1. DATE - TIME GROUP 26 Oct. 66 0001Z	2. LOCATION Holtsville, Long Island, New York	one witness
3. SOURCE Civilian	10. CONCLUSION Aircraft(possible)	
4. NUMBER OF OBJECTS One		
5. LENGTH OF OBSERVATION 8 minutes	11. BRIEF SUMMARY AND ANALYSIS	
6. TYPE OF OBSERVATION Ground Visual	Observer watched a basketball shaped red and yellow object move toward the western sky. Observer had stopped her car at a stop sign and before proceeding heard a swish sound. As observer made the turn she noticed a strange glow coming at her. It was all lit up, with a red and yellow glowing light. The object disappeared heading straight upward. Observer compared the unknown to a blimp . Considering the submitted evidence it appears that the witness saw and reported an aircraft. There is extremely a large air traffic area, and it appears that the witness observed some type of aircraft.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

It all started on the 26 of Oct 1966.
 I was on my way to service my car.
 I live off [redacted] in Holtville.
 I stopped at the stop sign, looked
 to see if any cars were coming.
 As there were none - I was about
 to go, something told me to open
 my door, I heard a Swish. I thought
 of my tire I looked down but
 didn't bother to get out, I started
 my right turn and as I did
 I saw this thing a very strange
 glow I looked for a second
 and I thought my eyes were playing
 tricks on me but then I knew
 it was something I never saw.
 I don't know where it was, I thought
 I could not believe it, I thought
 everything. I would not take

my eyes off it. It looked
 like it was hanging over ~~the~~ ^{toward} me.
 That's why I could not believe my
 eyes. I gazed the ^{an} little more
 and as it moved faster I
 moved faster until it was
 out of site and up it
 went. But I know as from what I
 saw it was a very strange feeling
 to see something like that. Which
 I will never forget as long as I
 live. I hope this will be a help
 to you. It is hard to describe
 on paper. I can describe it well
 at the ~~right~~ ^{place} where I saw it.
 Best. To ~~every~~ ^{be} a help

anytime
 Yours Truly

g. Theodolite

Yes

No

d. Window glass

Yes

No

h. Other

I put my window down
for a closer look and
was startled from what I saw.

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

The only close thing I could think of
that I ever saw was years ago. I think
it called a Zepeline I may have the
spelling wrong. On a sunny day it would
shine
from the sun and cast a light shiny like
a piece of tin or something.

14. Did the object disappear while you were watching it? If so, how?

Straight up -

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what it moved behind:

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): Yes ☒ No ☐ Don't Know. IF you answered YES, then tell what in front of:

17. Tell in a few words the following things about the object:

a. Sound

b. Color

It was all lit up, with a red & yellow glowing light.

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

It is hard to say the angular size, from me looking at it all. I can say it looked like the size of my 30" round table maybe less but not more.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.
