5. LENGTH OF OBSERVATION 1-2 minutes	11. BRIEF SUMMARY AND ANALYSIS Observers watched a bright white colored object slowly descend toward the ground. The object was much brighter than the brightest stars. It disappeared behind some apartment buildings. Observer first thought that the object was a comet but the descend rate was too slow. A white tail was visible behind the descending object. Contact with SPADATS revealed that there was a satellite decay at approximately 0416Z 16 Feb 67. This particular decay was observed by many persons along the west coast.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was travelling west on Van Owen Street in Van Nuys when object was spotted. My first thought was that it was a burning plane because of the speed it was travelling (approx. 300 to 400 mph), but because of the ~~but because of the~~ brilliancy of the "fire" it was soon apparent that if it were a plane on fire it would have almost immediately headed towards the ground. Instead it continued on its course parallel to the ground, then ascended slightly and then again descended slightly, finally disappearing behind the Santa Monica Mountains to the southeast. I cannot guess the length, but there was what I would call a large tail extending from the rear of the object equally as bright as the object itself. At 8:30 PM the California Highway Patrol reported what they thought was a plane afire at a 7000 foot altitude sighted in the East Los Angeles Area, heading towards Pomona. Shortly after this it was observed descending into the Pacific Ocean, which is in the opposite direction.
