U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

1. When did you see the object?

SATURDAY FEB 1967
Day Month Year

2. Time of day:

9 15
Hours Minutes

(Circle One): A.M. or P.M.

3. Time Zone:

(Circle One): a. Eastern
b. Central
c. Mountain
d. Pacific
e. Other _____

(Circle One): a. Daylight Saving
b. Standard

4. Where were you when you saw the object?

LANCASTER LANCASTER PENNSYLVANIA
Nearest Postal Address City or Town State or County

5. How long was object in sight? (Total Duration)

10
Hours Minutes Seconds

a. Certain
b. Fairly certain

c. Not very sure
d. Just a guess

5.1 How was time in sight determined?

5.2 Was object in sight continuously?

Yes ✓ No _____

6. What was the condition of the sky?

DAY
a. Bright
b. Cloudy

NIGHT
a. Bright
b. Cloudy

7. IF you saw the object during DAYLIGHT, where was the SUN located as you looked at the object?

(Circle One): a. In front of you
b. In back of you
c. To your right

d. To your left
e. Overhead
f. Don't remember

10. The object appeared: (Circle One):

- a. Solid
- b. Transparent
- c. Vapor
- d. As a light
- e. Don't remember

11. If it appeared as a light, was it brighter than the brightest stars? (Circle One):

- a. Brighter
- b. Dimmer
- c. About the same
- d. Don't know

11.1 Compare brightness to some common object:

BRIGHTER THAN ANY LIGHTS I EVER SAW.

12. The edges of the object were:

- (Circle One):
- a. Fuzzy or blurred
 - b. Like a bright star
 - c. Sharply outlined
 - d. Don't remember

e. Other _____

13. Did the object:

(Circle One for each question)

- | | | | |
|---|-----|----|------------|
| a. Appear to stand still at any time? | Yes | No | Don't know |
| b. Suddenly speed up and rush away at any time? | Yes | No | Don't know |

14. Did the object disappear while you were watching it? If so, how?

Yes, it just disappeared out of the air.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

☒ No

Don't know.

If you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound

No sound

b. Color

It was a bright white light. It changed to red when it was

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much the object would have been covered by the match head?

It didn't do it at the time.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

a. North

c. East

e. South

g. West

b. Northeast

d. Southeast

f. Southwest

h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

a. Eyeglasses

Yes

No

e. Binoculars

Yes

No

b. Sun glasses

Yes

No

f. Telescope

Yes

h. Other _____

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass when you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

The UFO looked like one of the lunar probes.

Dear Sirs,

I am sending enlargements of two
Polaroid pictures which I have.

These were taken by two male
friends of mine, both about twenty-nine, three
miles south of Easton, Pa. The time was
late afternoon in Feb. 67.

The object was sighted as my friends drove
by some power lines. They turned the car
around and took these pictures. It was a silver-
gray color.

After hovering near the lines for several minutes
the object went straight up until it was out of
sight. It was at least thirty ft. in dia. and
about 150 yds. away.

Could you please send me a copy of
the Blue Book.

1. Reference your letter of 14 February 1967 in which you forwarded a physical specimen for chemical and metallurgical analysis.
2. X-ray emission spectroscopy revealed the presence of strontium, barium, potassium, and sulfur. Other minor chemical elements such as iron, boron, aluminum, and calcium were also found. It is suspected that the specimen was the aftermath of a flare or fireworks display since the principal chemicals found were strontium and potassium which are major elements of some types of fireworks.
3. Request that you inform the local citizen of our results. There was no evidence disclosed to indicate the material was extraterrestrial in nature.

Date February 10, 1967
Time Friday night 11:28 - 11:36
Object in sight $\pm$ lasted 8 min. Time was judged by my watch.

Description of object - appeared to be a plane and did
any knots and I, pushed it as a plane. It made
a turn, moving left, and then right. It seemed
stationary for 2-3 minutes. It began to climb again
to about 35°. When I lost sight of it was low in Eastern
horizon, about 15°. I noticed a turn then which the
object approached, as I perceived my sight on the
down side, and noticed that the object was moving
to the left. It stayed above and to the right of the plane,
and became stationary again. It was stationary
for 2-3 minutes again. Then I saw it. The knots
object began to drop a sharp turn like thing from
at bottom. I yelled for my brother to come out of
the garage, because he was getting my telescope.
We both + we both saw the object drop more quickly
"thing". The "thing" didn't last long, just a few
seconds. ~~It was only~~ I saw only
about 10-15 seconds for the object dropped then
"thing". I reached back for my telescope, but
when I tried to pick it up, it was gone. The other two
saw it just climbed out + were gone.
Note on things the "thing" which appeared from the
object, burst up almost immediately. But before
the object disappeared. The "thing" at bottom began
above then the things I saw it had been it a bit.

FACTUAL DATA

1. X-ray emission spectroscopy showed Sr, Ba, K, S, and Cl to be present.
2. X-Ray diffraction gave a very complex pattern that could not be identified. The sample was separated into a water soluble sample and an insoluble sample. The insoluble sample was identified as Sr SO₄ plus a small amount of unidentified phase. Infrared spectroscopy showed a sulfate present. The soluble phase could not be identified but appeared to be a carbonate.

Dear Major Quintanilla:

Request your office analyze the enclosed material and furnish this activity with information on results.

The substance was turned in to this office by a local citizen who reports that it burned holes through leaves and branches of a tree in his back yard as it fell, and narrowly missed the roof of his garage.

Any information you can provide will hopefully aid this office in giving the gentleman who turned in the material some logical explanation.

14. Did the object disappear while you were watching it? If so, how?

Yes, just disappear

15. Did the object move behind something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't know.

If you answered YES, then tell what

it moved behind: _____

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One):

Yes

No

Don't know.

If you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound

none

b. Color

Large bright light, plus flashing sides

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

like sparklets which sometimes fall from meteorites falling stars, but the object was no meteor.

Shape - The shape was like a light and star. The yellow white light was a solid light, not ~~also~~ blinking or sparkling.

Weather Conditions - Temp. was around ~~for~~ fifty degrees. Very slight wind, and it was slightly cloudy.

About The Object Color was yellow-white. No sound.

It dimmed once & became bright again. Using the match at arms length method, the object would almost be covered. Other two say color was orange-white.

Speed & Altitude - Both unpredictable. We say rather high, very high. Speed unknown, but when we watched it the light always moved slow.

Distance - Properly far off. Unknown mostly.

We were at - our house outside in backyard. In the residential section. Only saw object with our eyes.

Comparing - The object looked like our everyday plane or jet preparing for its approach to the San Francisco air field, 25 mi. north of here, with its landing light on. Its circular path gave us this idea, but its stationary actions changed our minds.

Other Sky bodies - The moon was up, and it was not

Have studied VFO since 5th grade, now in 12th grade, a senior. Studied outer space with my Telescope much. Have seen Mars, Saturn, Jupiter, Venus, moon, and other things, so I know what they look like with & without scope. Have seen many meteor & satellite too.

I reported this to the Redwood City Police Department soon after it happened, on February 10, 1967, at 12:00 about I placed them in note.

Our Conclusions - Not a meteor, for it was stationary.
Not a plane, there was no sound.
Not cloud reflection, for we have seen them before because we have a Sky Watcher club & we observe them. There is no other.

Dear Ray:

Enclosed is the report of the interview I had with Mrs. [REDACTED]

Mrs. [REDACTED] and her husband were driving along Route 15 outside of Hartford Connecticut when she noticed the object through her windshield. Her husband did the same. The object was stationary above the Highway and was very bright. Her husband was reluctant to say to much only that there were people pulled off to the side of the road looking at the object.

I doubled back on my questioning to see if she would give me a differant answer but she didn't. She said she had a negative outlook on the UFO question untill now.

I wanted to get more information like a drawing but her husband was just leaving for work and I had to make it brief.

I hope this report is to your satisfaction.

Sincerely yours,

Gary M. Stoy

SIGHTING ACCOUNT

Mr. and Mrs. [REDACTED] were driving from New Haven, Conn. to Everett, Mass. They noticed a bright glowing object in the sky and upon nearing the object they noted people stopping beside the road to observe it so they did likewise. It was described as being brighter than a headlight of an automobile at 1500-3000 feet. It was almost directly overhead.

* Mrs. [REDACTED] has obviously exaggerated the apparent size of the object. She estimated it to be 4-6 inches at arms length on the data sheet yet stated it was several times larger than a bright star to the chairman via a telecon prior to actual personal interview.

SKETCH OF UFO(s)

REMARKS

Note Venus. Venus was lower and in the West. (Set approx. 7:06 PM). Moon was to the left of where the object was indicated to be by the observer. (Located in Aries and setting time was 8:27 PM EST). Jupiter and Sirius are suspects but the object described was large enough and unusual enough to attract the attention of many plus the fact it had two distinct red lights on each side. 2. Date of Observation February 12, 1967 Time AM 6 PM Time Zone East
3. Locality of Observation Rt. 15 between Kensington and Hartford Conn.
4. How long did you see the object? Hours 40 Minutes Seconds
5. Please describe weather conditions and the type of sky; i.e., bright daylight, nighttime, dusk, etc. Dark with clear sky
6. Position of the Sun or Moon in relation to the object and to you. The moon was left of the object and left of the observer.
7. If seen at night, twilight, or dawn, were the stars or moon visible? Yes.
8. Were there more than one object? No If so, please tell how many, and draw a sketch of what you saw, indicating direction of movement, if any.
9. Please describe the object(s) in detail. For instance, did it (they) appear solid, or only as a source of light; was it revolving, etc? Please use additional sheets of paper, if necessary. The object appeared as a huge light with a red light on the sides.
10. Was the object(s) brighter than the background of the sky? Yes.
11. If so, compare the brightness with the Sun, Moon, headlights, etc. Brighter than a headlight.
12. Did the object(s) — (Please elaborate, if you can give details.)
 - a. Appear to stand still at any time? Yes
 - b. Suddenly speed up and rush away at any time? NO
 - c. Break up into parts or explode? NO
 - d. Give off smoke? NO
 - e. Leave any visible trail? NO
 - f. Drop anything? NO
 - g. Change brightness? NO
 - h. Change shape? NO
 - i. Change color? NO
13. Did the object(s) at any time pass in front of, or behind of, anything? If so, please elaborate giving distance, size, etc, if possible.
14. Was there any wind? Yes If so, please give direction and speed. 40-60 MPH from the North
15. Did you observe the object(s) through an optical instrument or other aid, windshield, windowpane, storm window, screening, etc? What? Windshield
16. Did the object(s) have any sound? NO What kind? How loud?
17. Please tell if the object(s) was (were) —
 - a. Fuzzy or blurred.
 - b. Like a bright star.
 - c. Sharply outlined.

18. Was the object —

- a. Self-luminous?
- b. Dull finish?
- c. Reflecting?
- d. Transparent?

19. Did the object(s) rise or fall while in motion? NO

20. Tell the apparent size of the object(s) when compared with the following held at arm's length:

- | | | |
|------------|------------------|---------------|
| a. Pinhead | d. Nickel | g. Orange |
| b. Penny | e. Half dollar | h. Grapefruit |
| c. Dime | f. Silver dollar | i. Larger |

Or, if easier, give apparent size in inches on a ruler held at arm's length. 4-6 inches. Red lights 2 in

21. How did you happen to notice the object(s)? Driving on route 15 and saw object through windshield against dark sky.

22. Where were you and what were you doing at the time? Driving on Rt. 15

23. How did the object(s) disappear from view? Drove away from object.

24. Compare the speed of the object(s) with a piston or jet aircraft at the same apparent altitude. Object was statio

25. Were there any conventional aircraft in the location at the time or immediately afterwards? If so, please elaborate. 20 m North

26. Please estimate the distance of the object(s). Overhead 15,00-30,000 feet alt.

27. What was the elevation of the object(s) in the sky? 90° Please mark on this hemisphere sketch:

28. Names and addresses of other witnesses, if any. [REDACTED]

29. Please draw a map of the locality of the observation showing North; your position; the direction from which the object(s) appeared and disappeared from view; the direction of its course over the area; roads, towns, villages, railroads, and other landmarks within a mile.

30. Is there an airport, military, governmental, or research installation in the area? Pratt and Whitney Aircraft Corp.

31. Have you seen other objects of an unidentified nature? If so, please describe these observations, using a separate sheet of paper.

32. Please enclose photographs, motion pictures, news clippings, notes of radio or television programs (include time, station and date, if possible) regarding this or similar observations, or any other background material. We will return the material to you.

33. Were you interrogated by Air Force investigators? By any other federal, state, county, or local officials? If so, please state the name and rank or title of the agent, his office, and details as to where and when the questioning took place. NO.

Were you asked or told not to reveal or discuss the incident? If so, were any reasons or official orders mentioned? Please elaborate carefully. NO.

34. We should like permission to quote your name in connection with this report. This action will encourage other responsible citizens to report similar observations to NICAP. However, if you prefer, we will keep your name confidential. Please note your choice by checking the proper statement below. In any case, please fill in all parts of the form, for our own confidential files. Thank you for your cooperation.

UFO SUMMARY REPORT FORM

Sighting Date: 3/09/67

Date of Report: 3/09/67

Color: 2 Red, One White Sound: None heard Shape: Object not seen- Lights arranged in triangle-Position

UFO passed in front of NA at NA ft/mi - passed behind NA at NA ft/mi

SIGHTING ACCOUNT

The witness was proceeding NE on Route #133 Andover when his attention was attracted to a triangular cluster of bright lights estimated to be about 300 feet off the road at and estimated 1000-1500 ft. altitude over the Andover Country Club grounds. The witness tried to stop his car for a better look but traffic around him prevented a full stop. He observed the object through his front and side window at 10-15 mph. Upon reaching home he telephoned the "Lawrence Eagle Tribune" to report what he had seen. The "Tribune" phoned me and I in turn phoned Mr. [REDACTED] for his account of the sighting. Since the sighting was made by one person and was of a very short duration, no personal interview was arranged. The report will be used for information purposes and possible comparison with other sightings reported in the past. It will be used as supplementary information to any other report of a similar phenomena reported on this date.

SKETCH OF UFO(s)

REMARKS

Interesting things to note are: 1) The absence of "green" lights of a conventional aircraft; 2) The lights were steady, not flashing 3) The "apparent" hovering. 4) The fact that a UFO was reported earlier at Foxboro, Massachusetts which carried Red & White lights on the same evening. (This is not a sighting but a report of a sighting.)

MAY 25 1967

Dear Mr. [REDACTED]

This replies to your recent correspondence concerning your unidentified observation. Examination of the submitted data fails to reveal a positive identification, primarily because of the lack of essential data such as flight characteristics, angular velocity, and how the object disappeared.

No other unidentified flying object reports were submitted to the Air Force from the vicinity of Clawson, Michigan for February 8, 1967.

At this late date a meaningful scientific investigation is not possible. It is important for an individual to report his observation to the Air Force as soon as possible after the sighting. This enables Air Force analysts to perform a comprehensive investigation. The submitted information will be added to the present data for possible future reference.

Proposed reply to UFO report from Mr. [REDACTED]

Dear Mr. [REDACTED]

This replies to your recent correspondence concerning your unidentified observation. Examination of the submitted data fails to reveal a positive identification, primarily because of the lack of essential data such as flight characteristics, angular velocity, and how the object disappeared.

No other unidentified flying object reports were submitted to the Air Force from the vicinity of Clawson, Michigan for 8 February 1967.

At this late date a meaningful scientific investigation is not possible. It is important for an individual to report his or her observation to the Air Force as soon as possible after the sighting. This enables Air Force analysts to perform a comprehensive investigation. The submitted information will definitely be added to the present data for possible future reference.

Dear ~~REDACTED~~

Reference your recent letter reporting your unusual observation to the Air Force. A detailed investigation did not reveal a positive identification; however, our analysts were able to uncover a possible solution. The description you provided is very consistent with that normally reported for an observation of a hot air balloon. The Air Force has been plagued lately with reports from all parts of the country of these hot air balloons. Persons of all ages have been releasing these balloons which are made from dry cleaning bags with candles situated on a platform of some type. As previously mentioned, a positive identification was not made but we feel that you more than likely observed one of these balloons.

Thank you for reporting your observation to the Air Force.

If you answered YES, then tell what

in front of: _____

17. Tell in a few words the following things about the object:

a. Sound Absolutely Silent - This seemed important!b. Color lights were red, green and white

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

only a few lights
would have been covered.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails. Place an arrow beside the drawing to show the direction the object was moving.

It was night. I saw only
lights. I'm not certain
how many, but they were bright
red, green and white. Regardless
of the angle from which I
viewed it, I could always see
at least 4, 5, or 6. They blinked
on and off consecutively, very rapidly.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

There is one main factor which convinced me that the object was not a plane of any kind:

Considering the apparent nearness of the object, the extreme brightness of the brilliant lights, the fact that I observed it as it approached, was directly opposite, and then as it went away from me;

Considering that it was fairly low in the sky;

Considering that the wind was fairly calm and the area right at the town line limits was perfectly quiet,

There was no sound coming from the object, at any time while I observed it.
