Contact was made with WP RAPCON regarding the observation of UFOs over the Dayton area. Conversation with Mr. Sizer (70042) revealed that an aircraft with an advertising sign would be flying over the Dayton area between 1830 and 2030 hours EST 14 December 1966.

Contact was made with Mr. Barnes, of Barnes Advertising Company, Winchester, Kentucky(see 18-19 July 66, Dayton, Ohio). He was flying in the Dayton the night of 14 Dec. 66. He landed at the Montgomery County Airport and refueled. He was advertising for Schoenling Beer on the night of 14 Dec. 66. The aircraft flies between 45-50 miles per hour while he is in operation. The sign read "Happy Holiday Season from Schoenling Beer".

Dear Sirs:

I thought maybe you'd would be interested in this negative. Although we were unaware of anything in the sky at the time the the pictures were taken, we were quite surprised and bewildered to find this object when we saw the finished pictures. Could you look at it and return it with information as to what you think it is? I am a teen aged boy - and very interested in your study of U.F.O.'s.

Thank you,
[redacted]

P.S. Enclosed is a self-addressed envelope (stamped) for use in sending the negative check. Also could you please send me any information as what to do if I should see a U.F.O.?

When I first observed object it looked like a light flashing either on a plane or high radio Station abntenna. But as I approached, object was stationary and not moving. Lights were just rotating red and white. I then proceeded to try and flag down 2 automobiles to Confirm what I was seeing. Needless to say no one stop as it was at 11:45 P.M. I then reached in the car and pulled out flash light and pointed in direction of object at that instant object moved

Dear Mr [redacted]

This replies to your letter reporting the December unidentified flying object (UFO) sighted in Iran by you and your friend.

It would be extremely difficult to perform a comprehensive investigation at this late date. In fact, it is extremely difficult to investigate a sighting which is more than a month old. Also, we do not normally investigate UFO sightings outside the territorial limits of the United States since we lack jurisdiction outside those limits. Your observation will be filed for information purposes.

Thank you for reporting your sighting to the Air Force; we appreciate your interest in our project. I have attached some reading material on this subject which I think you will enjoy.

To whom it may concern:

I am a Peace Corps volunteer living in Iran and working with the Department of Fish and Game of this country. In December of 1966 I was working on a Research Project dealing with a population of pheasants. During the course of the project I had to camp out in the study area. On the night of December 21st another volunteer in Iran, Gary Reed, was staying with me and we were sitting around a very low, barely [illegible]. The weather was hazily overcast to a low ceiling of between 2000 and 2500 meters. (I judged this by the height of the surrounding mountains). We were on a small hill elevation of about 800-1000 meters. A strong wind which had been blowing all day quit about 8 P.M. about 9 P.M. we were sitting around the fire when we heard above us what sounded like a loud "whistling" noise. We both looked up to where we thought the noise was coming from, but could see nothing. The noise lasted, persisted and was moving to the east of us about 100 meters and continued in a straight line which seemed to follow a magnetic azimuth of 85°. As we "followed" the noise with our eyes an object became visible for about three seconds. It was wing-shaped, wider in the middle and tapering to the ends. There was no lights on it, nor any apparent. Then it disappeared from sight but we continued to hear the noise. The noise was like the whistling sound of a jet, but very soft. About one to two minutes after the sound ceased we heard a similar noise to the north of us which seemed to be heading in the same direction as the first. I thought it might be the first one circling but we both thought it was probably a second craft. We did not see this one but again followed the sound until it disappeared. We waited for some time silently but saw or heard nothing else. At about 9:30 PM a light rain began and with a gusty wind from the west. I went to bed at 10:00 PM.

Proposed reply to letter from Gary Sieja, 24 March 1967

Dear [redacted]

Reference your recent letter regarding the observation of an unidentified flying object over the Toledo, Ohio area. It is extremely important that the Air Force be contacted as soon as possible following the observation. Several of the reports were quite old; therefore, a meaningful scientific investigation would not be possible. The information will be investigated by Project Blue Book analysts and filed accordingly.

NICAP MASSACHUSETTS INVESTIGATING SUBCOMMITTEE

13 Friend Court
Wenham, Massachusetts

SUBJECT: UFO SIGHTING - Rt. #25 2-3 mi. before Middleboro Center, Massachusetts exit - 12/1/66

DATE: 2 January 1967

FROM: Raymond E. Fowler
Chairman; NICAP MASS SUBCOM

TO: NICAP
Washington, D.C.

Enclosed is a UFO report that was not personally investigated but nevertheless may provide further statistical information on the rash of UFO sightings from that general area. Re: newsclips on seemingly excellent closeup sightings at Wareham and Onset Massachusetts in early November. Attempts to investigate personally were to no avail as the witnesses wanted to remain anonymous. Apparently a USAF investigation was partially successful as the witnesses agreed to talk to USAF investigators by phone from nearby Otis AFB. The enclosed report involves a glowing band of light in the sky. No structural detail was positively seen and as far as is known there were no other witnesses. I talked to Mrs. Hathaway on the phone. She is an amateur artist and feels quite certain that her details are precise. However, she wants her name kept confidential for fear of being bothered by crank callers. Since a full-scale investigation was not warranted due to the nature of the sighting (light-in-sky report with no unusual features), no evaluation has been made. The report may become valuable if other sightings of a better quality are submitted for that date and location.

Respectfully submitted,

Dear Mr[redacted]

Reference your request for information on three separate unidentified flying object observations. Without additional information on each sighting, a scientific investigation is not possible. Details such as angular size, lighting characteristics, whether optical aids were utilized, etc. are essential in a comprehensive evaluation. In addition, it would be essential to know what instruments were used to determine the speed and altitude of the object.

On one specific sighting you mentioned that the object was traveling at a speed of at least 30,000 mph at an altitude of 25 - 35 miles. Even with the additional information at this late date, it would be extremely difficult to locate the exact stimuli in each case. Normally records of any aircactivity in a particular area are destroyed after 30 days.

sightings: 1.) At about 5:00 p.m., on the afternoon of Dec. 5, 1965, a huge triangular shaped object was observed. It was first observed on an easterly course at about 2-10 thousand m.p.h. . After about 10 seconds of observation the object stopped dead, and started on a westerly course. It was observed for about 30 seconds,and it went above the clouds. Its height was about 200 feet. The object was silent.------the object defied the performance of any conventional aircraft.

2.) At about 10:58p.m. on the night of July 1, 1966, a tear shaped object was sighted traveling on a south to course. The object was about 25-35miles high, and traveling at a speed of of at least 30,000 mph.The object was silent. It was visible for about 3 seconds or less.

3.) On Aug. 4, 1966at 11:30 p.m.an object was seen traveling in a west to east direction. The U.F.O. was the brightest thing in the sky at the time of its appearance excluding the moon. It zig-zagged many times before going out of sight 3 minutes later.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

My college roomate and myself were returning from the printing of our school news paper. I noticed the light while driving. My friend was driving and I kept it to myself. After about 1 minute I told my roomate and we stoped the car. We observed the object as it moved very fast across the sky. At first we thought it was a plane, until it stoped and changed directions.

We watched it for about 10 minutes. It started moving east at a relitvly normal speed. It then picked up speed and seemed to glow + flash brightly.

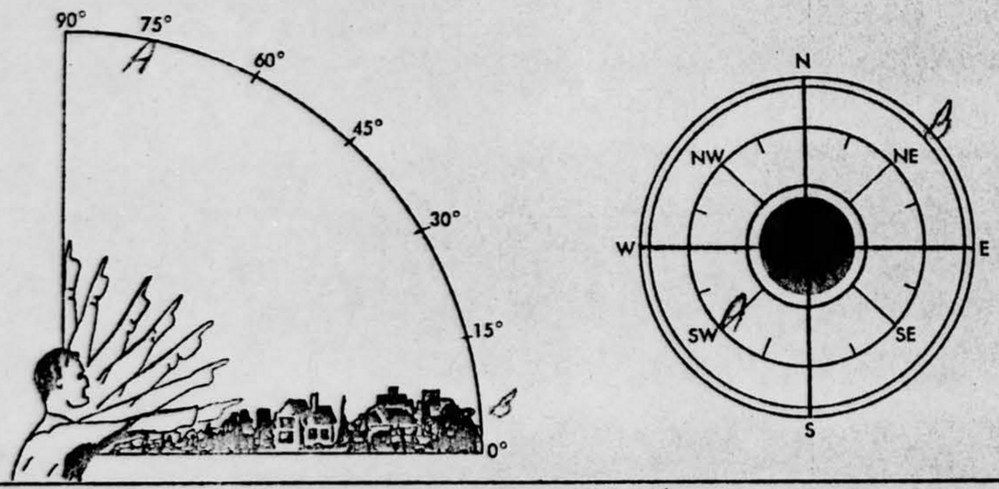

It disappeared over the horizon and we drove back to school, telling only our friend who is a Civil Defense man. And who has, since then, set up a telescope (350 power) on the roof of our dorm.

Thank you for your time,

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was traveling South on Rt. 11 between Hallsted Pa and new milford when I saw a bright red light in the sky to the southeast. I knew it wasn't a star because it was very cloudy and less than an hour later a heavy snow fall began. I knew it wasn't a plane because it wasn't moving and the light was much too big and bright. As I came closer the object moved directly over the road and as I came closer still it kept getting lower. In a few seconds it was directly above me, about twice the length of my car.

The car radio had been playing, suddenly it went silent. I could hear nothing but the car motor. I stopped the car and looked up directly into the bottom of a large rounded object with two red lights and one white one.

I sat there for a full minute staring up at it. It was no higher than just above the telephone poles.

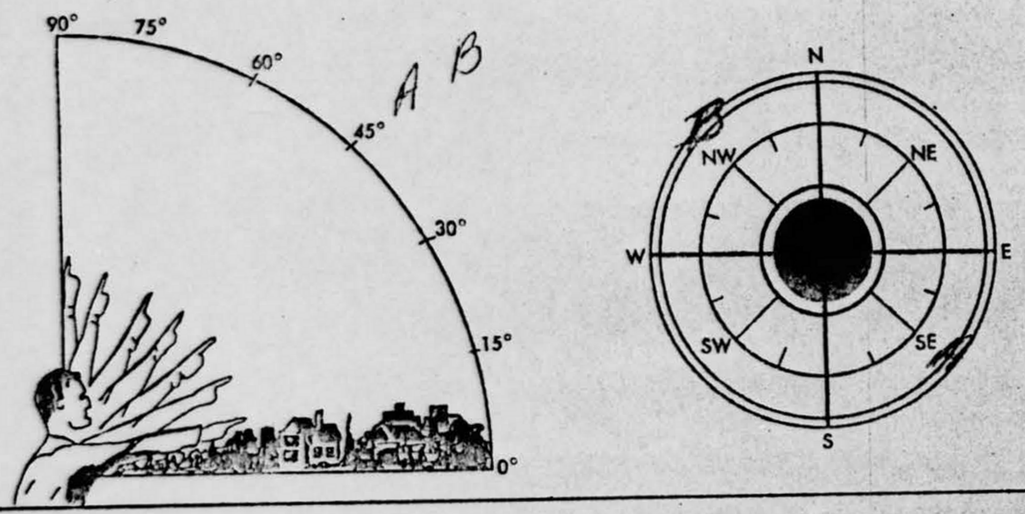

I drove quickly away. I went about one mile and decided for my own peace of mind I had to go back. I turned around and went back.

Just as it came into sight it started to rise back up in the air and in less than 2 seconds it was at a ridge of hills. The red light was still bright but in the dark the outline was not visible. The light did not fade away. It was either turned off or the object disappeared. It was bright and suddenly was no longer there.

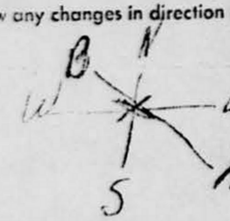

The radios resumed playing as soon as I was a few feet away from the object.

There, now I've told somebody. All I can do is hope you believe me.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it.
