I saw it for a short time," he said, "but I don't know what it was."

UFO, Away We Go! A Spot a Minute

What is it? This is how a UFO looked to News photographer Joe Mooney's Pentax camera when he shot it on the "camera" at 1000 ft. and exposure was for one-half second. The negative was 1/25 of an inch and the picture shown here was enlarged 2500 times.

By HENRY MACCHURELLA

We're not saying it is and we're not saying it isn't.

But early yesterday morning, three Suffolk County police officers and a 10-year-old boy from East Hampton, a plowman of East Hampton and riding in the night sky south of Patchogue, N.Y. It darted quickly at times and gave off a pulsating light that changed color from red to white to green.

A German of Suffolk County, N.Y. who lives in the area and often goes to the beach, the boy said the police would be interested in the sighting.

Colored like a comet, it was seen by a plowman of East Hampton, N.Y. who was working in the field of the Suffolk County police. The boy said the object was in the sky for about 10 minutes.

The boy said the object was in the sky for about 10 minutes. It was seen by a plowman of East Hampton, N.Y. who was working in the field of the Suffolk County police.

The boy said the object was in the sky for about 10 minutes. It was seen by a plowman of East Hampton, N.Y. who was working in the field of the Suffolk County police.

Chief Maimone reacted skeptically. "It was just a late model, it looked like a car and it moved slowly," he said. "We watched it for a while and then it disappeared."

The boy said the object was in the sky for about 10 minutes. It was seen by a plowman of East Hampton, N.Y. who was working in the field of the Suffolk County police.

Off-Handy We Got A Spot a Whatsis in Sky

By HENRY MARCHELLA

It's not our best friends who caught the flash of light in the sky last night. It was a camera that did the job.

The camera was a Pentax, owned by Jim Monney, a news photographer for the Daily News. It was set at f5.6 and exposure was 1/1000th of a second.

The camera was pointed at the sky, and the flash went off. The result was a picture of a bright, white, circular object in the sky.

The object was seen by many people last night. It was described as a bright, white, circular object in the sky.

U.N. Urged To Find Out About UFOs

A flying saucer enthusiast says the United Nations had better try to find out what's up with unidentified flying objects—at least before one lands at the door of the secretariat building.

Ralph Rankov, chief photographic adviser to the National Investigating Committee on Aerial Phenomena told officials of the U. N. that investigation of UFOs should be brought before the General Assembly.

"It's a worldwide problem, not just a U. S. problem," said Rankov. He noted UFOs have been sighted in almost every country of the world and Rankov has at many sightings, for as long as a decade, the United States.

MYSTERY TO EARTH

Rankov said his investigation of the U. S. problem is that the world is being visited by unidentified flying objects, which are not U. S. or Soviet property, but have been seen by many people.

U. N. officials yesterday said only a few hours after the report, Rankov's photograph and a newspaper photographer showed a film of the object hovering over Patuxent, Md.

The object, watched over a period of two hours at the point where it was sighted, moved in a southeasterly direction and then descended into the woods. The photographer took pictures.

Report UFOs, Of Some Sort

Patchogue — One man said it looked like a tennis ball, and another said it was cigar shaped, and a photographer insisted it looked like a sausage, even though his picture indicated that it was round. That's the way it goes with unidentified flying objects.

The latest UFO was sighted early yesterday over Patchogue by a number of persons with disconcertingly inconsistent reports. Three were policemen, and one was a photographer who took pictures of a parade. It was, The pictures showed a fuzzy round ball in the sky.

The unidentified object hovered in the sky over Patchogue between 4:15 AM and 5:15 AM yesterday, about 100 feet above the ground, according to a Patchogue resident, who said it was a cigar shape. It was seen by a number of other residents, including a police officer, who said it was a round ball. The object was seen by a number of other residents, including a police officer, who said it was a round ball. The object was seen by a number of other residents, including a police officer, who said it was a round ball.

Police officers from different departments, including the Patchogue, Port Jervis, and Port Jervis, who viewed it along with the other residents, who said it was a round ball. The object was seen by a number of other residents, including a police officer, who said it was a round ball. The object was seen by a number of other residents, including a police officer, who said it was a round ball.

The object was seen by a number of other residents, including a police officer, who said it was a round ball. The object was seen by a number of other residents, including a police officer, who said it was a round ball. The object was seen by a number of other residents, including a police officer, who said it was a round ball.

Another possible explanation was that it was a helium-filled ball, or a balloon, or a light. The object was seen by a number of other residents, including a police officer, who said it was a round ball. The object was seen by a number of other residents, including a police officer, who said it was a round ball.

Objects Sighted All Over the Place UFO Reports Fly Thick and Fast on LI

Another report came in from a man who said he saw a bright object in the sky over the island. The object was seen by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19. The object was seen by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19. The object was seen by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19.

That there was a bright object in the sky over the island was also reported by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19. The object was seen by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19.

Then, Robert Brown, a man who lives in the North Patchogue area, said he saw a bright object in the sky over the island. The object was seen by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19. The object was seen by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19.

UFO AND ON for the

last few hours the officers kept a watch on the object as it apparently danced and moved in the southern sky. Somewhere over the Atlantic.

Kruger said that when he first observed the object about 5:30 a.m. it was slowly "zig-zagging" as it approached the peak of its ascent.

SCHONNIG SAID he pulled his car to the side of

the road and saw the object as a bright object in the sky. The object was seen by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19. The object was seen by a man who lives in the North Patchogue area. He said the object was seen on the night of October 19.

"It was descending slowly," Krueger said, "and after an hour and a half I had to go outside to see it because it was over the roof."

"THE LIGHT slowly changed and it seemed to fuse into different colors," he said. "The brighter was white and the other colors were about the same intensity."

Krueger said he and two fellow officers saw a plane fly the area shortly after 11:00 a.m. notified the Air Force about the object.

"The plane was moving much faster and in a much lower altitude than the object," he said. "I've seen a lot of stars, but I've never seen anything like this."

ONLY LAST Sunday night, Norman Newman, who's measurements show fighting equipment, reported seeing a series of changing colored lights trailing a ring of white lights in the sky above his home at 1410 Carman St., Patchogue.

By coincidence, when Newman telephoned police, the man who took the report was Ed Tate, who recalled that he thought "the man had seen something."

James Mooney, a newspaper photographer who captured the flying object on film with the help of a telephoto lens, said it was shaped something like a "sausage."

Mooney said he had one bad moment as he followed the object from Massie to his Massie to his home in Ronkonkoma.

"IT HAPPENED when I looked at it from my car at the Dugton Avenue school," he said. "I heard a 'ploop-ploop' sound. Was it a gas engine? Then I found out I was near some 'choppers'."

Adrian said he came across the object after 10:30 P.M. on the highway. "I saw it," he said. "I saw it."

Neuman said he couldn't tell me what he saw. "I saw it," he said. "I saw it."

The object was seen at 10:30 P.M. on the highway. "I saw it," he said. "I saw it."

AN AIR FORCE spokesman said the reports are being forwarded to the Wright Patterson Air Force Base in Dayton, Ohio, where they will be studied as part of the "Project Blue Book" program, a study of UFO sightings conducted by the University of Colorado.

The object Mrs. Leachlin spotted and which also was viewed by Newman—twinkled a multitude of colors in the northeast sky. It moved slowly to the right.

Sgt. Stanley Dixon of the Patchogue precinct, who flew aircraft in Alaska, said he was certain the flying object was a jet. "I've seen flashing stars with even more brilliant colors in Alaska."

"But," Dixon quickly added, "I feel pretty foolish if a bunch of teen-agers suddenly walked into the station and asked me asking for direction."

ADDITIONAL REPORTED SIGHTINGS (NOT CASES)

DATE	LOCATION	SOURCE	EVALUATION
23	Toronto, Ontario	[REDACTED]	
23	Fort Rucker, Alabama	[REDACTED]	
26	Warsaw, Indiana	[REDACTED]	
28	Lawrence, Massachusetts	[REDACTED]	
30	Virgin Islands	[REDACTED]	

Angle of elevation. (The horizon is 0° elevation. Directly over the observer's head is 90° elevation. The object must appear within this $0^{\circ} - 90^{\circ}$ range). 45° *EE*

Azimuth (which direction on the compass was it headed)? North is 360° . East is 90° . South is 180° . West is 270° . 45° *AZ*

Angle of elevation and azimuth upon disappearance.

Description of flight path and maneuvers of object(s).

UP + DOWN

How did the object(s) disappear? (Instantaneously to the North, etc.)

WENT UP + THEN DOWN TO THE SOUTH

How long was (were) the object(s) visible? Be specific - five minutes, one hour, etc.) *30 MIN*

Manner of Observation:

Use one or any combination of the following items: ground-visual, air-visual, ground-electronic. (If electronic, specify type of radar).

Statement as to optical aids (telescopes, binoculars, etc.) used and description thereof. *N/A*

THIS QUESTION IS NOT PERTINENT WHEN CALLER IS A CIVILIAN.

COMPLETE ONLY IF REPORTED BY A PILOT.

If the sighting occurred while airborne, give type of aircraft _____, identification # _____, altitude _____, heading _____, speed _____ and home station _____

Date and Time of Sighting:

Date: _____

Zulu Time: _____

Light Conditions - day, night, dawn, dusk
