Dear [REDACTED]

Reference your unidentified flying object (UFO) observation of February 17, 1967.

Analysis of the submitted information revealed that you were probably observing the planet Venus. On February 17 Venus, with a stellar magnitude of -3.3, would have been quite bright in the western sky. To be more exact, at the time of the sighting, Venus would have been on an azimuth of 253 degrees at an elevation of approximately 15 degrees.

Thank you for reporting your observation to the Air Force.
