BRIEF SUMMARY AND ANALYSIS                                                                                                                                                                                                                                                                                                                                                        |
| 6. TYPE OF OBSERVATION<br>Ground Visual                                                        | Observer watched three brilliant lights in a V formation travel toward the western sky. It was like a mass of brilliant lights; tops were red, and the bottom was orange. It was about five miles between the lead object and the trailing objects. It looked like orange droplets fell from the tail of the one object.                                                              |
| 7. COURSE<br>westward                                                                          |                                                                                                                                                                                                                                                                                                                                                                                       |
| 8. PHOTOS<br><input type="checkbox"/> Yes<br><input checked="" type="checkbox"/> No            | A test aircraft was in the area at the time of the sighting. The aircraft was equipped with a glass bottom and fitted with TV cameras and a high intensity infra-red light. This flight was conducted at 2000 feet and the light would have been visible from the ground. The nature of the light combined with the clouds in the area would produce an eerie effect from the ground. |
| 9. PHYSICAL EVIDENCE<br><input type="checkbox"/> Yes<br><input checked="" type="checkbox"/> No |                                                                                                                                                                                                                                                                                                                                                                                       |

K. CAPT JAMES R. WHITING, FV 586521, AERIAL OPERATIONS OFFICER  
708 COMBAT SUPPORT GROUP HAMILTON AFB CALIF.

MR. BUMGARDNER, LICK OBSERVATORY, SAN JOSE, CALIF WAS CONTACTED.  
NO ASTRONOMICAL BODY OF PHENOMENON WAS EVIDENT DURING THIS PERIOD  
WHICH WOULD ACCOUNT FOR THIS SIGHTING. MR. BUMGARDNER REFERRED  
ME TO MR DAVID WOLFE, PALMDALE VICTOR SAN CARLOS CALIF RE

PAGE 4 RUWMEWA 4800 UNCLAS

MILITARY AIRCRAFT TESTING. A LIGHT INTENSITY MEASURING DEVICE.

MR WOLFE CONFIRMED A TST FLIGHT WAS CONDUCTED DURING THAT TIME  
PERIOD. AN A1E EQUIPPED WITH A GLSS BOTTOM AND FITTED WITH TV  
CAMERAS AND A HIGH INTENSITY INFRARED LIGHT WAS IN OPERATION.

THIS FLIGHT WAS CONDUCTED AT 2000 FEET AND THE LIGHT WOULD BE  
VISIBLE FROM THE GROUND. HE ALSO STATED THAT THE NATURE OF THE  
LIGHT COMBINED WITH THE CLOUDS IN THE AREA WOULD PRODUCE AN ERIE  
EFFECT FROM THE GROUND.
