FORM

FTD SEP 63 0-329 (TDE) Previous editions of this form may be used.

20. Do you think you can estimate the speed of the object?

(Circle One)

Yes

No

IF you answered YES, then what speed would you estimate?

for 5 minutes, drifted very slow, & hovered. when it left it went rapidly.

21. Do you think you can estimate how far away from you the object was?

(Circle One)

Yes

No

IF you answered YES, then how far away would you say it was?

at first, about 200 feet then higher over time then about 100 feet.

22. Where were you located when you saw the object?
(Circle One):

- a. Inside a building
- b. In a car
- c. Outdoors
- d. In an airplane (type)
- e. At sea
- f. Other

23. Were you (Circle One)

- a. In the business section of a city?
- b. In the residential section of a city?
- c. In open countryside?
- d. Near an airfield?
- e. Flying over a city?
- f. Flying over open country?
- g. Other

24. IF you were MOVING IN AN AUTOMOBILE or other vehicle at the time, then complete the following questions:

24.1 What direction were you moving? (Circle One)

- a. North
- b. Northeast
- c. East
- d. Southeast
- e. South
- f. Southwest
- g. West
- h. Northwest

24.2 How fast were you moving? _____ miles per hour.

24.3 Did you stop at any time while you were looking at the object?

(Circle One)

Yes

No

25. Did you observe the object through any of the following?

- | | | | | | |
|-----------------|-----|----|---------------|-----|----|
| a. Eyeglasses | Yes | No | e. Binoculars | Yes | No |
| b. Sun glasses | Yes | No | f. Telescope | Yes | No |
| c. Windshield | Yes | No | g. Theodolite | Yes | No |
| d. Window glass | Yes | No | h. Other | | |

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

It seemed to be shaped like a blender, wider at the top than at the bottom.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? None

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

No

31. Was anyone else with you at the time you saw the object? (Circle One)

Yes

No

bus drive outside. The others were in a dormitory

31.1 IF you answered YES, did they see the object too? (Circle One)

Yes

No

31.2 Please list their names and addresses:

(1) [redacted] Friendwood, Texas
 (2) [redacted] Riverside, Calif.
 (3) [redacted] Fayetteville, N. Carolina
 (4) [redacted] Waco, Texas

When I first saw it, it was like a giant sun hanging in the sky. It was low, perhaps fifty feet up, and perhaps only about 200 feet from me. I had not seen anything, and all of a sudden it was there. It apparently had come from behind the trees and the big building we use as a gym, dining room, kitchen, etc.

My first thought was that it was a trick of some sort, and I stopped and watched it, trying to figure out what it could be. It was not moving at that time. Suddenly it pointed down and darted toward me, stopping almost directly overhead, so that I had to look up to see it. When it started to move toward me, I began moving up the driveway to get back to my house, but when it stopped above me, I stopped also to look. As I looked, I could see a vertical shape of some kind in the transparent structure above the light, and at that point I became frightened and urged my dog to hurry to the house with me.

At about that same time a number of students came rushing out of the west wing of the dormitory and stood in the doorway, watching the object. Seeing them, I began crossing the lawn toward them. They were talking among themselves, very excitedly, and I could hear them saying, "Look at that thing! Gad, look at that thing!" I called to them, but not very loudly, "What is it? What is it?" but they did not hear me. As we watched, the object was drifting, very slowly, over toward the gymnasium (in a westerly direction) and then started drifting along the roof, northwesterly. I heard the students saying, "It is going to land on the roof." I was thinking the same thing, and I was concerned, because I was afraid it would set fire to the building, and I remember saying, "Get off my roof! Get off my roof!" The object hovered over the far end of the roof, began to settle as though it were going to land, hesitated, and then all of a sudden rose slightly and took off toward the trees above the shore of the lake. (There is a sharp drop to the lake level.) We saw the light bobbing up and down a few times through the trees, and then it disappeared.

The students went back inside (this was after Taps and they had been in bed) and I took my dog back into my house. Then I went over to the dormitory to talk to the night watchman. He had not seen the object, because he had been trying to restore order and quiet in the dorm. He asked me whether it could have been a helicopter, and I said no, for there had been no noise. I asked him how the boys had become aware of it, and he said all he knew was that someone had shouted out, "There's a deny out there!" Then had followed some rushing to the windows and the rushing of some of the boys in the west wing to the front door, where they had stood and watched. As we were talking, I suddenly saw the object, easily recognizable because of the brilliant orange light, flying high and far out over the ocean. [REDACTED] the night watchman, looked for it as I saw, "There it is," but as I said so, it disappeared. A moment later the light appeared again, still higher and farther out, and this time he saw it. It showed only momentarily and then it disappeared and we did not see it again.

It appeared to me to be shaped something like a blender, wider at the top and tapering to the bottom. It did not look like a saucer or a dome. Whatever it was that I saw inside it could have been a person, and there was a distance of at least two or three feet between the top of it and the top of the lighted area. There was plenty of space around it, as there would be in the case of a person in a room.

13. Did the object:

(Circle One for each question)

- | | | | |
|---|------------|-----------|------------|
| a. Appear to stand still at any time? | <u>Yes</u> | No | Don't know |
| b. Suddenly speed up and rush away at any time? | <u>Yes</u> | No | Don't know |
| c. Break up into parts or explode? | Yes | <u>No</u> | Don't know |
| d. Give off smoke? | Yes | <u>No</u> | Don't know |
| e. Change brightness? | Yes | <u>No</u> | Don't know |
| f. Change shape? | Yes | <u>No</u> | Don't know |
| g. Flash or flicker? | <u>Yes</u> | No | Don't know |
| h. Disappear and reappear? | <u>Yes</u> | No | Don't know |

14. Did the object disappear while you were watching it? If so, how?

It was continuously in sight for about 5 minutes. Our flight when it took off & dropped behind the trees. When seen later, high in the sky & far away, it disappeared briefly, reappeared briefly, & then vanished.

15. Did the object move behind something at any time, particularly a cloud?

(Circle One): ☒ Yes ☐ No ☐ Don't Know.

IF you answered YES, then tell what

it moved behind: Moved behind trees

16. Did the object move in front of something at any time, particularly a cloud?

(Circle One): ☐ Yes ☒ No ☐ Don't Know.

IF you answered YES, then tell what

in front of:

17. Tell in a few words the following things about the object:

a. Sound none whatever

b. Color Brilliant orange light; super structure transparent as though light from within

18. We wish to know the angular size. Hold a match stick at arm's length in line with a known object and note how much of the object is covered by the head of the match. If you had performed this experiment at the time of the sighting, how much of the object would have been covered by the match head?

Practically, none of it. The object was large and very close.

19. Draw a picture that will show the shape of the object or objects. Label and include in your sketch any details of the object that you saw such as wings, protrusions, etc., and especially exhaust trails or vapor trails.

Place an arrow beside the drawing to show the direction the object was moving.

- Moved ① northward, toward me
 ② drifted back & then in a north westerly direction,
 ③ Took off in a westerly direction, over the ocean.
